## AUSTRALIA – TSUNAMI during POLE SHIFT / EARTH ROTATION REVERSAL!

A pole shift is cyclically occurring between 12,000 years and 13,000 years apart with the last having unfolded a little more than 12,000 years ago. The last pole shift also coincided with a Sun nova event which is when the Sun sheds its dust shell thus showering one side of the Earth with tektites (solid matter around the size of eggs of all sizes). This occurs when the Earth has ceased its rotation for a very short period before it commences rotation in the opposite direction. The heat from the Sun following a Sun nova event evaporates around 400 feet from the oceans filling the atmosphere with moisture that takes hundreds of years to return to the surface. The far side from the Sun snap freezes in accordance with Boyles Law.

Meanwhile the oceans may have reduced their speed by about half before the Earth ceases rotation bringing about mass tsunami events. The next event will result in the Indian Ocean sweeping across Australia to the Great Dividing Range on its eastern side. When rotation begins to resume in the opposite direction there will be a return sloshing event as you observe in a bath tub.

**The last pole shift would have seen the east coast of Australia inundated. The Sun nova event may have taken around a 1,000 years for heat to begin to build to its present level, thus the ice age would have been extreme. Sun nova events appear to unfold around 150 million years apart, or is it 100,000 years apart, whereas pole shifts / Earth's rotation reversals occur around 12,500 years apart. Next event will be mild compared to the last pole shift! No Sun nova event!**

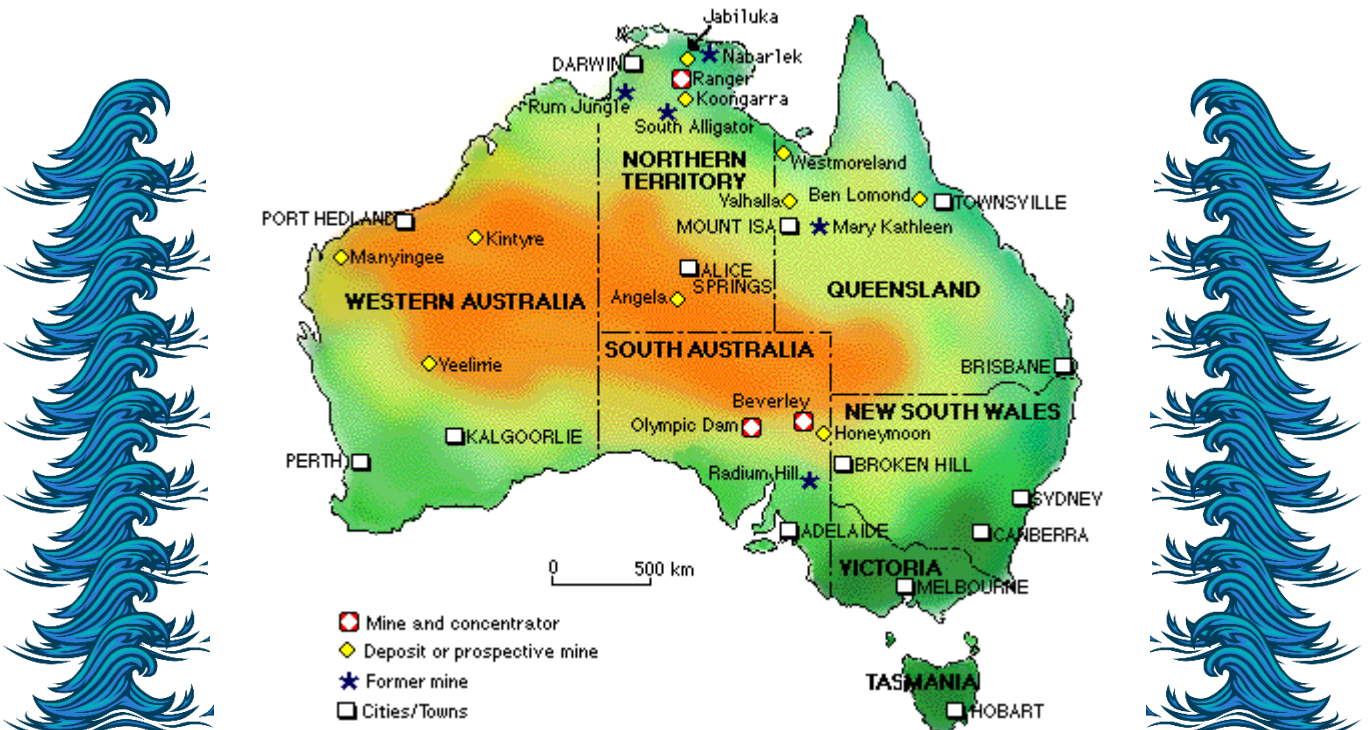

Ocean movement may reduce to around half prior to a total stopping of Earth's rotation, however the ongoing momentum of the oceans creates massive tsunamis worldwide, then there is the backwashing effect and still huge amounts of ocean moisture transferred to the atmosphere.

**EARTH ROTATING EAST:**  
1,000 mph / 1,600 kph

 A diagram showing a white commercial airplane flying westward (to the left) against a background of Earth's rotation indicated by blue arrows pointing east. The plane is labeled "CG".
 

**PLANE FLYING WEST:**  
575 mph / 925 kph

The next pole shift / reversal of the rotation of the Earth will result in the Indian Ocean impeding across Australia all the way from the western coastline all the way to the Great Dividing Range on Australia's eastern coastline. Then backwash will encroach upon all eastern coastline cities.

These events cyclically unfold every 12,000 to 13,000 years apart.

**NOTE:** USA's moon landings (July 1969 – December 1972) were six events which amongst other research, involved the collecting and bringing back to Earth of tektite rocks being evidence of the last Sun nova event of around 12,500 years ago.

Fortunately, Sun nova events appear to be much more widely spaced apart than pole reversals. As we look back on the timing of worldwide major catastrophes we see intervals of 12,500 years occurring.

Evidence of the Sun nova event is found in the tektite shower deposits as well as the snap frozen woolly mammoths.

Nothing much to worry about – the next event is some time away!

### How do you think climate change will affect coastal storm flooding in the future?

<https://www.quora.com/>

Paul Noel

16 June 2023

Climate Change is a delusional mythology. Now let's be clear the climate of Earth has always been changing for a very long time. I mean eons upon eons! It is entirely natural and there have always been storms and coastal flooding. So seeing a flood or a storm proves absolutely nothing.

## New Real Climate Science

<https://www.quora.com/>

8 June 2023

How do you think climate change will impact natural disasters and extreme weather conditions, and what can we do to prepare for it?

So far increases in CO<sup>2</sup> seem to have resulted in dramatic decreases in climate-related deaths. If only we can keep increasing CO<sup>2</sup> perhaps we can get such deaths down to zero.

**Further, surface temperatures and conditions are continually change on all planets!  
The planets have one thing in common – the Sun – the Sun does it all!**

**Do you think global warming and climate change will drastically change the appearance of our planet within the next one hundred to two hundred years?**

Paul Noel 3 May 2023

<https://www.quora.com/>

No, because all you are hearing at this time is a press amplified computer induced hallucination. It has no reality. From December 1978 to January 2023 the temperature change of the earth was  $-0.15^{\circ}\text{C}$ . To be blunt that is statistical noise. All of the topic of "Climate Crisis" and "Global Warming" is just propaganda.

$\text{CO}_2$  does not control the climate. The earth has been as high as 1%  $\text{CO}_2$  and life on Earth thrived and the planet didn't over heat. There are no tipping points! Simply state all you are hearing is projections of garbage in garbage out computer programs amplified by lying press. It is nothing but a Computer Induced Hallucination. A grand DELUSION.

Now the climate of earth does change from time to time. In the best data sets we have available Earth warmed dramatically about 11,000 years ago. It warmed to about  $5^{\circ}\text{C}$  higher than it is now and pretty much stayed there until recently. Right now the temperature is COLDER than the last 10,000 years. There is no emergency. BUT this having been said no person can predict exactly the climate in 100 or 200 years.

## HIGHER CO<sup>2</sup> LEVELS are CRITICAL for FOOD PRODUCTION

How long do you think Earth has before all life goes extinct, due to either humans or natural causes (asteroid, global warming)?

<https://www.quora.com/How-long-do-you-think-Earth-has-before-all-life-goes-extinct-due-to-either-humans-or-natural-causes-asteroid-global-warming>

11 June 2023

It really depends on how soon CARBON SEQUESTRATION efforts can reduce atmospheric CO<sup>2</sup> from 400ppm to 200ppm and cause a chain reaction of extinctions.

Long term levels of CO<sup>2</sup> in the atmosphere have been typically 1% (10,000 ppm).

CO<sup>2</sup> levels would need to increase 25 fold to reach that level.

CO<sup>2</sup> levels presently are dangerously low and present worldwide famine potential!

CO<sub>2</sub> levels approaching 0.100% appear to be optimum for global food security!

Farm Greenhouses

Level in a room of people

CO<sup>2</sup> has recently increased only from 340ppm to 420ppm, a long way off 1,000ppm!

Throughout the first quarter of the 21<sup>st</sup> century (2000 – 2025), humanity has been hell bent on its self-destruction by endeavouring to lower the atmospheric CO<sup>2</sup> levels, should they have fallen to the low levels as noted above, worldwide famine would have unfolded!

Science is confused and frequently in error due to dependence upon mind-centricity.

# ATMOSPHERE and CARBON DIOXIDE levels

0.025%

At this level of CO<sub>2</sub> plants begin to have difficulty going to seed!

0.018%

At this level we have worldwide famine – time of dinosaur extinction!

Percentage normal growth rate

## DINOSAUR EXTINCTION was through STARVATION due to lack of CO<sup>2</sup>

Dinosaurs went extinct about 65 million years ago (at the end of the Cretaceous Period), after living on Earth for about 165 million years.

Note the extremely low levels of CO<sup>2</sup> at that time of extinction, below 200 ppm – the dinosaurs died out due to starvation – plants have difficulty seeding below CO<sup>2</sup> levels of 250 ppm. The levels went below 200 ppm thus resulting in a global famine.

CO<sup>2</sup> is a natural fertiliser. Further, there is no correlation between levels of atmospheric CO<sup>2</sup> and surface temperatures.

30% of food production increases over the last 70 years are due to increased levels of CO<sup>2</sup>. Without increased CO<sup>2</sup> humanity would now be experiencing worldwide starvation.

## Why are the positive effects of global warming not being mentioned?

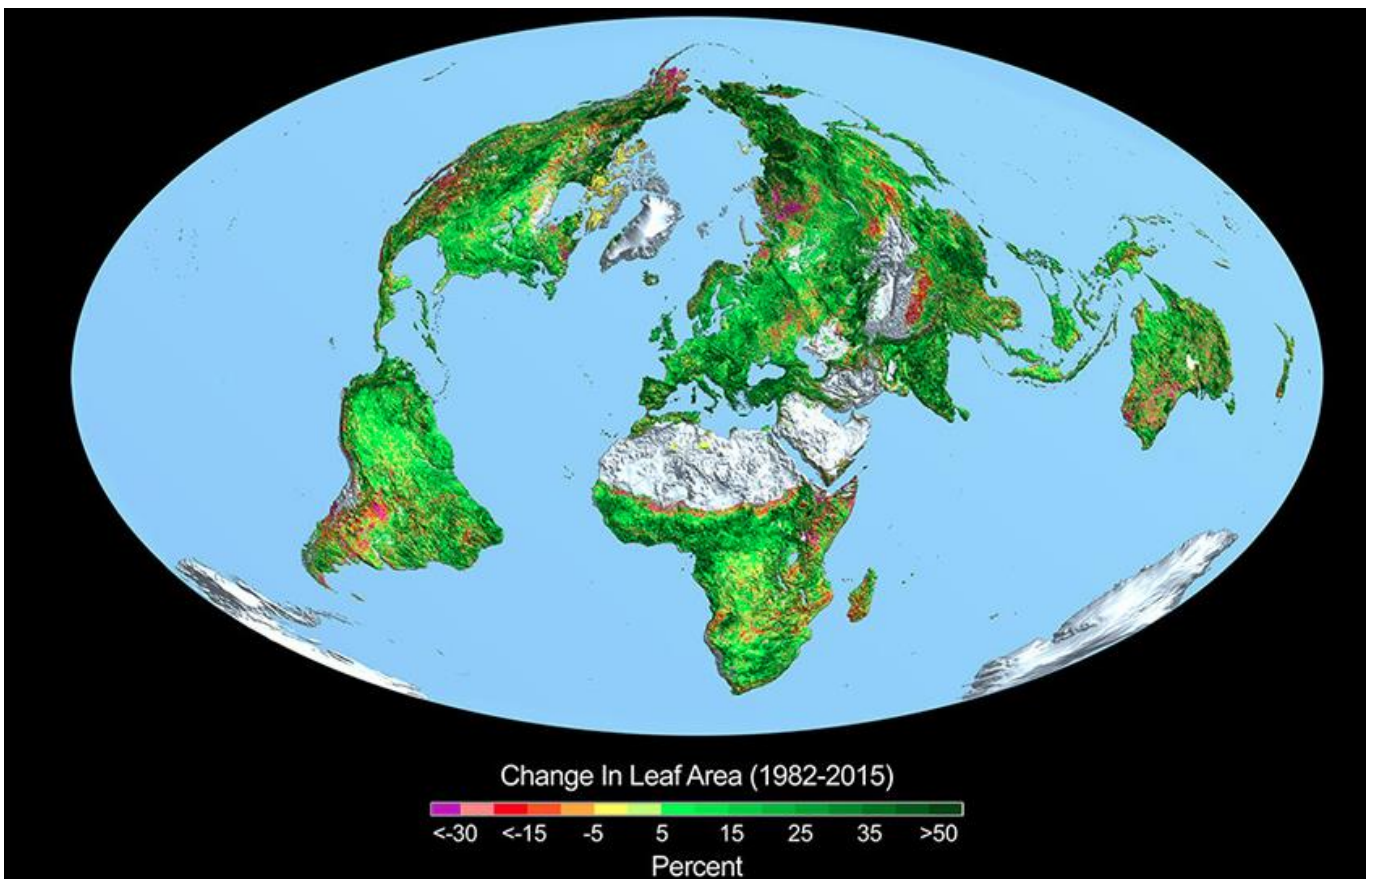

<https://www.quora.com/>

Ken Towe: former Senior Scientist at Smithsonian Institution (1964–1996)

14 June 2023

Since pre-industrial time the small amount of warming that has taken place and the release of CO<sup>2</sup> for our energy needs has combined to turn the Earth greener as seen from NASA satellites. That's a positive for agriculture, especially in the poorer parts of the world. It is rarely mentioned in the media because it doesn't fit the narrative of a catastrophic future unless we remove all of the energy that gets us to zero emissions by 2050.

From a quarter to half of Earth's vegetated lands has shown significant greening over the last 35 years largely due to rising levels of atmospheric carbon dioxide, according to a new study published in the journal *Nature Climate Change* on 25 April 2016. The greening represents an increase in leaves on plants and trees equivalent in area to two times the continental United States. Research results showed that carbon dioxide fertilisation explains 70% of the greening effect

**The increase of CO<sup>2</sup> in the atmosphere from about 320 ppm (0.032%) to 420 ppm (0.042%) has raised the efficiency of our crops and trees by about 300%. Worldwide famine is avoided! Further, CO<sup>2</sup> does not warm up the Earth, it cools it slightly (increased vegetation). CO<sup>2</sup> is beneficial to life! It is the basis of life. CO<sup>2</sup> is not a contributing to global warming. CO<sup>2</sup> is no danger. Life on Earth has recovered greatly because of our releasing CO<sup>2</sup> into the atmosphere (even if it is only a tiny fraction!).**

**Note: The farming region around West Wyalong, central New South Wales, Australia, was reporting regularly wheat crop yields at 10 bags per acre in the 1960s whereas now in the 2020s the yields are regularly 28 bags per acre! This being equivalent to a very substantial increase. I, John, grew up in this farming district.**

# EARTH'S CARBON CYCLE

GT = GIGATONS OF CARBON

To consider that humanity's carbon footprint is driving climate change is absurd.

There is NO correlation between atmospheric CO<sup>2</sup> and global temperatures!

The stationary side facing the Sun during a Sun nova event receives tremendous heat, whilst the reverse side snap freezes. Massive amounts of water evaporate out of the oceans into the atmosphere. Heat from the Sun and moisture in the air may take more than a thousand years to normalise. Sun nova events may be 150 million years apart or just 100,000 years apart.

And a massive drop in global temperature is brought on by a Sun nova event:

# GAS of LIFE

## Carbon Dioxide Benefits the World

# CO<sub>2</sub>

Greening of the Earth, 1982–2006\*

\*Percentage change in foliage cover as revealed by satellite.

Dr. Willie Soon is an astrophysicist and a geoscientist based in Salem, Massachusetts, USA.

<https://www.ceres-science.com/willie-soon>

**Willie Wei-Hock Soon** (born September 30, 1965)<sup>[1]</sup> is a Malaysian astrophysicist and aerospace engineer who was long employed as a part-time externally funded researcher at the Solar and Stellar Physics (SSP) Division of the Center for Astrophysics | Harvard & Smithsonian.

Soon is an anthropogenic climate change denier, disputing the scientific understanding of climate change, and contends that most global warming is caused by solar variation rather than by human activity. He co-wrote a paper whose methodology was widely criticised by the scientific community. Climate scientists such as Gavin Schmidt of the Goddard Institute for Space Studies have refuted Soon's arguments, and the Smithsonian does not support his conclusions. He is nonetheless frequently cited by politicians opposed to climate-change legislation.

Soon co-authored *The Maunder Minimum and the Variable Sun–Earth Connection* with Steven H. Yaskell. The book treats historical and proxy records of climate change coinciding with the Maunder Minimum, a period from 1645 to about 1715 when sunspots became exceedingly rare.

From 2005 to 2015, Soon had received over \$1.2 million from the fossil fuel industry, while failing to disclose that conflict of interest in most of his work. Of this industry funding, over half went on the Smithsonian's facility operating costs, with the remainder going to Soon as his salary.

[This Is What They Don't Want You to Know About the Climate Agenda](#)

## What are the types of plants that are most affected by climate change?

<https://www.quora.com/>

14 January 2024

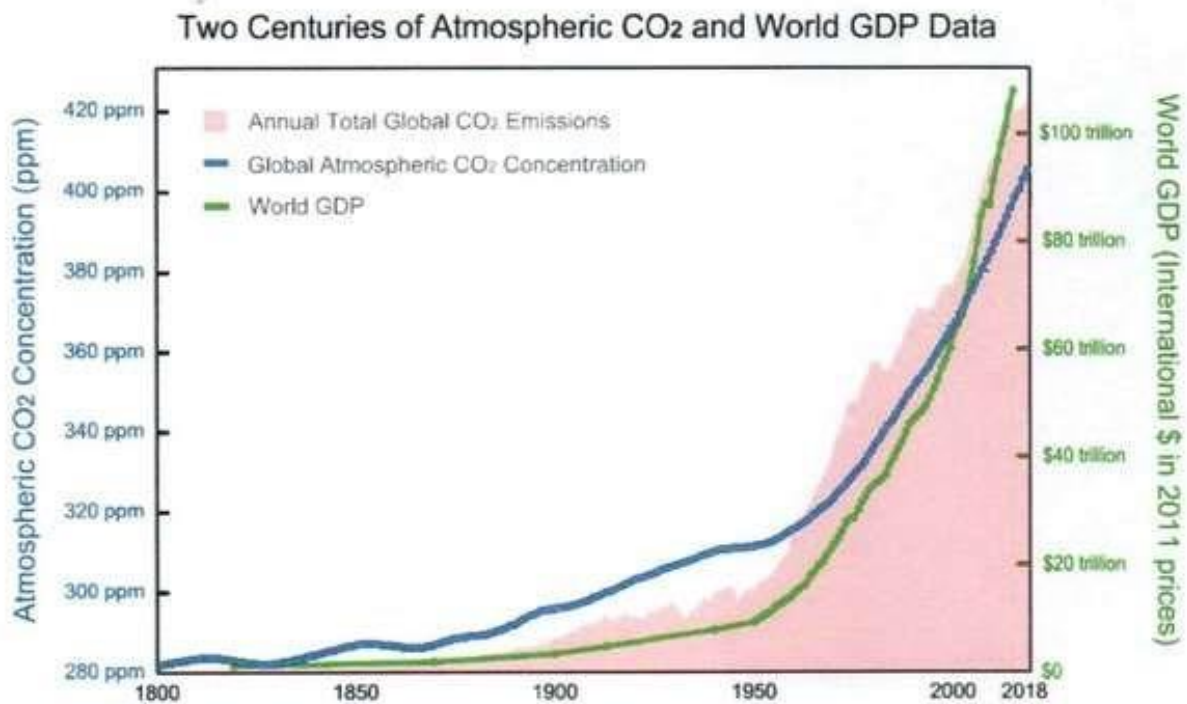

Steve Sawyer: Former Engineering, and Accounting & Finance. Now retired

### From the United Nations: What Is Climate Change?

“Climate change refers to long-term shifts in temperatures and weather patterns. Such shifts can be natural, due to changes in the sun’s activity or large volcanic eruptions. But since the 1800s, human activities have been the main driver of climate change, primarily due to the burning of fossil fuels like coal, oil and gas. Burning fossil fuels generates greenhouse gas emissions that act like a blanket wrapped around the Earth, trapping the sun’s heat and raising temperatures. The main greenhouse gases that are causing climate change include carbon dioxide and methane.” (If you accept that definition.)

If we are to use this definition of climate change, virtually all types of plants have benefited immensely from the recent climate change. Here’s why.

If you listen to yourself, the media, the politicians and the global elite, any consensus would be that humans are facing dire consequences and an existential threat (yes, our whole existence is in danger) and they’ve made everyone very fearful about global warming. You can see this on Quora. Virtually all of the questions in Quora relate to the negatives that are constantly being thrust upon us. Yet, as of 2023, there are realistically almost no significant negatives beyond the weather problems that humans have always faced. Heat waves, cold waves, tornados, hurricanes, floods, droughts, forest fires, melting glaciers, etc. are no worse than they have been in the past several decades. The world is not really in crisis. What is missing are all the positives of global warming (one degree C in the last 150 years per the IPCC) and the increased CO<sup>2</sup> to date which has unquestionably helped the plant life on our planet. The human population is also doing exceptionally well. By virtually all of the more critical measures of our

**Figure III.B.1.2.** World GDP (green line) plotted with annual total global CO<sub>2</sub> emissions (shaded pink area) and global atmospheric CO<sub>2</sub> concentration (blue line) from 1800 to 2018.

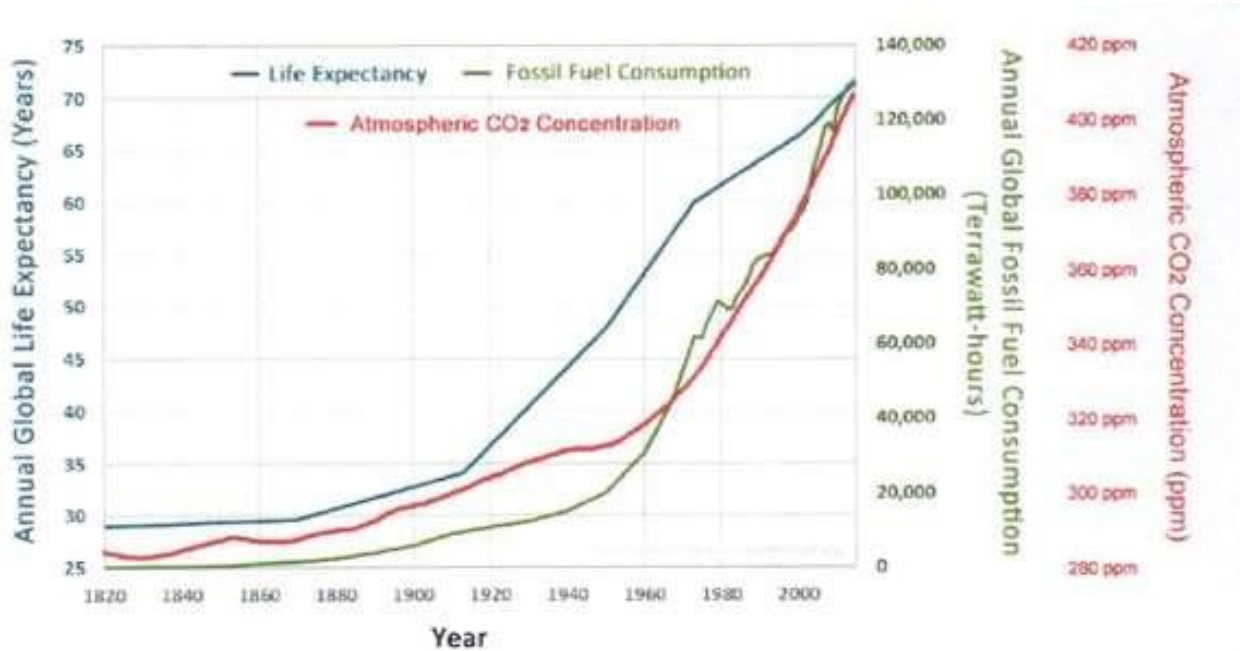

lives, the industrial revolution and the use of fossil fuels has greatly improved our lives with almost no detriment to date from the 1.0°C increase of temperature (global warming) over the past 150 years.

First let's look at the increase in GDP per capita over the past 200 years:

Two Centuries of Atmospheric CO<sub>2</sub> and World GDP Data –

Or how about life expectancy?

**Figure III.B.3.1.** Two-century trend in global life expectancy (blue line), fossil fuel consumption (green line) and atmospheric CO<sub>2</sub> concentration (red line).

Across the whole of the 19<sup>th</sup> century life expectancy changed but little. Then, as fossil energy consumption really took off in the 20<sup>th</sup> century, so did human longevity, with global life expectancy *doubling* in value over the next ten decades, such that a person born today is expected to live to an average age of 72 years.

As shown by the above graphs, human life has vastly improved all across the planet during the course of the industrial revolution and primarily due to the energy provided by fossil fuels which has allowed us to develop technology which makes our lives better.

When did you last think about all of the developments that transform the natural subsistence life of the past into our human-friendly environment of today which was accomplished by using high tech mostly fossil fuel driven machines or fossil fuel products (plastics, for example)? Development means water purification equipment, irrigation systems, fertilizers and pesticides, genetically improved crops, dams, seawalls, heating, air-conditioning, sturdy homes, drained swamps, central power stations, pharmaceuticals and vaccines, land and water and air transportation, clothing for every environment, and on and on. All of this did not just magically happen. It was a long process which has mainly occurred over the course of the industrial revolution and was driven by energy from fossil fuels.

We humans have also received material benefits from the much greater agricultural output in recent years, the result of the increased carbon dioxide in the atmosphere and the slight amount of warming to date.

Studies have shown that plants function much better in atmosphere that has around 2,000-2,500 ppm of CO<sup>2</sup>, or about 5 times what we have today. The great explosion of life on this Earth occurred about 540 million years ago when CO<sup>2</sup> was about 2,500 ppm CO<sup>2</sup>. We need keep the flora well fed. It is the start of the food chain.

In the 1950's and 1960's, there was great concern about the world's population explosion and the ability of the agricultural system to keep humanity fed. In 1968, a book entitled "The Population Bomb" by Paul R. Ehrlich, a Stanford University professor, more or less brought this discussion to its culmination. Early editions of the book began with the statement "The battle to feed all humanity is over. In the 1970's hundreds of millions of people will starve to death in spite of any crash programs embarked upon now. At this late date nothing can prevent a substantial increase in the world death rate..." This is very strong rhetoric and a very dire prediction. We can be very thankful that reality has been much different.

The world population in 1968 was 3.552 billion and by 2020 the population had grown about 120% to 7.795 billion. Ehrlich's prediction could easily have been correct except for human technology and fossil fuels which have made agriculture much more efficient and productive.

But along with all our human ingenuity, there have been a couple other benefits which were unseen and unpredictable 50 years ago. Those are the benefits derived from the growth of carbon dioxide in the atmosphere and the approximate 1.0° C increase from global warming. There have been 100's of studies done on the effects of increased CO<sup>2</sup> on the productivity of food plants – fruits, vegetables, and grains – and all of them have convincingly demonstrated that more CO<sub>2</sub> means more plant growth.

The chart below is a summary of data obtained from the *Center for the Study of Carbon Dioxide and Global Change* website. They publish a short brochure called "The Many Benefits of Atmospheric CO<sup>2</sup> Enrichment". To quote from the brochure on the subject of CO<sup>2</sup>: "Ironically, far too many demonise and falsely label this important trace gas a pollutant. Nothing could be farther from the truth. Instead of being shunned like the plague, the ongoing rise in CO<sup>2</sup> should be welcomed with open arms. Why? Because plants love CO<sup>2</sup>. Far from being a pollutant, this colourless, odourless, tasteless and invisible

THE EFFECT OF DOUBLING CO <sub>2</sub>			
	Mean % Increase	Number of Studies

gas is better than the best fertiliser ever invented. Essentially, it is “food” that sustains all plants on the face of the earth. And the more they “eat” (or take in from the air), the bigger and better they grow.”

This chart reflects the increased growth of plants using a 300 ppm increase in CO<sup>2</sup>.

### Cereal Crop Yields, World, 1961 to 2021

Yields measured in metric tonnes per hectare

Data source: Food and Agriculture Organization of the United Nations  
OurWorldInData.org/crop-yields

Above data in table form:

Cereal Crop Yields, World, 1961 to 2021 (every 10 years)  
In metric tonnes per hectare

Year	Maize	Rice	Wheat	Soybeans
2021	5.88	4.76	3.49	2.87
2011	5.14	4.45	3.16	2.52
2001	4.48	3.95	2.74	2.31
1991	3.69	3.53	2.56	1.90
1981	3.49	2.82	1.88	1.75
1971	2.65	2.36	1.62	1.52
1961	1.94	1.87	1.09	1.13

And here’s another graph of the growth in the main agricultural commodity crops from 1961 to 2021. Note that they have all increased about threefold, some due to technology, but mostly due to CO<sup>2</sup> fertilisation. (The scale is in metric tonnes per hectare.)

What's most amazing is that the extremely positive plant effects from CO<sup>2</sup> are scientifically uncontroversial yet practically never mentioned by the climate science community. And these benefits are never mentioned by the global warming hystericals. This is a dereliction of duty. It is imperative that all of us, especially the scientists and so-called experts, look at the big picture, all positives and negatives, without prejudice. If the proponents of global warming think that these positives are outweighed, they can give their reasons. But when discussing CO<sup>2</sup>, to totally ignore this extremely positive effect of increased CO<sup>2</sup> levels, is very dishonest and unethical. They are trying to advance an agenda without providing any contrary facts that prove to be inconvenient and might muddy their arguments.

The positives of the 1.0°C that the planet has experienced in the last 150 years, coupled with the increase of CO<sup>2</sup> from about 280 ppm to 420 ppm has had an extremely positive effect on our environment and the human population. Yet the proponents of the global warming narrative keep talking about the dire consequences we're facing, the potentially disastrous climate change, the climate catastrophes and the existential threats. To date, there has really been no out-of-the-ordinary adverse consequences that can be attributed to our minimal global warming.

So far, the benefits of global warming are winning by far. As of 2022, we have received much greater benefit from the moderate warming and the increased CO<sup>2</sup> than any detriments from the global warming scare. And there is nothing happening that would change the outlook for these "benefits" into the future

# CO<sub>2</sub>

# Extreme Earth Events

## Global Warming:

28 September 2011

James: Verna, is there really global warming, or is it something that seems to be happening but is being made up by certain people. I think I've asked you this question before –

That doesn't matter James, I'm happy to answer it again.

Verna, a Nature Spirit: Yes, global warming is real, but it's not happening solely because of humanity's impact on the world. Humanity is only minimally affecting it, the world for the most part being able to absorb all you do that results in global warming, however it's the Earth itself that is heating up, internally and because of external influences. And these will continue as I've told you. But all humanity does in regards to global warming will be of no account because of the overall changes that are going to take place.

Monday, 17 December 2018

James: Hi Nanna Beth, I feel like a chat, is that all right with you?

Nanna Beth – 3<sup>rd</sup> Celestial Heaven: Also you might like to know, the Earth itself is starting to change its rotation speed and is slightly moving on its axis, thereby causing shifts in surface weather patterns as warming and cooling takes effect, just happening in different places than how it has been. And these changes are coming from the core that's being affected by greater space changes. There is always massive pressures and forces affecting every part of natural creation, so the world and all space and all that's within it. And as David (Montaigne) points out, observers have observed that things remain the same, at least seem to be the same, although with minute incremental changes, all of which culminate to periodic, large swift changes. And so humanity is coming into a time of rapid change, and on all levels, not just the physical or spiritual. Of which I still can't say more.

So the debate about global warming or cooling will continue with both being right, as both are occurring. And in some areas they are affecting each other, in other areas they are happening independent of each other.

James: Thank you Nanna Beth, you've covered all I was wanting you to update.

**NOTE:** Since the beginning of the ending of the Rebellion and Default commenced on 31 January 2018, communications with our invisible friends from much higher levels than previously allowed will progressively increase with those who open themselves to aspiring to live Feelings First!

**Here is a thought!** Should those who are immersing themselves in research of historical significance AND are also embracing Living Feelings First, longing for the truth and understanding of what they are feeling, then could they be assisted with access to the museum at Jerusem?

**GEOPHYSICAL POLE SHIFTS appears to take place every 12,000 to 13,000 years!**

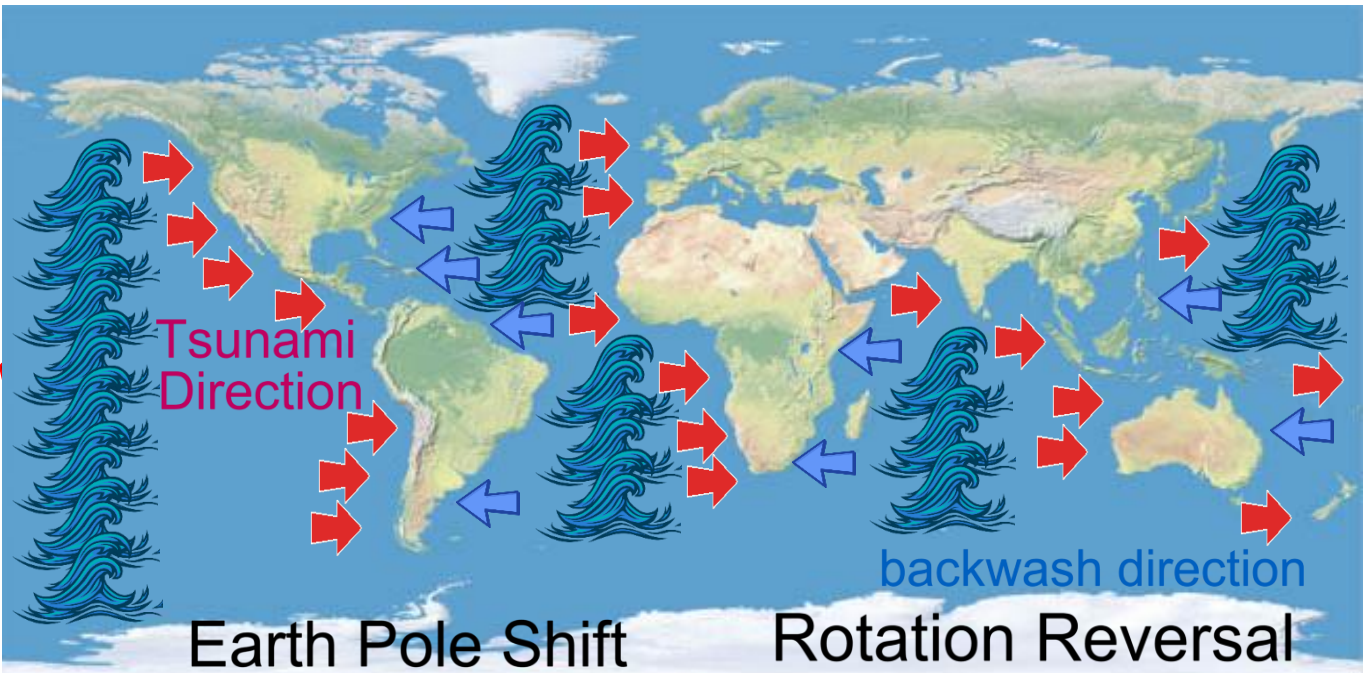

**CIVILIZATION TIME LINE**

50,000 years ago and earlier Laschamp reversal at regular intervals!  
 37,500  
 25,000 Lemuria submergence Atlantis frozen over  
 12,500 New Atlantis submerged  
 NOW! Unfolding

**This is a Pole Shift scenario:**  
 The rotation of the Earth will slow progressively preceding a rapid stopping and then pole shift reversal followed by a reversal of the rotation of Earth resuming in the opposite direction. The oceans will have significant momentum to inundate vast areas of landmass followed by a backwashing event.

## MUSEUM of JERUSEM – 1<sup>st</sup> Celestial Heaven

Note previously from Nanna Beth, 3<sup>rd</sup> Celestial Heaven – 20 November 2017 – relating to a ‘museum’ at Jerusem on the 1<sup>st</sup> Celestial Heaven: “And as far as concerning where The First Parents are now, they have moved on with the old guard, having been released from such duties that being The First Parents required. You can see and even in a sense ‘meet’ with them when you come into the first Celestial sphere, we have a museum sort of arrangement, it is a massive and highly complex and covers every aspect of humanity’s history on Earth and in the Mansion Worlds. And you can sort of interact with the exhibits – if I can crudely call them that. You literally walk into say the Atlantean times and explore using your mind for whatever aspect of such times you care to. You can even in a sort of holographic way meet with people from those times, speak with them in a sense, although it’s all automated, it’s not the real person who is now a spirit, although the whole experience being so real and amazing makes your mind believe it is the real person or spirit. So we can even talk to Mary and Jesus like this, which a lot of Celestials do when they first arrive, it all helping them to get to know them better and know what they were all about. It’s a massive learning centre and contains all the knowledge of humanity’s experience, so anything and everything is kept there like ‘living’ archives.” (Thus you can see all of history is recorded and can be researched and studied.)

For example: Others believe they have transcribed messages from Jesus but that is not so, that is not Jesus from Nazareth of the Bible but typically a Jesus from the Celestial Heavens who is fully versed through researching and engaging in the very amazing museum at Jerusem on the 1<sup>st</sup> Celestial Heaven. Other Celestials with names akin to the Apostles of Jesus have from time to time done the same thing.

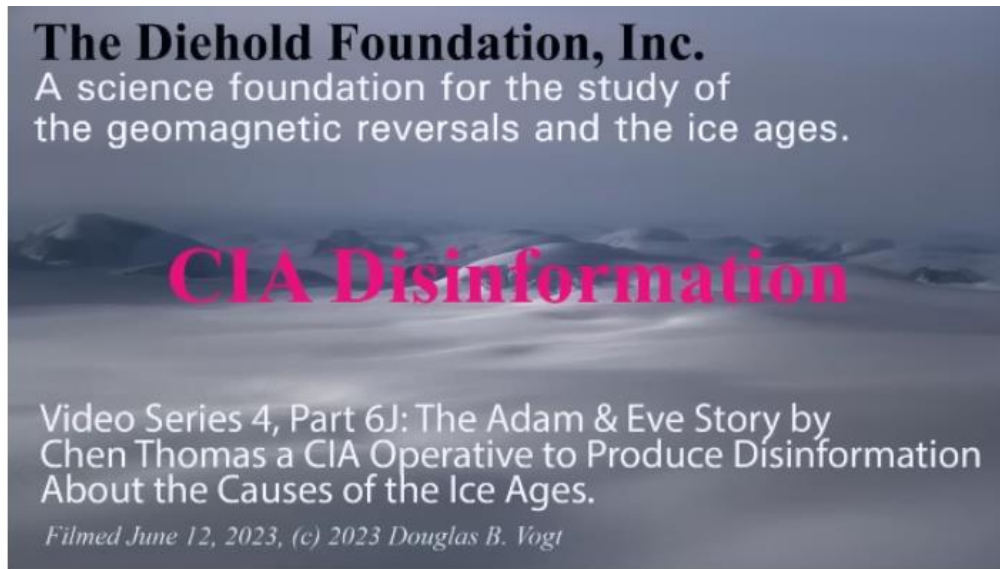

First parents are Andon and Fonta (Aman and Amon) who lived 993,500 years ago – not Adam and Eve who came to Earth 38,000 years ago.

## HOW DID THIS ERRONEOUS and HARMFUL PROPAGANDA ORIGINATE?

Series 4, Part 6J, Adam and Eve Story by Chen Thomas CIA Disinformation

[https://www.youtube.com/watch?v=cZkq\\_bCQmfk](https://www.youtube.com/watch?v=cZkq_bCQmfk)

<https://www.youtube.com/watch?v=ajp9Xr5n6cg>

Diehold Foundation published this YouTube on 12 & 17 June 2023

<https://dieholdfoundation.com/>

The alternative reality of what is causing global warming as well as what causes cataclysms, this being introduced by Chan Thomas with the false premise of carbon dioxide (CO<sup>2</sup>) as being the driver of global warming, while he was working with the USA agency of the CIA (Central Intelligence Agency). Through an act of Congress, being the Central Intelligence Agency Act 1949, encapsulating the Education Partnership Agreement, “improvement of education in science, technology, engineering, arts and mathematics”, which enables CIA to impose its programs of disinformation, as well as their own agendas and propaganda upon the people of USA through the education system as well as the media. However, Wallace S Broecker tried to give credence to the idea that CO<sup>2</sup> is causing global warming (Journal Science 8 August 1975). Broecker is really the father of global warming.

June 12, 2023, Video Series 4, Part 6J (c) 2023 Douglas B. Vogt

**NOW we are to benefit through the abundance of CO<sup>2</sup>!**

The central universe is stationary. There are seven super-universes rotating around the central universe. Earth is on the outer edges of one of the seven super-universes. Each star (Sun) we see in the night sky has between zero and three inhabitable worlds within its solar system. One in three inhabitable world is inhabited.

Energy is transmitted from the centre of the universe to the stars and in turn, the stars (suns) transmit energy to the core of the planets within its solar system. There are periodical cyclical surges in the volume of energy relayed. This can cause rapid climate changes, etc.

During the mid to late 20<sup>th</sup> century (1950s and onwards) the surge in energy relayed to the cores of the worlds in our solar system has brought about noticeable effects. The surge in energy received into the core of Earth has brought about a slight increase in the rotation of the core, this has increased tensions on the surface, a slight tilting and noticeable changes in Earth's weather patterns.

NASA has also recorded changes to the environments on the surface of our neighbouring planets throughout our solar system!

## HABITABLE ZONE

The data on climate change is that it is actually not gradual. Periodically for reasons not well understood at this time the climate abruptly changes. We are beginning to piece together the story of how this works. Science will pull this together but it will take a long time.

Typically is omitted transmission of heat by induction into the core of the Earth in any understanding of rapid weather pattern changes.

Every single day we continue to produce more CO<sup>2</sup> the world gets more and more filled with life. CO<sup>2</sup> is life. Literally there would be no life on Earth if we didn't produce CO<sup>2</sup>. Now as to CO<sup>2</sup>, our C3 photosynthesis plants are doing nearly 800% more production for the same amount of sunlight as before CO<sup>2</sup> rose. Our C4 plants are up nearly 650% as well.

The unsuspecting public worldwide are generally oblivious to the covert control over them maintained by 'hidden controllers', being faceless unknown men who have enormous wealth and global agendas centred on their gross addicted to power, control over others and further wealth accumulation. These faceless men consider that the world has a population with many people being 'surplus to their needs'. Consequently, they propagate falsities that are detrimental to people. 'Global warming due to CO<sup>2</sup>' is a grossly misleading statement of these control maniacs. Should they have been successful with their propoganda, then CO<sup>2</sup> levels may have diminished to levels that would have resulted in worldwide famines and starvation to death of billions of people and much of our natural environment.

Now that you are aware of these misleading agendas, question everything that you doubt in detail.

The continents of Earth float on molten lava! Tectonic plates adjust in levels according to the loads upon them. Thus, melting ice fields does not necessarily result in rising sea levels! As the core rotation may change a little due to energy load changes, temperatures on the surface may rise as well as fall as of a consequence to changes with the core.

# Universe Celestial Autobahn

Angels, Celestials and Spirits of all descriptions utilise the energy transmission lines throughout the universes to travel along. You might even call them intergalactic super highways. These energy transmission lines are throughout every part of the universes.

# Local Celestial Autobahn

# The Great Global Warming Swindle – Full Documentary HD

<https://www.youtube.com/watch?v=oYhCQv5tNsQ>

19 August 2018

The Great Global Warming Swindle caused controversy in the UK when it premiered March 8, 2007 on British Channel 4. A documentary, by British television producer Martin Durkin, which argues against the virtually unchallenged consensus that global warming is man-made. A statement from the makers of this film asserts that the scientific theory of anthropogenic (man-made influenced) global warming could very well be "the biggest scam of modern times." According to Martin Durkin the chief cause of climate change is not human activity but changes in radiation from the sun. Some have called The Great Global Warming Swindle the definitive retort to Al Gore's 'An Inconvenient Truth'. Using a comprehensive range of evidence it's claimed that warming over the past 300 years represents a natural recovery from a 'little ice age'.

According to the program humans do have an effect on climate but it's infinitesimally small compared with the vast natural forces which are constantly pushing global temperatures this way and that. From melting glaciers and rising sea levels, The Great Global Warming Swindle debunks the myths, and exposes what may well prove to be the darkest chapter in the history of mankind. According to a group of leading scientists brought together by documentary maker Martin Durkin everything you've ever been told about global warming is probably untrue. Just as we've begun to take it for granted that climate change is a man-made phenomenon, Durkin's documentary slays the whole premise of global warming.

"Global warming has become a story of huge political significance; environmental activists using scare tactics to further their cause; scientists adding credence to secure billions of dollars in research money; politicians after headlines and a media happy to play along. No-one dares speak against it for risk of being unpopular, losing funds and jeopardising careers."

MoC 490

**Do you think global warming and climate change will drastically change the appearance of our planet within the next one hundred to two hundred years?**

Paul Noel 3 May 2023

<https://www.quora.com/>

No, because all you are hearing at this time is a press amplified computer induced hallucination. It has no reality. From December 1978 to January 2023 the temperature change of the earth was  $-0.15^{\circ}\text{C}$ . To be blunt that is statistical noise. All of the topic of "Climate Crisis" and "Global Warming" is just propaganda.

$\text{CO}_2$  does not control the climate. The earth has been as high as 1%  $\text{CO}_2$  and life on earth thrived and the planet didn't over heat. There are no tipping points! Simply state all you are hearing is projections of garbage in garbage out computer programs amplified by lying press. It is nothing but a Computer Induced Hallucination. A grand DELUSION.

Now the climate of earth does change from time to time. In the best data sets we have available earth warmed dramatically about 11,000 years ago. It warmed to about  $5^{\circ}\text{C}$  higher than it is now and pretty much stayed there until recently. Right now the temperature is COLDER than the last 10,000 years. There is no emergency. BUT this having been said no person can predict exactly the climate in 100 or 200 years.

## How can we be sure that rising sea levels aren't caused by land subsidence?

Jeff Juel 3 May 2023

<https://www.quora.com/>

In some places, land uplift effectively cancels out the absolute rate of rise in the mean sea level.

NOAA operates a tide gage on a pier in Astoria Oregon. The sea level data collected here continuously has been compiled to show how the mean sea level relative to tidal benchmarks in Astoria has changed over the past century.

# Relative Sea Level Trend 9439040 Astoria, Oregon

That's the NOAA emblem in the upper right corner.

The relative mean sea level is falling at the rate of  $-0.16$  mm/yr. This works out to  $5/8$  inch per century.

If the absolute rate of rise is accelerating at Astoria, the rate of uplift must also be accelerating at exactly the same rate. This is preposterous.

We know that the land at Astoria Oregon is experiencing uplift due to the offshore tectonic plates which are subducting beneath the North American plate. Therefore the absolute mean sea level is rising.

It's possible (but extremely unlikely) that the rate of subduction combined with variations in salinity, barometric pressure and water temperature are magically masking the supposed accelerating rate of rise in the mean sea level at Astoria Oregon.

A better explanation for what the sea level is doing at Astoria Oregon is that the supposedly "settled science" that the global mean sea level is rising at an accelerating rate due to increasing atmospheric  $\text{CO}_2$  levels is the greatest fraud in human history.

## How much is the global sea level rising, and what are the causes?

Paul Noel

Former Research Scientist 6 Level 2 UAH (2008–2014)

4 May 2023

<https://www.quora.com/>

I answer this question regularly but nobody seems to get the hint.

Now let's get very clear here! I have done a lot of study into the issue of sea level rise. I will give you examples of how far in depth I have gone. I have looked at sea floor maps. I have looked at historical photographs from 1920's to 1970's to present at many famous sites I have also done much looking into historical battlefield maps in the Pacific Ocean theatre of operations for the US Navy and Marines from 1940's to present maps. I have looked at the Maldives and even the coast of Sri Lanka from 1775 to the present on maps. I have looked at maps and pictures from Texas Coast from the 1850's to the present. I have looked into places I have been including most of the sea coast of the USA and even been to sites supposed to be evidences of sea level rise.

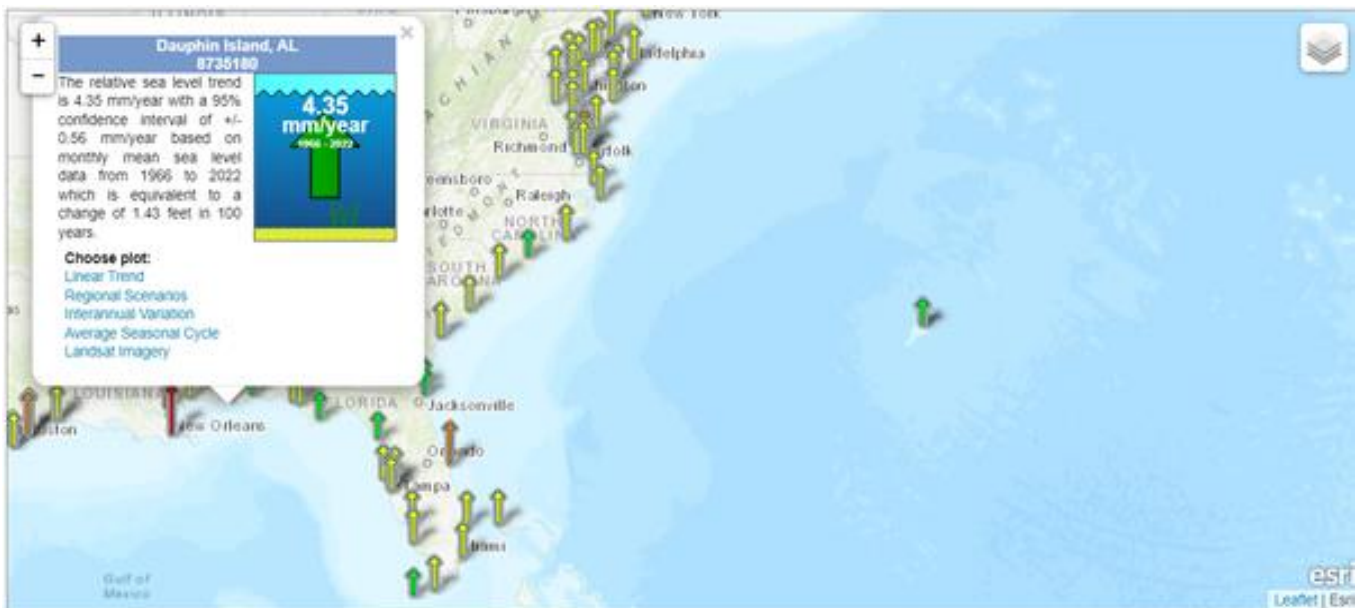

There is absolutely no evidence of the claimed sea level rise. Even in locations where NOAA claims sea level rise there isn't sea level rise. I worked many months on Dauphin Island, Alabama in 1988–1989 time frame. My job took me literally down every street and every business in the place. I had friends who had beach houses there as well. I have gone swimming there. I was at that time hearing claims of sea level rise. All the Government Officials were screaming sea level rise. On Dauphin Island which is extremely low to the sea level where King Tides have flooded the entire island for centuries and I have seen that myself, I was very concerned of the issue and watching very closely. I can tell you plainly that there are installations on Dauphin Island dating from 1826 to the present.

Fort Gaines is subject at certain high tides of some slight wetting of its foundation areas. As it turns out it always was so. It was constructed literally at sea level in 1826. It still is at sea level. The Dauphin Island Sea Lab is still above water and in 1989 it was above water then but barely.

It still is barely above sea level. Now I am telling you this because it is profoundly important that you understand that this is not some trivial “cherry picked” example. According to the Global Warming / Climate Change people almost no place on earth is sinking faster than Dauphin Island. The NOAA numbers suggest the place has sunk by nearly 0.5 feet since 1989.

The map above illustrates relative sea level trends, with arrows representing the direction and magnitude of change. Click on an arrow to access additional information about that station.

Let's be painfully clear NOAA is telling you that Dauphin Island is sinking 4.35mm/year. That is equal to just over the thickness of 2 US 5 cent coins. So from 1989 to present being 148 mm! Almost 6 inches!

Now let's clear the air a bit here. Raising the sea level on Dauphin Island by 6 inches would make most of the buildings on the island unusable by either blocking roadways or flooding sewerage drainage etc. This has not happened. NOAA is LYING! A rise of just 12 inches would incapacitate the city of Dauphin Island completely! The city is thriving. A review of the city and its growth since the 1989 time frame is stunning. They have an airport now! (Amazing) but the single most amazing thing that they have is what happened to their wonderful fishing pier. The water at the end of the pier was like 6 feet deep when I was there.

I am sorry to tell you but NOAA is a FRAUD! This whole Global Warming / Sea Level Rise / Climate Change thing is a HOAX! Don't go fishing off this fishing pier. The old shore line is obvious. It is marked by growing bush and trees now. The parking lot for the public beach is marked. That was right on the water. Please send this sea level rise crap to hell it belongs there! It is an absolute lie.

A lot of people would like to imagine that if some glacier on Greenland or Antarctica melts it will pour lots of water into the sea flooding the land somewhere else. That isn't how this works. The Internet is flooded with simulated flooding maps to scare the foolish people spitless. The reality is much different.

Anybody knows if I have a glass of water and I pour in more water the water in the glass rises. That is the simple illustration they give you that if the water on Greenland or Antarctica pours into the ocean the water will rise. It becomes easy to estimate the mass of water and estimate the rise. The problem is that isn't what will happen.

Should the ice melt in Greenland and Antarctica, the water will indeed flow into the ocean. But **Greenland and Antarctica are floating on magma.** They will no longer be so heavy and will simply rise by the amount of magma displaced currently. Now the magma is denser than water. It is about 5.5 times denser than water. So the rise of the land will be about 1/5.5 by distance of the ice melt. Again it would seem you could get a sea level rise. **But in moving up the land floating so it will withdraw exactly the same displacement magma from the area around it. That will sink the ocean floor that**

**much. But even more because the ocean will now weigh more it will push down more equal to the push down that was on Greenland or Antarctica. The net effect is zero for the other land masses.** You see they are floating too. Their floating is independent of Greenland or Antarctica. So the sea floor will be displaced down, Greenland and Antarctica will be displaced upward and North America and the other continents will see no effect. They will be like 2 ships in a key at the port. As you unload one ship, it rises out of the water but the adjacent ship sitting in the water doesn't see any change. That is the truth about "sea level rise".

You have been taught bad physics to believe this sea level rise thing. The displacement of continents is produced by their Granite Plutons that they sit on. These are floating in the magma. Mountains are not pushed up! They rise if the pluton gains size. Land does not sink unless the pluton melts and the displacement value drops. Neither event has anything at all to do with the weather.

Environmentalists take note! You cannot fix this. Your lies just got exposed to the light of day. Your arguments depend on extremely bad science.

Now also take note! I am a real genuine article environmentalists. I don't mean some ideologue. I literally have fought for things like cleaning up Redstone Arsenal from the environmental disaster it once was. It took me 30 years to win the effort to cause clean up there! Not one environmentalist funded me or helped me. I did this on my own. I have no truck with damaging the environment but also have no truck with environmental fraud. I take no money from any group. No, I am not paid by environmentalists nor oil companies. The people you think are environmentalists are money grubbing frauds who take your money and laugh at you behind your back. They jet set around the world claiming to fight for the environment while they bitch at you for taking an economy ticket to visit the beach or family.

They lie all the day long about their false economies and fake economic profits and phoney "Green Jobs" etc. These people will fuss at me if I take a flight from HSV to LAX 1,900 miles and spend \$500 on the ticket (I checked prices for this number) round trip. Yet to drive in my car a pretty good car at that at 32 mpg the trip burns \$450 gasoline (approximately) and does equal cost in lubricants, tires, etc. That means the airline flight saves about \$400 of oil consumption. Bluntly the airplane is environmentally better than the car! Oh, I know people would love to claim some other nonsense about their EV (electronic vehicle) but the cost is actually higher for the EV. They just pay their costs up front.

The environmentalists refuse to check their math too. When I was young in the 1960s the plants on earth were adsorbing  $3w/m^2$  on their leaves. The increased  $CO_2$  has increased this to  $27w/m^2$ . The reality is the very best thing environmentally was adding  $CO_2$  to the Atmosphere! The supposed uptake of heat of  $1.5^\circ C$  by  $CO_2$  which is a fake number, actually is a drop of nearly  $0.15^\circ C$  by the uptake by plants. These people never tell you the whole story. Our world is far better off than their "Eden" of a world without industry and fossil fuels. That "Eden" never existed and was more like a hell. Funny how the biggest advocates of some delusional "Eden" are the atheistic among us who are against religious faith and the bible.

Nothing these people tell you is the truth. You can check back over 50 years now. Not one of their predictions has come true. In fact most of their predictions were so bad you would have been better off believing the opposite. They break the rule that a stopped clock is right twice a day. They are like a stopped digital clock. They show nothing right ever.

BONUS!

I first visited this place in 1969! The actual main aquarium was right on the beach. Now they have constructions further out. This place was never more than a foot or so above high tide! It still isn't. Another example of NOAA lies!

**EARTH CHANGES – ENVIRONMENTAL CHANGES**

All the people of all the populations are being told that we are damaging the atmosphere causing global warming when the heating is unfolding at and from the core of Earth. Yes, down there – not up there!

During the second half of the 20<sup>th</sup> century (1950s onwards) there have been increases, if not surges, of energy received by our Sun from the core of the Universe. The Sun has transmitted this increased energy outwards and it has been received into the core of all the planets within our local solar system. In turn this increased energy has slightly increased the internal rotation of Earth's core bringing about surface tension, warming from underneath and significant changes in the pattern of weather events, earthquakes, volcanic activity (mainly under the oceans) and changes in our environments.

Yes, we need to reduce our polluting of Earth and also find and adopt alternative energy systems as the burning of combustible fuel is depleting a very finite supply of fossil fuels. But the changes in the ocean levels is not man made. The rotation of the core is spreading the oceanic tectonic plates thus some islands are rising and some are subsiding.

## How have atmospheric CO<sub>2</sub> levels varied over time, and how does this relate to the burning of fossil fuels?

[https://www.quora.com/How-have-atmospheric-CO<sub>2</sub>-levels-varied-over-time-and-how-does-this-relate-to-the-burning-of-fossil-fuels](https://www.quora.com/How-have-atmospheric-CO2-levels-varied-over-time-and-how-does-this-relate-to-the-burning-of-fossil-fuels)

Paul Noel: OK, let's start with coal. Coal is fossil trees and plants from a long time ago. Any CO<sub>2</sub> locked up in coal is when burned merely releasing CO<sub>2</sub> that was in the air long ago. It clearly is no hazard no matter what coal we burn because the CO<sub>2</sub> already was in the air and frankly based upon the coal it was one of the best times for life on Earth ever. In short the experiment of effects of CO<sub>2</sub> has already been run and it doesn't run away and it doesn't have "tipping points". Best evidence is that CO<sub>2</sub> was up near 1% of the atmosphere. We know this from the stomata (breathing holes) in the fossil plants. Plants get fewer stomata when CO<sub>2</sub> is higher. So let's see what increasing CO<sub>2</sub> does for the life on Earth.

**Trees Grow Much Faster at Higher Levels of CO<sub>2</sub>**

Just increasing the CO<sub>2</sub> by about 2 times the current level made the tree on the right grow nearly 8 times faster and healthier. Current (AMB sign) is

420 ppm or 0.042%. The higher level on the right is 0.087% CO<sub>2</sub>. Hardly 1% for sure! Current CO<sub>2</sub> levels are just about 4% of the high level they have been in the past. This high level did not cause any ecological emergency or a climate emergency.

Now as to oil and natural gas. There is excellent evidence that oil and natural gas have both organic and inorganic history. The organic oil and gas is in the same place as coal. The inorganic oil and gas will come up whether or not we drill it and the choice is if we get the energy or not. I side with getting the energy. The chemical precedents methane and crude oil that are not organic are the chemical source of the atmosphere and the ocean water on Earth. So we can neither control them nor can we influence their action on this Earth. All we can do is use them.

Typical Greenhouse operators (large scale) put CO<sub>2</sub> generators in their greenhouses for exactly the reason you see demonstrated in the picture. It would be amazing if the truth gets out and people see what actually is going on. Those arguing that CO<sub>2</sub> is pollution have no idea what they are talking about. They are frankly misguided with assumption riddled indoctrination. Nobody should be in the slightest concerned of CO<sub>2</sub> being released as long as the location has a good wind blowing and making sure it doesn't accumulate excessively.

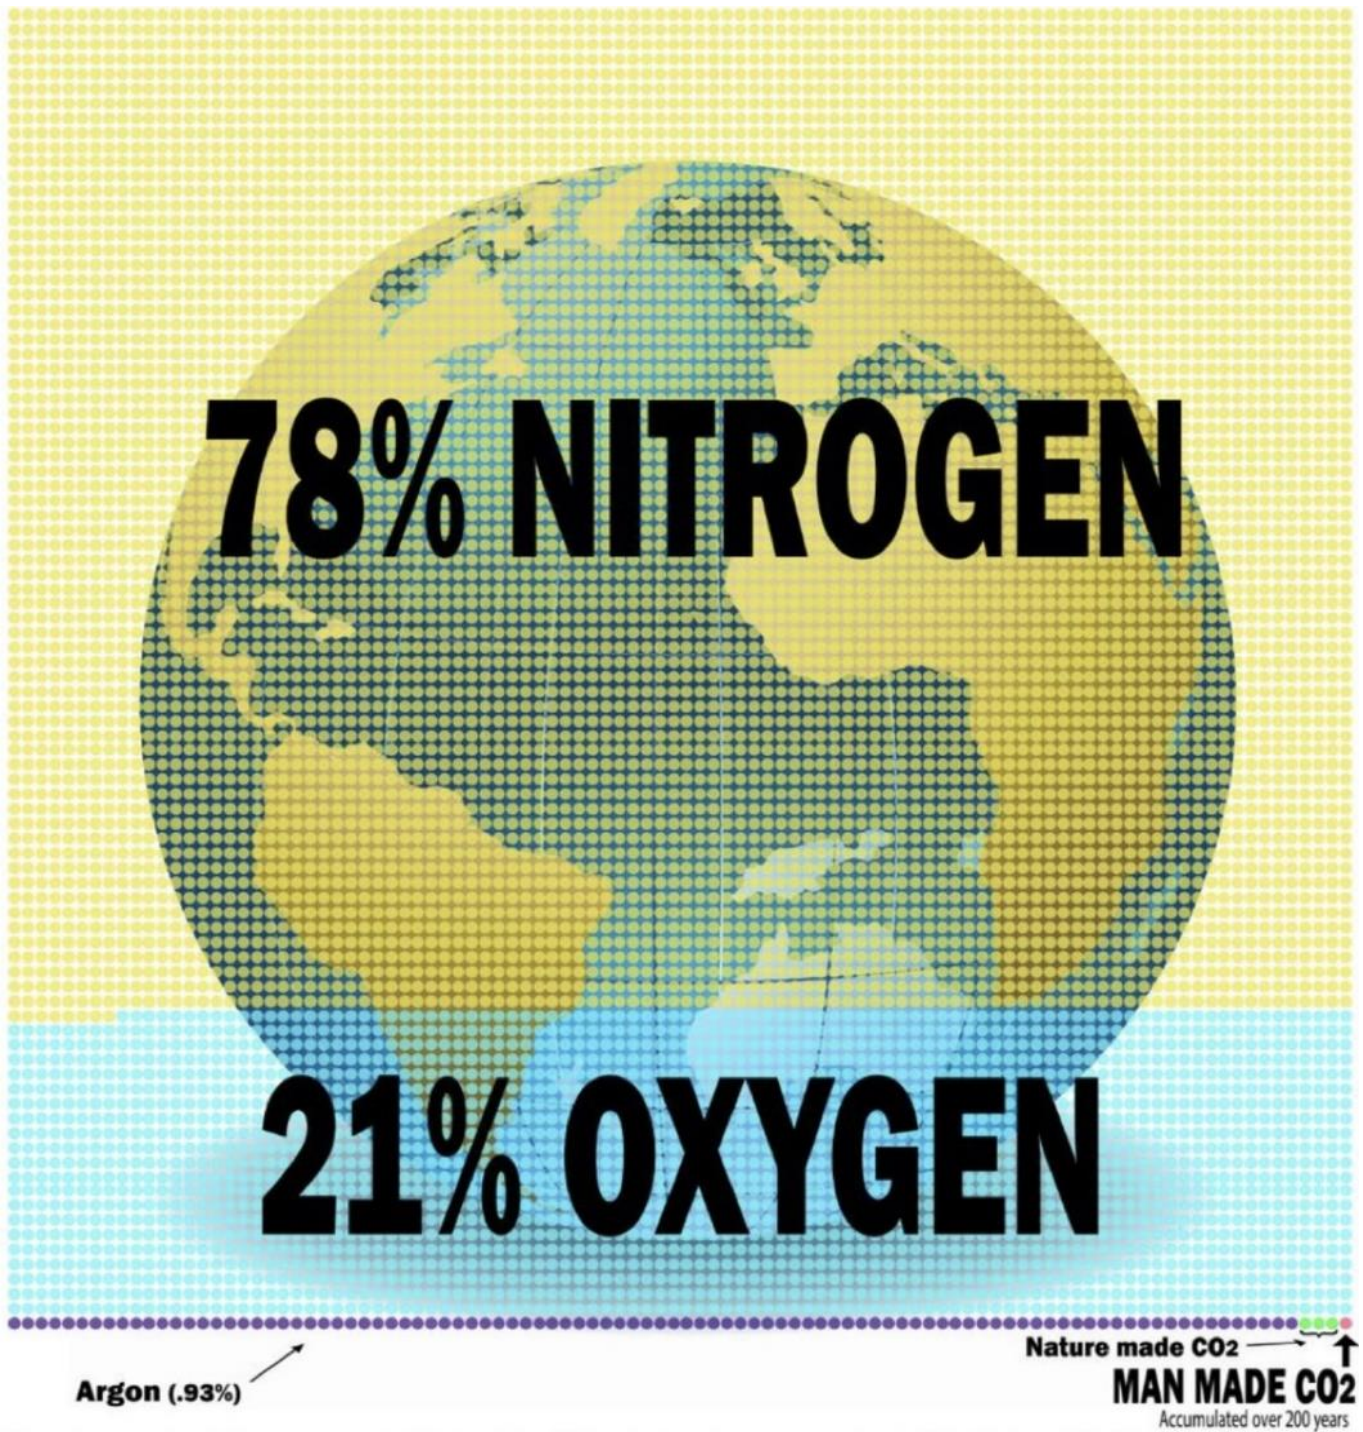

The above graphic representation of Earth's atmosphere reveals in the lower right hand corner that the accumulated carbon dioxide from man's activities, i.e. the burning of fossil fuels over the last 200 years, amounts to only 1.25 parts per 10,000. This 1 dot out of 10,000 illustrates that the amount of man made CO<sub>2</sub> in our atmosphere is much too small to cause the imagined catastrophes attributed to it.

The earth's temperature in each of the last four interglacial periods was several degrees warmer than today. (chart reads left to right)

Reconstructed global temperature over the past 420,000 years based on the Vostok ice core from the Antarctica (Petit et al. 2001)

## CLIMATE CHANGE is ALWAYS UNFOLDING!

While there is ice on Earth's poles then we are in an ice age.

A 1.000% level of carbon dioxide CO<sup>2</sup> in the atmosphere could be considered 'normal and acceptable' – that is what many greenhouse operators strive for. Around the 1950s, CO<sup>2</sup> levels were at around 0.034%. Should they had continued to fall, then at 0.025% plants are unable to seed and any lower we have worldwide famine! As CO<sup>2</sup> levels have fortunately recovered to 0.042% (still at 1/25 of preferred levels) global crop yields have recovered to around 300% of the 1950s yields!

CO<sup>2</sup> is NOT a 'greenhouse' gas, it is to contributing to 'global warming. It is actually very marginally cooling the planet due to worldwide increased vegetation.

The transfer of the weight of moving ice is not changing sea levels. The continental / tectonic plates all float on liquid magna thus they adjust up and down as weight transfers – just like when ships come into port do not move the water levels.

The Sun does it all. The Sun's projected energy is received into the CORE of Earth and since the 1950s the increased energy within the core of Earth has naturally changed weather patterns globally. This is all cyclical and it is arrogant to consider that man has influenced any of this OR can influence any direction these events are going to take.

We all have been indoctrinated with vast amounts erroneous suppressive untruths which underpin the psychic barriers to humanity's evolutionary growth which we are now to put aside and progress from. The suppressive controls imposed upon all of humanity at all levels is to be exposed and dismantled. # Relative Sea Level Trend 9439040 Astoria, Oregon

**What is the limit to how much carbon dioxide can be added to Earth's atmosphere before it causes runaway global warming?**

<https://www.quora.com/profile/James-Matkin>

31 March 2023

James G. (Jim) Matkin, Q.C. Vancouver retired lawyer.

First, carbon dioxide is not the control knob of the earth's warming or cooling. CO<sup>2</sup> is only a trace gas that is vital in the photosynthesis of plant food, converting sunlight into energy.

Further, the amount of CO<sup>2</sup> added to the atmosphere in the past has, by a factor of 10x, far exceeded today. It takes just one historical graph comparing today at 400 ppm with > 6000 ppm in the past and evidence of no correlation between CO<sup>2</sup> and temperature.

*“It is axiomatic that correlation is not proof of causation, but a lack of correlation is disproof. It takes just one climate graph showing the lack of correlation of Co2 with temperature to put the radical denial of natural variation (anthropogenic global warming) in the grave!”*

**NOTE:** What can be correlated with very low levels of CO<sup>2</sup> in the atmosphere is worldwide famine. Should have the CO<sup>2</sup> levels diminished much further than they have recently been than global starvation and mass death would have unfolded. Fortunately the slight increases in the levels of atmospheric CO<sup>2</sup> have supported increases in crop yields well in excess of population growth. We were fast approaching a global disaster in worldwide food shortages.

**FURTHER:** Dinosaurs died out due to starvation. Note the period 300 million years ago when CO<sup>2</sup> was at critical low levels for vegetation to fruit and survive. However, it was when CO<sup>2</sup> levels were below 1% that about 65 million years ago dinosaurs starved and died out in both hemispheres – extinction being the consequence of a large meteor AND various pole shifts. However, consider the predicament that humanity has now just avoided. The increase of CO<sup>2</sup> in the atmosphere from about 320 ppm (0.032%) to 420 ppm (0.042%) has raised the efficiency of our crops and trees by about 300%. A 1% CO<sup>2</sup> level is still 25 times higher than today's CO<sup>2</sup> level.

### AN INCONVENIENT TRUTH

The inconvenient truth is that around every 12,000 to 13,000 years, our solar system, which includes planet Earth, experiences a pole shift and the Sun typically novas. That is, the magnetic field around Earth loses energy which causes the Earth's rotation to completely stop but the oceans still have momentum! The Sun novas, that is, it sheds its outer dust shell, showering the side of Earth facing the Sun with tektites. In the process of the nova, the side of the Earth facing the Sun receives enormous amounts of heat from the Sun thus evaporating hundreds of feet of the ocean surfaces that rises as steam into the atmosphere creating a moisture blanket around Earth, and consequently the whole of Earth is thrust into a deep ice age, as can be seen by the above temperature data. The magnetic field rebuilds with the Earth beginning to rotate in the opposite direction. This all unfolds over a few weeks. This is the inconvenient truth that governments worldwide are not sharing with their people.

### THICKNESS OF THE ICE SHEETS AT VARIOUS LOCATIONS 21,000 YEARS AGO COMPARED WITH MODERN SKYLINES

1 inch of water may produce 10 to 12 inches of snow.  
400 feet of water produces 1,220 to 1,460 metres of snow.  
Compaction to ice is air removal from snow over time.

### The Position of the Earth at the Time of the Reversal.

During the last reversal China was on the backside of the Earth when the dust shell hit. The Chinese Myths give us clues what they saw and what happened: “the **atmosphere is thick** and **human beings are choked**” “It is thought that when **dragons fight**, **fireballs fall to the ground** and a strong wind prevails in the heavens. When **dragon’s eggs hatch...**”

Thomas Gold explained the **small meteorite impacts** found on the Moon caused by these large tektites.

**Note:** Now you may understand why USA went to the Moon six times. The finding of tektites on the Moon’s surface was confirmation of a Sun nova event wherein the Sun sheds its dust shell which results in tektites showering all within our solar system with tektites, including Earth. A Sun nova event coincides with pole shifts. Moon landings being required in the researching of pole shift events on Earth.

### The Position of the Earth at the Time of the Reversal.

Exactly on the other side of the Earth, the northern hemisphere/ Europe and Africa gets the instant ice age. The ice age happens because of Boyles Law. The expanding atmosphere causes the temperature to drop fast to over 200+ degrees below zero.

**EARTH CHANGES – ENVIRONMENTAL CHANGES**

Monday, 17 December 2018

James: Hi Nanna Beth, I feel like a chat, is that all right with you?

Nanna Beth – 3<sup>rd</sup> Celestial Heaven, John's grandmother: Also you might like to know, the Earth itself is starting to change its rotation speed and is slightly moving on its axis, thereby causing shifts in surface weather patterns as warming and cooling takes effect, just happening in different places than how it has been. And these changes are coming from the core that's being affected by greater space changes. There is always massive pressures and forces affecting every part of natural creation, so the world and all space and all that's within it. And as David (Montaigne) points out, observers have observed that things remain the same. At least seem to be the same, although with minute incremental changes, all of which culminate to periodic, large swift changes. And so humanity is coming into a time of rapid change, and on all levels, not just the physical or spiritual. Of which I still can't say more.

So the debate about global warming or cooling will continue with both being right, as both are occurring. And in some areas they are affecting each other – in other areas they are happening independent of each other.

James: Thank you Nanna Beth, you've covered all I was wanting you to update.

Note: Energy is never destroyed!

**ENVIRONMENTAL CHANGES are from WITHIN and are not UNIFORM**

Consider that the increased rotation of the Earth's inner iron core is not creating a uniform increase in pressure and temperature on the surface of the planet. Thus ocean, land and air temperature increases can be twice the rate, or thereabouts, in places whereas other locations may be cooling. The agitation in the mixing bowl is not mixing the molten lava below the surface uniformly. Earth events will be typically more extreme at the points where the upwelling from the core are focused during this cyclical event. Humanity is to learn how to collaborate with nature – not control it!

**EARTH CHANGES – ENVIRONMENTAL CHANGES:**

27 September 2011

Extracts from 'With Verna – a Nature Spirit' by James Moncrief

Verna, a Nature Spirit: There's a marked increase in the 'goings on' inside Earth being brought about possibly by natural internal factors, factors extra-terrestrial, or a combination of both – even one in league with the other. And I'm going to speak about such things in more detail later. But for now, you and the people you've read who think along such lines are correct. There is much going on, both from within and without.

It's going to be a horrendous time for humanity overall. But that's not to say that within it there will be much good and lots of good feelings for some people, and mostly for those people wanting to move with it in the understanding that it's for humanity's good. And as it couldn't go on any longer how it was, so something needed to happen.

What is happening now is yet another evolutionary event. However it's not going to come about as it did back then. It's coming about as a combination of humanity's impact on the planet and natural events, timed to enhance humanity's impact. All so in the end, a 'new' humanity will result, willing and able to live on the world in a 'new' way. Back 65 million years ago it was purely a biological change. Now it's one all for humanity. A spiritual change for humanity as Mary (Magdalene) was telling you. A huge change, moving from living in a completely negative state, ending it, and moving to live in a completely positive one. And all along the way nature will be affected in various ways.

All that's to happen now is more to set the stage, or scene, for the 'new' humanity to evolve into being. That being on a spiritual level, rather than a whole new evolutionary line of creatures as it was with the demise of the reptile based nature, to the rise of the mammalian one. However, as I've already told you, some new creatures will come into being during the planetary ages to come, and others that have or will become extinct, will be brought back into being.

However, the coming Earth changes will have periods of intense activity right through this turning of the age and the next one of one thousand years. There will be ups and downs, but overall the next age will be one of ongoing tumultuous times for the surface of the planet. And it's all designed to keep humanity giving up its evilness and helping it seek the way of truth. There's not to be one big cataclysmic episode now, and then it's all peace and harmony on Earth, and people can get back to re-building all they've had – all their negative way of being and wrongness. Or even set about living in peace and harmony because of some dimensional change or new spiritual light and upliftment affecting the raising of humanity's consciousness to a higher level of peace, having giving up greed and self-indulgence in material things. No, all that is to come is not to let you off the hook or allow you to keep going only manifesting and so expressing yet another version of truth denial.

The spiritual upliftment so far as the new 'vibration' humanity will experience is the new vibe of the next age, and it's upliftment will only be uplifting those people who chose to do their healing, to submit to their bad feelings and by expressing them to uncover the truth of their evilness – all that resulted from their childhood. All the rest is nonsense perpetuated by ignorant mind spirits. Certainly there is new cosmic light coming to Urantia (Earth) from Paradise, being stepped down in universal harmony through Nebadon (our local universe of which Jesus and Mary are regents); and certainly there is new soul-light being emitted from every soul on the planet. But as to how people choose to react to all of that is a personal choice, and many will fight their natural desire to seek the truth and so heal themselves, choosing instead to keep going in their negative states. And for such people, some will be relatively successful at doing it and keeping abreast of the increasing 'lights', others won't be so successful, failing and then succumbing to their bad feelings. And many will go to their graves feeling very bad about life; other's will want to know why they

feel so bad so often and honour their bad feelings and start looking seriously for the truth. But overall, increasing inner and outer pressure will be brought to bear on humanity as it moves through the next age. A certain level of collective consciousness about its negative state, and a certain level of desire to heal humanity's evilness needs, both personally and collectively, to be achieved by the end of the next age; and as all things are perfect, it will be.

James: Okay, so back to the heart of the matter, the Earth changes.

Verna: Well, as you've read, the amount of seismic activity is on the increase, this being because the amount of rotation within the core of the Earth is speeding up. It's immeasurable currently to science, however as the core of Earth starts to move faster, so all the outer parts move faster, and that's stirring up the continental movement, which as you know from plate tectonics, is causing the crustal plates to grind against each other, with the stresses being released as earthquakes. And this core rotation is going to keep increasing for the next one thousand years.

James: Do you mean the whole Earth is spinning on its axis faster?

Verna: No, I mean the components of the core are in relation to each other, moving faster, which could be seen, as for the need of a mental picture, that the core is rotating faster. It's more to do with hidden forces within the planet, one's humanity is yet to uncover; and they are more to do with, and respond directly to, the spiritual or higher light frequencies.

James: So it's like the spiritual rotation of Earth is increasing.

Verna: Yes, you could say it like that, and it's then having a direct effect on the material level.

James: Okay, so it's all coming from inner levels, not just the physical.

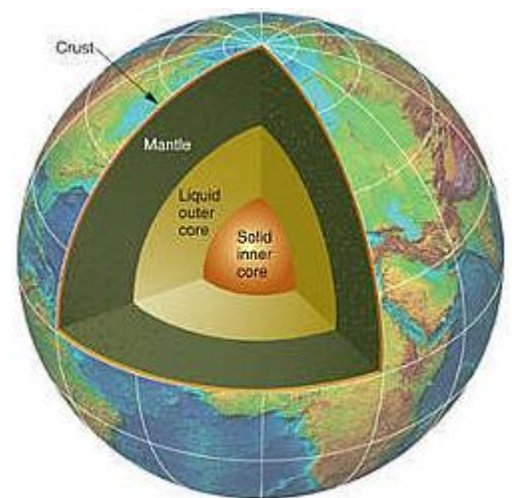

Verna: As does everything. The physical world, the globe as you know it, only responds to inner or more spiritual levels, it exists because of these levels, the whole physical level of creation does. From our spiritual perspective, we living in these higher or inner dimensions, we can see the energy, the light, we can sense it; we can sense it in all physical things; and we can sense or perceive – we 'feel it', as increasing in frequency. And so the physical planet is responding, it has to, it can't be otherwise.

James: So it's not just, say, because of what the sun is doing that's affecting the Earth?

Verna: That is happening too, it all being part of the physical relationship and interaction in those relationships. However the sun too is being driven, and so continuously affected, by the inner, unseen, and unknown to you, spiritual levels. You are only at best observing the physical level of Creation and trying to work out laws that determine it. However there is another whole plane or 'dimension' of laws that determine the relationship of the physical to the spiritual. And then even more laws determining the spiritual, and all the levels of the spiritual and there are many, all the way to Paradise.

James: Okay, so whatever is happening, we won't be able to detect, only possibly seeing signs of it on the physical that are resulting from the increase movements of the surface crustal plates.

Verna: Yes, the sea floor is spreading faster in places as the subsidence of one plate under another is increasing, all making for very exciting times on the face of the Earth, if that's what excites you.

I can tell you, those like me who are from the very old days, boy, did we have fun back then, we were delirious during those times of massive Earth changes. And there were some times of massive changes. All that Earth is to go through now will be comparatively mild, just a remnant taste of the old days. Relative to back then, the Earth is destined to remain quite stable. It will have one last massive bout of cataclysmic Earth changes reminiscent of the ancient times when it's all to come to an End and Cease to Be, but humanity will be long gone by then.

I was talking about the acceleration of the rotation of the core of the Earth, but on inner levels, and how that's what's causing all the shifting in the crustal plates. And so this is what will cause most of the earthquakes. Now from your geology days at university, you remember being told about 'hot spots' where the continental plates move over places where magma forces itself to the surface bringing about island chains and chains of continental volcanoes? Well there's going to be a lot more of these erupting as well, old and even ancient ones coming to life again.

James: One website I visit posts up-to-date information on the status of many volcanos, and many of them are coming to life, and have been for a few years. Even ones scientists didn't know existed.

Verna: Yes, and this is going to increase. There are going to be a few mega explosive events during the next fifty years. Some that will cause the sun's rays to be blocked out for a number of days, but nothing too bad. However, there will be continuous smaller eruptions and many of them all disturbing the normal way of things, such as air flights, communications, and causing many people to be relocated. It's not so much the intensity of the volcanic eruptions that are to come, but how many of them and what combined effect they will have. A lot of new lava is going to come out onto the surface, this having a heating effect adding to the general present consensus of global warming.

James: So is global warming a reality, or is it our imagination; and is it something humanity is doing, or is it naturally happening?

Verna: It's naturally happening. However, overall the planet is moving toward another smaller ice age, but that's a long way off. In the short term it will warm significantly adding to humanity's problems, once all the volcanic activity gets going.

Along with the increase in volcanic events it will be discovered that the ambient temperature of the upper crust is also warming, the ground will warm up a little. **We're only talking about one degree**, but it will add to the problems of increasing the ocean temperatures, rainfall distribution, melting the ice at the poles and how and where food will be grown.

James: I was reading whereby all of this is coming about because of the breaking down of Earth's magnetic field, all leading to a pole reversal. This all being caused by the sun moving towards a solar maximum in the next couple of years.

Verna: It's all part and parcel of it. Scientists will continue to understand all that's taking place on many physical levels as events unfold. But really, it's all being caused by the increasing spiritual light that's driving the whole thing right through Nebadon. It's not just Earth and your sun that's being affected. On all worlds, ages are changing and spirits are moving on, and things are happening. You're just one piece

in the whole.

So because of these warming influences, the weather will become more wild, more subject to change, and more unpredictable. There will be more drought and heat, rain and snow, even cold extremes in some parts of the world, and less in others. There will be more wild storms in some places, cyclones and such, and less wildness in other places. Things will pretty much change all over the place as to how they have been. And some changes will become permanent, other's fluctuating.

And because of these weather disturbances, so the production of food will change; in some areas of the world severe famine and food shortages will occur, in other places pests and disease will predominate. You've seen all of these things already beginning to happen, and they are only going to happen more and become more intense.

And then come the physical Earth changes, not only from volcanic eruptions, but from the influence of large earthquakes.

### Vulcanology:

28 September 2011

James: So what's happening to the Earth where the magma is? I mean how does it build up in pressure to come out?

Verna, Nature Spirit: It's a combination of internal Earth forces and external cosmic rays. They both interact to produce what might be likened to bringing a pot of water to the boil. The more internal pressure that builds, the stronger and more vigorous it boils escaping on the surface. The Earth has been relatively cool of late, meaning there's only a very light boiling going on, with most of the pent up pressure and energy able to be released through what has been witnessed. Some occasionally doing a lot of damage, other times, not so much. But the Earth has been going through a very quiet time of vulcanology. However, that's all soon to change as it warms up into one of its more active times. But as I said, not so active as in times gone by, but certainly more active than what's happened during this past two thousand years.

James: So the letting off steam, the increased boiling will keep happening for... how long?

Verna: It will keep building up during the next ten years, then it will plateau for the next twenty, then start to settle down. But within these years there will be times of greater and less intensity. You must remember

that things happen relatively slowly on a geological time period. So this time will be but a hiccup in the great scheme of things, but enough to give humanity the experiences it requires to keep the pressure on it to change. You don't have to worry about it starting with a rush then petering out. The inner forces that are going to bring about all the structural crustal change will last for as long as they need to.

Global-mean temperature composites

**WEATHER EVENTS, EARTH CHANGES – ENVIRONMENTAL CHANGES are CYCICAL:**

The Richard Messages via James Reid: Celestial Spirit Richard

12 January 2013

There are many factors involved in the production of weather patterns on the planet. If you had information from a much longer period time than that available, you would see that such happenings are not uncommon or unusual. The scientists have developed a range of normal that is based on quite scanty data. So, while a relatively short-range view is taken of these elements, there must be varying opinions. The Earth is presently in a state of marked changes so there will be fluctuations and deviation from many 'normal' patterns. The present changes are much more related to what is happening deep within the planet than to manmade issues on the surface. However, people will always attempt to interpret any happening in the light of what is considered to be known and to use familiar terms.

# COSMOS – plasma, electric universe

Gareth Samuel: Seeing Precession Differently | Space News

<https://www.youtube.com/watch?v=mdLxP-w1LGg>

**Star takes 550,000 years to complete one orbit around Arcturus, every 25,000 years we complete one rotation around Sirius filament Star being Earth's Sun.**

Galaxies are linked by cosmic filaments. These filaments connect galaxies across unfathomable distances which have been found both magnetised and to emit electromagnetic radiation.

Vast networks of filaments that connect electrical objects across all scales of the cosmos. It is from these filamentary networks that stars are formed eventually making up the Catherine wheel galaxies. Giant plasma filaments connect super clusters across vast distances.

It is these twisted filaments that form like DNA helical strands that celestial bodies are connected and their pathways defined.

Twisted filament pairs have their equivalent celestial bodies. Earth's Sun has Sirius. They rotate around each other requiring a 25,000 year cycle. During such cycles there are two disruptive events that bring about very significant disturbances to the Sun and its planets. The last 'pole-shift' event was extreme, the interim and next event is anticipated to be milder – whatever that is!

The Earth / Sirius rotation around Arcturus takes 550,000 years. A

further, larger cyclical event requires 4.5 million years. The rotation around Pleiades requires 26 million years to complete.

Thus, nothing is moving in a straight line, the precession is in balance with each element rotating around a larger element, all following huge plasma, electric filaments.

**Spirits and Angels**

The Urantia Book (TUB):  
(159.4) 14:5.8

Monotony is indicative of immaturity of the creative imagination and inactivity of intellectual co-ordination with the spiritual endowment. By the time an ascendant mortal begins the exploration of these heavenly worlds, he (and she) has already attained emotional, intellectual, and social, if not spiritual, maturity.

(159.5) 14:5.9 Not only will you find undreamed-of changes confronting you as you advance from circuit to circuit in Havona, but your astonishment will be inexpressible as you progress from planet to planet within each circuit. Each of these billion study worlds is a veritable university of surprises. Continuing astonishment, unending wonder, is the experience of those who traverse these circuits and tour these gigantic spheres. Monotony is not a part of the Havona career.

(159.6) 14:5.10 Love of adventure, curiosity, and dread of monotony — these traits inherent in evolving human nature — were not put there just to aggravate and annoy you during your short sojourn on Earth, but rather to suggest to you that death is only the beginning of an endless career of adventure, an everlasting life of anticipation, an eternal voyage of discovery.

Transporter Seraphim – angels and spirits move great distances by utilising energy lines. What is now being discerned in the physical also may be representative of what prevails within the spirit realms.

Does Gobekli Tepe commemorate a comet strike that caused the Younger Dryas?

<https://www.quora.com/#ZLGIy>

The Younger Dryas was a sudden, mini ice age that started around 12,800 years ago. Although it only lasted ~1200 years, it dropped temperatures precipitously, in some areas by more than 10 degrees F in a matter of decades. The time frame also coincides with some megafauna die offs.

There is HUGE debate over the cause of the cooling, with most believing it was due to either:

- 1) A comet strike, or
- 2) The sudden draining of vast quantities of fresh water from glacial Lake Agassiz.

Researchers backing theory #1 include Moore et al. (2020) who document extreme melt temperatures, nanodiamonds, and meteoritic trace elements in a 12,800-year-old event that destroyed a village in present-day Syria. They and others have cited platinum, iridium and nanodiamonds spikes in sediments and ice cores of that age from around the world as evidence of an extraterrestrial impact. Other recently published research suggests images at Gobekli Tepe (the world's oldest temple) may document the comet swarms. One can imagine that nearby comet strikes which destroyed villages and dramatically changed the climate likely stirred people to try to appease the spirits in many different ways. Made 6000 years before Stonehenge, carvings on the massive Vulture Stone at Gobekli Tepe show different animals in odd positions around the stone.

These positions may represent constellations at the time that the comet swarm struck. If this turns out to be factual, it's not only AMAZING, it represents one of the oldest recorded astronomical observations ever. And it may help explain why Gobekli Tepe was built in the first place.

Here's the article

**LIGHT OF TRUTH**

## Ancient Carvings Show Evidence of a Comet Swarm Hitting Earth Around 13,000 Years Ago

<https://www.sciencealert.com/ancient-carvings-in-turkey-show-a-comet-hitting-earth-changing-civilisation-forever>

Humans by Fiona MacDonald

1 May 2019

Researchers have translated famous ancient symbols in a temple in Turkey, and they tell the story of a devastating comet impact more than 13,000 years ago.

Cross-checking the event with computer simulations of the Solar System around that time, researchers in 2017 suggested that the carvings could describe a comet impact that occurred around 10,950 BCE – about the same time a mini ice age started that changed civilisation forever.

This mini ice age, known as the Younger Dryas, lasted around 1,000 years, and it's considered a crucial period for humanity because it was around that time agriculture and the first Neolithic civilisations arose – potentially in response to the new colder climates. The period has also been linked to the extinction of the woolly mammoth.

In the last few years, some scientists have put forward a controversial hypothesis arguing that one or more comets slammed into North America some 12,900 years ago, causing the mass extinction of woolly mammoth elephants and other large mammals.

But although the Younger Dryas has been thoroughly studied, it's not clear exactly what triggered the period. A comet strike is one of the leading hypotheses, but scientists haven't been able to find physical proof of comets from around that time.

The team from the University of Edinburgh in the UK say these carvings, found in what's believed to be the world's oldest known temple, Gobekli Tepe in southern Turkey, show further evidence that a comet triggered the Younger Dryas.

"I think this research, along with the recent finding of a widespread platinum anomaly across the North American continent virtually seal the case in favour of [a Younger Dryas comet impact]," lead researcher Martin Sweatman told Sarah Knapton from *The Telegraph* at the time.

"Our work serves to reinforce that physical evidence. What is happening here is the process of paradigm change."

The translation of the symbols also suggests that Gobekli Tepe wasn't just another temple, as long assumed – it might have also been an ancient observatory.

"It appears Gobekli Tepe was, among other things, an observatory for monitoring the night sky," Sweatman told the Press Association.

"One of its pillars seems to have served as a memorial to this devastating event – probably the worst day in history since the end of the Ice Age."

The Gobekli Tepe is thought to have been built around 9,000 BCE – roughly 6,000 years before Stonehenge – but the symbols on the pillar date the event to around 2,000 years before that.

The carvings were found on a pillar known as the Vulture Stone (pictured below) and show different animals in specific positions around the stone.

Alistair Coombs

The symbols had long puzzled scientists, but Sweatman and his team of engineers discovered that they actually corresponded to astronomical constellations, and showed a swarm of comet fragments hitting the Earth.

An image of a headless man on the stone is also thought to symbolise human disaster and extensive loss of life following the impact.

The carvings show signs of being cared for by the people of Gobekli Tepe for millennia, which indicates that the event they describe might have had long-lasting impacts on civilisation.

To try to figure out whether that comet strike actually happened or not, the researchers used computer models to match the patterns of the stars detailed on the Vulture Stone to a specific date – and they found evidence that the event in question would have occurred about 10,950 BCE, give or take 250 years.

Here's what the researchers suggest the sky would have looked like back then.

Martin Sweatman and Stellarium

The dating of these carvings also matches an ice core taken from Greenland, which pinpoints the Younger Dryas period as beginning around 10,890 BCE.

According to Sweatman, this isn't the first time ancient archaeology has provided insight into civilisation's past.

"Many paleolithic cave paintings and artefacts with similar animal symbols and other repeated symbols suggest astronomy could be very ancient indeed," he told The Telegraph.

"If you consider that, according to astronomers, this giant comet probably arrived in the inner solar system some 20 to 30 thousand years ago, and it would have been a very visible and dominant feature of the night sky, it is hard to see how ancient people could have ignored this given the likely consequences."

The research was published in *Mediterranean Archaeology and Archaeometry*.

*A version of this story was first published in April 2017.*

**Why is the engineering aspect of climate change not considered? Surely if a cloud of greenhouse gas heats Earth then more greenhouse gasses would be released and we'd have a positive feedback loop and by consequence wouldn't Earth be extinct.**

<https://www.quora.com/Why-is-the-engineering-aspect-of-climate-change-not-considered-Surely-if-a-cloud-of-greenhouse-gas-heats-Earth-then-more-greenhouse-gasses-would-be-released-and-wed-have-a-positive-feedback-loop-and-by-consequence>

Paul Noel – BS in Bachelor of Science in Computer Science, Athens State University, graduated 1999, former research scientist 6 level 2 UAH 2008-2014.

You are correct negative feedback loops are necessary for life to exist. Positive feedback loops are cursed to death.

Now let's be clear here. Geologically we know very solidly that the Earth had CO<sup>2</sup> levels in the past periods of maximum life on Earth that approached 1% of the atmosphere. During those times plant and animal life did amazingly well. The vast reefs of limestone, dolomite and coal in the world evidence these facts. The fact of what I am saying is well illustrated by this picture.

I took this picture myself and annotated it. It is of a rock quarry about 3 miles west of Scottsboro Alabama on US Highway 72. The coal vein is about 8 feet deep (2.4 metres). Coal is not at all unusual in my area. Most of it is not mined due to high sulfur content. Be clear this is Bituminous Coal and consists of bark of trees that lived during the period of this deposition approximately.

Under that coal vein was what the mine was built for. Literally to mine the limestone. Limestone exists for about 7,000 feet deep beneath the top of this mountain. The floor of the quarry is about 620 feet above sea level (approximately). In Huntsville Alabama a pit owned by Vulcan Materials mines this rock at levels to about 200 feet below MSL. The limestone deposits in this area are beyond belief and of major economic value. Within about 40 miles of my house in the area is mined about US\$8 Billion a year. This by comparison is about 9 times the value of annual production at the 2nd largest copper mine on Earth. I suppose you might like the comparison. The amount of carbon dioxide sequestered in these such deposits on Earth represents about 99.9% of all the CO<sup>2</sup> that was even in the Atmosphere on Earth.

If all of the fossil fuels on Earth in all deposits were burned it is unlikely that more than 2% of the original CO<sup>2</sup> content could be returned to the atmosphere.

Now this is all being told to you for the simple and obvious conclusion that not only does this positive feedback loop you propose not exist, the experiment has been run by the Earth to test this fact. There is no positive feedback loop. The earth doesn't over heat.

What does happen with more CO<sup>2</sup> can only be described as an amazing blessing. We actually have excellent data on this you see greenhouse operators in the world have a great deal of experience in supplementing the growth of plants with CO<sup>2</sup>. It is amazing.

Slightly more than double the current CO<sup>2</sup> concentration has raised the tree on the right with more than 8 times the volumetric growth. It is very important as an engineer you understand how this effect works.

You see plants spend a very massive amount of their life energy pumping water into their bodies to make their life work. To do photosynthesis they must breathe in (passively)  $\text{CO}_2$ . This is done by opening little openings called stomata on the bottom of their leaves. With these openings exposed water evaporates endangering the plant. Plants as a result trade water for  $\text{CO}_2$ . **The increase of  $\text{CO}_2$  in the atmosphere from about 320 ppm (0.032%) to 420 ppm (0.042%) has raised the efficiency of our crops and trees by about 300%.** To be plain the  $\text{CO}_2$  is an amazing blessing.

Now aside from the massive deposits of Limestone, Dolomite and Coal which are fossil deposits they contain the stomata evidence allowing us to count the  $\text{CO}_2$  concentration at the time. Plants make fewer stomata in higher  $\text{CO}_2$  atmospheres. Counting the frequency of such tells us very accurately the  $\text{CO}_2$  concentration at the time the coal formed. We have the fossil carbonised leaves to tell us.

Your asking for the engineering realities here is appropriate. Your remarks on feedback loops is appropriate. Bluntly there are no positive feedback loops in the climate. The system is self-regulating and negative feedback controlled. We have data from test conditions in excess of any conditions imaginable at this time. The Earth did the experiment for us. The evidence is a massive explosion of life such as to make what you see today appear to be a dead lifeless planet by comparison. Shall I say unless people reading this did not get this clear, that mountain in my picture is but a tiny pile of fossils from all that life. Where I live there is so much of these fossils no person alive could imagine such a lush and wonderful world and today we have environmentalist wackos running about trying to preserve essentially a dead lifeless planet as opposed to a living growing one.

Following a Sun nova / pole shift event, the radiation of heat from the Sun requires the rebuilding of the dust shell around the Sun and consequently there is an extended 'cold' era on Earth.

THE  
**GREATEST**  
**SHOW**  
 is ON EARTH

### CORONA SHELL of the SUN – SUN NOVA event:

The Sun's corona is the outermost part of the Sun's atmosphere. Our Sun is surrounded by a jacket of gases called an atmosphere. The **corona** is the outermost part of the Sun's atmosphere.

The corona reaches extremely high temperatures. The Sun is around 6,000°C whereas the corona, the outermost shell of the Sun is around 1,000,000°C.

You could consider this outdoor gas heater with the blue light coming from the inner burner ring as the Sun at 6,000°C whereas the out shell being that for the Sun is 1,000,000°C.

Typically, when the pole shift cycle unfolds throughout a solar system, the corona around the Sun may be 'blown' off.

Such a nova event by the Sun showers the side of Earth facing it with Tektites. As such pole shift events unfold cyclically around every 12,500 years, there are many regions of Earth that Tektites can be found.

**Sun ejects its material shell between every 12,000 and 13,000 years. This nova heatwave hits one side of Earth, evaporating oceans and lowering their levels by around 400 feet (120 metres).**

**The ejected material shell arrives raining tektites / meteors upon Earth on the far side from the heat wave.**

**While the material shell rebuilds around the Sun, there is no warmth generated during these 11 to 22 years. The massive amount of moisture in Earth's atmosphere generates an instant ice-age. The regions between the tropics, or 15° - 28° degrees latitude either side of the equator, away from earthquake zones, are possible survival regions.**

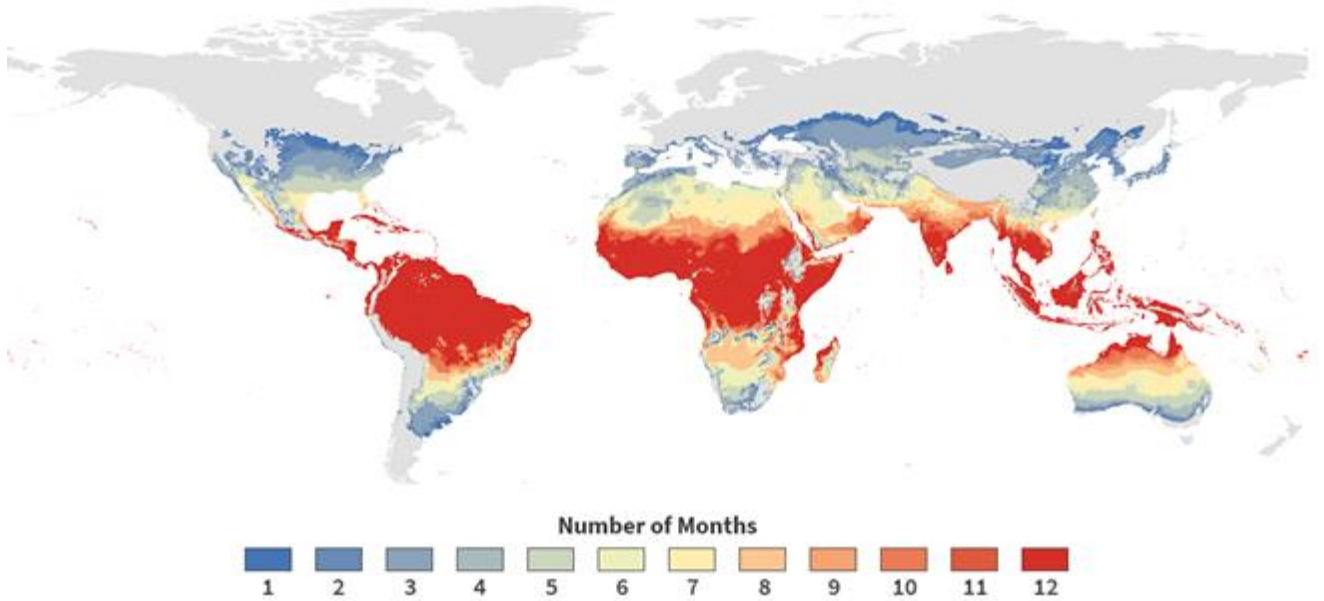

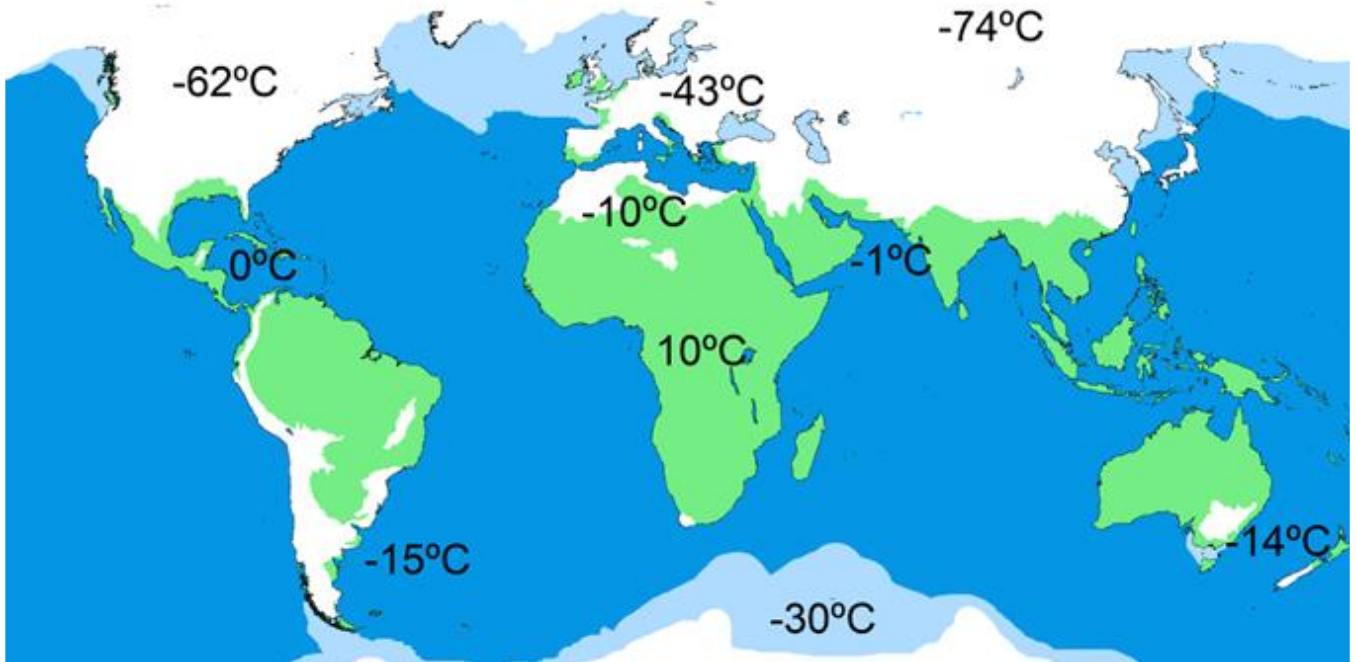

The changes in the weather patterns and environmental changes are cyclical. What the pathway is we do not know!

Later this century, or sometime, "mini" ice age prediction / expectation:

at regular intervals!		Atlantis frozen over		

## EARTH CHANGES

Larger civilisations have previously existed on Earth, with elements more advanced in some ways than Earth’s civilisation of today – in the year 2021!

Populations have been routinely reduced by earth changes to smaller numbers. Post earth change events typically require surviving populations having to restart from ground zero.

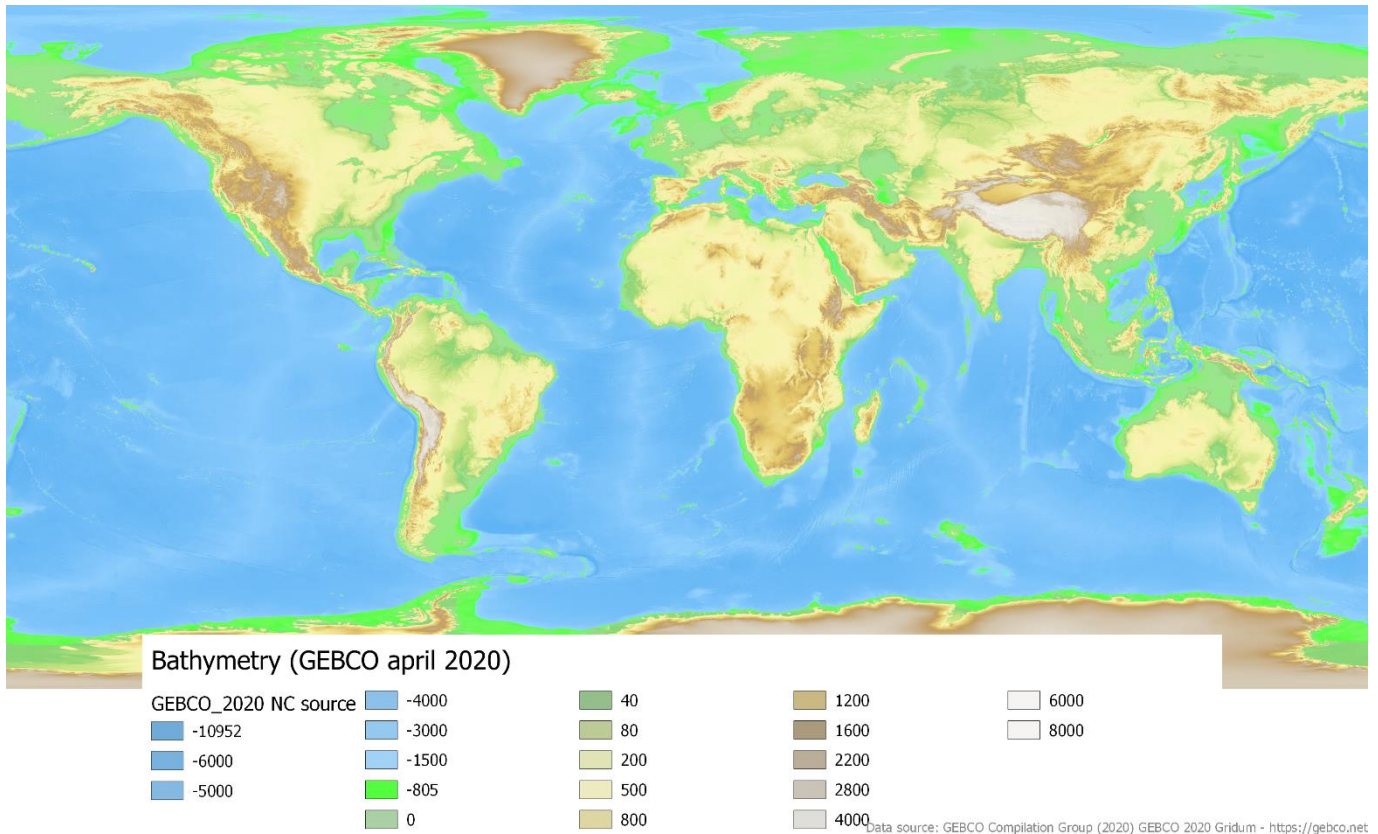

SACRED and INSPIRED WRITINGS sets, each of about 10,000 tablets, were carried from Mu (Lemuria), these were then located at: Tibet, Deccan Plateau in central India, Gobi Desert in Central China, Upper Egypt, Babylon in Mesopotamia and Mexico City. Further copies of each of these original sets were further made. The foundations of Buddhism are remnants of the mind controlling practices of the Atlanteans! The books accredited to Moses are his translations of writings on clay tablets brought from Lemuria to Egypt. Thus it can be seen that the immigration from Lemuria going west cross over with the Atlanteans going east. Remnants of prior civilisations spiritual systems have been the foundations of new ways and beliefs – all taking humanity deeper into the mind, away from feelings and away from our Heavenly Mother and Father.

Following each earth change, humanity has gone deeper into the Rebellion and Default. Spiritual platforms have been passed down through many civilisations. Clay tablets have survived cataclysmic earth changes with researchers re-introducing remnants in later times with further imposts infused by mind Mansion World spirits all in keeping with Lucifer’s rebellious dictates. As from 31 January 2018 we can now go upon the pathway of healing the Rebellion and Default within each of us through Living Feelings First and with Divine Love, embrace our Soul Healing.

## What would the world look like if the ocean levels decreased by half a mile?

All the very green areas on the map will be former sea bottom.

<https://www.quora.com/Is-it-true-that-about-13000-years-ago-sea-level-was-about-100-meters-lower>

Sea level was at its minimum at 20–27,000 years ago at 120–130 m (390–400 ft). This was determined by drilling in Barbados measuring “fossil sunshine” in the form of *Acropora palmata*, the elk horn coral that only grows in framework position in water depths of 0–5 m. The change in sea level at Barbados is 120 m. Based on this, modeling suggests that Global Mean Sea Level was 127 m below present (Peltier and Fairbanks, 2006). Drilling of less accurate sea-level markers in Tahiti, Sunda Shelf, and elsewhere are consistent with this estimate.

13,000 years ago sea level was 64 m (210 ft) below present.

The glacial cycle averages 90,000 years. Global sea level rises and falls 195 metres in each cycle. At the low temperature end of the cycle, at the end of the cold phase of the cycle, much of the planet’s water is bound up in the polar icecaps - which in the northern hemisphere extend down to London. At the high temperature end of the cycle after the heat phase completes, sea level is 195 metres higher, since almost all of the polar icecaps have gone. (Search: ‘glacial event’, ‘Milankovitch cycles’.)

The last glacial trough (low temperature point) was 20,000 years ago, the sea level was 125 metres lower than today, and there was a land bridge between Britain and the continent.

**A massive cooling puts an enormous amount of moisture into the atmosphere following the Sun nova and the consequence is snow of enormous amounts, thus the sea levels drop.**

Unprecedented climate change has caused sea level at Sydney Harbour to rise approximately 0.0 cm over the past 140 years.

### Is the level of CO<sub>2</sub> in the atmosphere rising?

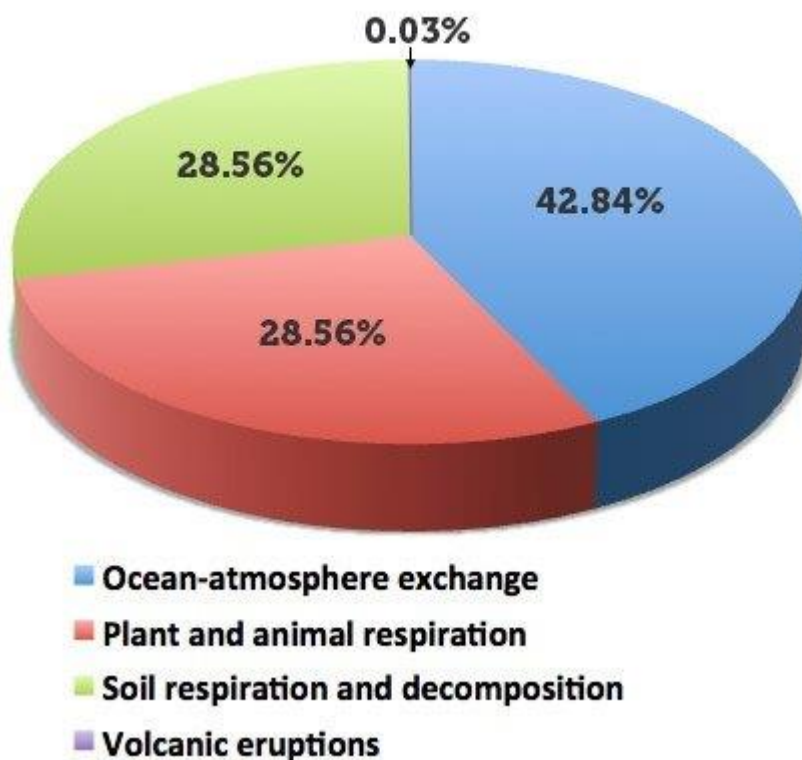

<https://www.quora.com/Is-the-level-of-CO2-in-the-atmosphere-rising>

I'm not sure if this is a baiting question or not because every citizen on this planet from grade 1 on has been inundated with the Climate Change message blaming humans for warming the planet by raising the level of CO<sub>2</sub> in the Atmosphere. Humans have not yet been granted a reprieve and we are still under attack so yes CO<sub>2</sub> levels keep rising.

The fact that your bills you need to pay just to stay alive have gone up non-stop for years is due to the Climate Change© agenda. The attack on our main sources of energy are causing the rising price of energy to modify our global socio-economic structure. This is all by design, this is climate change in action.

The oceans on this planet contain 45 times more CO<sub>2</sub> than the atmosphere. Any small change to the oceans will cause a major change in the atmosphere. The oceans release CO<sub>2</sub> from solution when the temperature rises. The vast majority of the CO<sub>2</sub> in the atmosphere is of natural origin.

## Natural Sources of CO<sub>2</sub>

Note this CO<sub>2</sub> plot below and its ragged stairstep pattern. These are annual variations in the level of CO<sub>2</sub>. They equal approx. 7ppm from peak to valley. They are caused by the difference in the rate of decomposition of plants between the northern and southern hemispheres. The north has basically double the land mass as the south so CO<sub>2</sub> levels go up in the northern winters and down in the southern winters.

Temperatures on the planet dropped from the 40's until the 80's then rose again. The pandemic years of 20 and 21 dropped the amount of man made CO<sub>2</sub> substantially. The lower atmosphere has been cooling on average since 2016. None of this is reflected in the relentless rise in CO<sub>2</sub> levels.

Just the difference in the amount of rotting vegetation north to south is enough to drop or raise the CO<sup>2</sup> levels. Decomposition is only responsible for 28% of natural CO<sup>2</sup>. The oceans are responsible for 48%. How does one propose that manmade CO<sup>2</sup> is controlling our climate?

Humans emit more and more CO<sup>2</sup> each year. Human source emissions are primarily from burning fossil fuels (oil, gas, coal). In 2018 humans emitted 37 billion tons of CO<sup>2</sup>. In 2017 humans emitted 36 billion tons. Atmospheric CO<sup>2</sup>

Levels have been rising since at least 1880. The industrial revolution started in 1760.

Is the level of CO<sup>2</sup> in the atmosphere rising?

Yes, very much so. It has increased by almost 50% since the industrial revolution. Our CO<sup>2</sup> emissions have increased dramatically, and is the reason for the increase of atmospheric CO<sup>2</sup>.

CO<sub>2</sub> in the atmosphere and annual emissions (1750-2019)

(Note that 1 ppm corresponds to 7.3 billion tons of CO<sup>2</sup>).

**Global Temperature and Atmospheric CO<sub>2</sub> over 600 Million yrs - No Evidence of CO<sub>2</sub> driving temperature**

Late Carboniferous to Early Permian time (315 million years ago - 270 million years ago) is the only time period in the last 600 million years when both atmospheric CO<sub>2</sub> and temperatures were as low as they are today (Quaternary Period). At no point do temperature and CO<sub>2</sub> levels relate. Temperature after C.R. Scotese <http://www.scotese.com/climate.htm>, CO<sub>2</sub> after R.A. Berner, 2001 (GEOCARB III)

## Can planting more trees or growing greenhouses help reduce the level of carbon dioxide in the atmosphere?

Paul Noel

20 February 2023

Former Research Scientist 6 Level 2 UAH (2008–2014)

<https://www.quora.com/Can-planting-more-trees-or-growing-greenhouses-help-reduce-the-level-of-carbon-dioxide-in-the-atmosphere>

This is the fact set that the Environmentalist Lunatics don't want you to know.

No land plant has any influence of significance on the CO<sup>2</sup> content of the atmosphere over any extended time. All land plants are almost immediately either decayed or eaten by animals. Net results show that even with trees the carbon stored in their bodies (wood) all decay within a few centuries and do not constitute significant changes only minor ones on an annual basis or a few decades.

The saw tooth nature of this line shows that plants have essentially no effect on the CO<sup>2</sup> content in any current time frame.

It is entirely mythology that land plants can sequester CO<sup>2</sup> in any significant way. You have been lied to.

The only place that CO<sup>2</sup> is sequestered by life is in the oceans. Oceans contain plankton. Both the phytoplankton and zooplankton secrete carbonaceous shells. These are basically microscopic as such you don't see these shells. When these living things die or are digested by animals that eat them these shells largely survive and sink into the depths of the oceans where they form limestone. The reality is that even this is a geologic time event. It does not happen "fast" like the Green lunatics want you to do this.

I keep referring to these people advocating this as lunatics because that is what they really are. They are scaring you by some cute mathematical models that are by no means a description of reality. The best way to tell you this is to explain CO<sup>2</sup> behaviour in the atmosphere and its effects in the environment.

You are told with some cute calculations that CO<sup>2</sup> is absorbing the IR radiation emissions from the surface of the earth and subsequently causing a reflection of IR back to earth. They use some cute slight of hand drawings to make you imagine this is so.

This is a classic of their vector diagrams. This one presumes to show you that most of the IR is being reflected back down. This just is not what happens. The first problem with the drawing is it gives you the impression of IR being reflected back down to earth. This just is not so.

Other problems include their math that imagines that this goes on all the time. In fact at night the majority of the IR is still emitted and goes right back out off the earth. In fact the only “gas” that is able to send the light back down to earth isn’t a gas. It is water and it is clouds that do that but they also block the incoming light so are essentially a net zero. The proportion shown here is also out. Any return energy is so insignificant as to not even be worthy of being in the drawing.

But it gets worse! These guys who build these pretty deceptions don't tell you about Light Amplification by Stimulated Emission of Radiation. (LASER) The short simple and sweet description is that rather than CO<sup>2</sup> being a mirror it actually pumps the IR out off the earth and here is the cascade for the process described.

What happens is an excited CO<sup>2</sup> molecule goes up a quantum state due to a photon and then another photon comes along and knocks that one out and goes along as well. They always go in the same direction together. The net result is that the light undergoing this process always proceeds in the direction of the 2nd photon. This means 100% of all light undergoing this process on earth will be going out. Now CO<sup>2</sup> doesn't invert to this 100% of the time. It does it about 0.5%. But that assures together with the omni-directional (indeterminate emissions) that the population of CO<sup>2</sup> emissions favours leaving the Earth substantially. This is a larger factor than any of the "warming" models have for the original theory of global warming. **So CO<sup>2</sup> does not warm up the Earth, it cools it slightly.**

This really isn't weird though. Life on earth must be a mechanism of energy transfer or it will not happen. CO<sup>2</sup> is the basis of life on Earth because it does this job. If CO<sup>2</sup> impeded energy transfer it would actually cause death. It doesn't. The energy equilibrium on Earth in living things depends on this to exist.

Now let's look at the gross realities of CO<sup>2</sup>. When I was young the CO<sup>2</sup> level on Earth was about 0.033%. Currently it is 0.042%. That may seem like a big difference but remember it is so far below the 1% line that it wouldn't even appear on a graph. It is also important to you to understand that in the geologic past our Earth has had an atmosphere of about 1% CO<sup>2</sup>. This condition is not hazardous to man or beast. 1% CO<sup>2</sup> was the time when life on Earth thrived the most. Actually the Earth is a fair desert devoid of life at this time because of CO<sup>2</sup> being so scarce. Most of the fragility of the environment is because of this fact. So what has happened with CO<sup>2</sup> in my lifetime?

In reality my daytime temperatures are actually much lower. My night time temperatures have risen slightly. The daytime/night time averages are trending lower. I live in the very centre of the world Global Energy circulation. But those things are minor. The really major thing going on is really a wild batch of facts. Alabama where I live is fairly thriving. We were not! Our land was ruined and has recovered. Our forests are getting massive and we have very large trees now. Our farm production is way up and far beyond any fertilizer or seed effects produced. Our experience is GLOBAL!

### [Greening of the Earth Mitigates Surface Warming](https://www.nasa.gov/feature/greening-of-the-earth-mitigates-surface-warming)

<https://www.nasa.gov/feature/greening-of-the-earth-mitigates-surface-warming>

### [Carbon Dioxide Fertilization Greening Earth, Study Finds](https://www.nasa.gov/feature/goddard/2016/carbon-dioxide-fertilization-greening-earth)

[From a quarter to half of Earth's vegetated lands has shown significant greening over the last 35 years largely due to rising levels of atmospheric carbon dioxide, according to a new study.](https://www.nasa.gov/feature/goddard/2016/carbon-dioxide-fertilization-greening-earth)

<https://www.nasa.gov/feature/goddard/2016/carbon-dioxide-fertilization-greening-earth>

The proper calculation of this greening is that it has increased in efficiency as well and is more than 10 times more efficient than it was. It also covers about 30% more land than it did worldwide. You would have to be a lunatic to want to imagine that this is a bad thing! Air pollution is for the most part a thing of the past. The deserts of the world are shrinking! Everything the Environmentalists are telling you about CO<sup>2</sup> is a lie. They are "cooking the books" to tell their lies.

I interviewed for a job with the NOAA people setting up their computer flood analysis centre in Tuscaloosa Alabama some years ago. In that they wanted me bad. I knew the Finite Element Analysis technology that they wanted to use. Then they told me that they wanted to prove global warming effects on the environment with it. I told them I would be happy to build the computer models that were realistic and factual and let the data lead where it went but I was not going to build software to lie to people and produce determinate results ahead of reality. That they would not accept! They wanted me to be their computer assisted liar! You must understand that most of the Government "Data" is being cooked to lie to you. Unlike them I am very careful and know deep in physics, optics, chemistry, biology, botany and more. My official credentials list here on Quora masks my studies. I promise you I study every day on these topics. Look deeply.

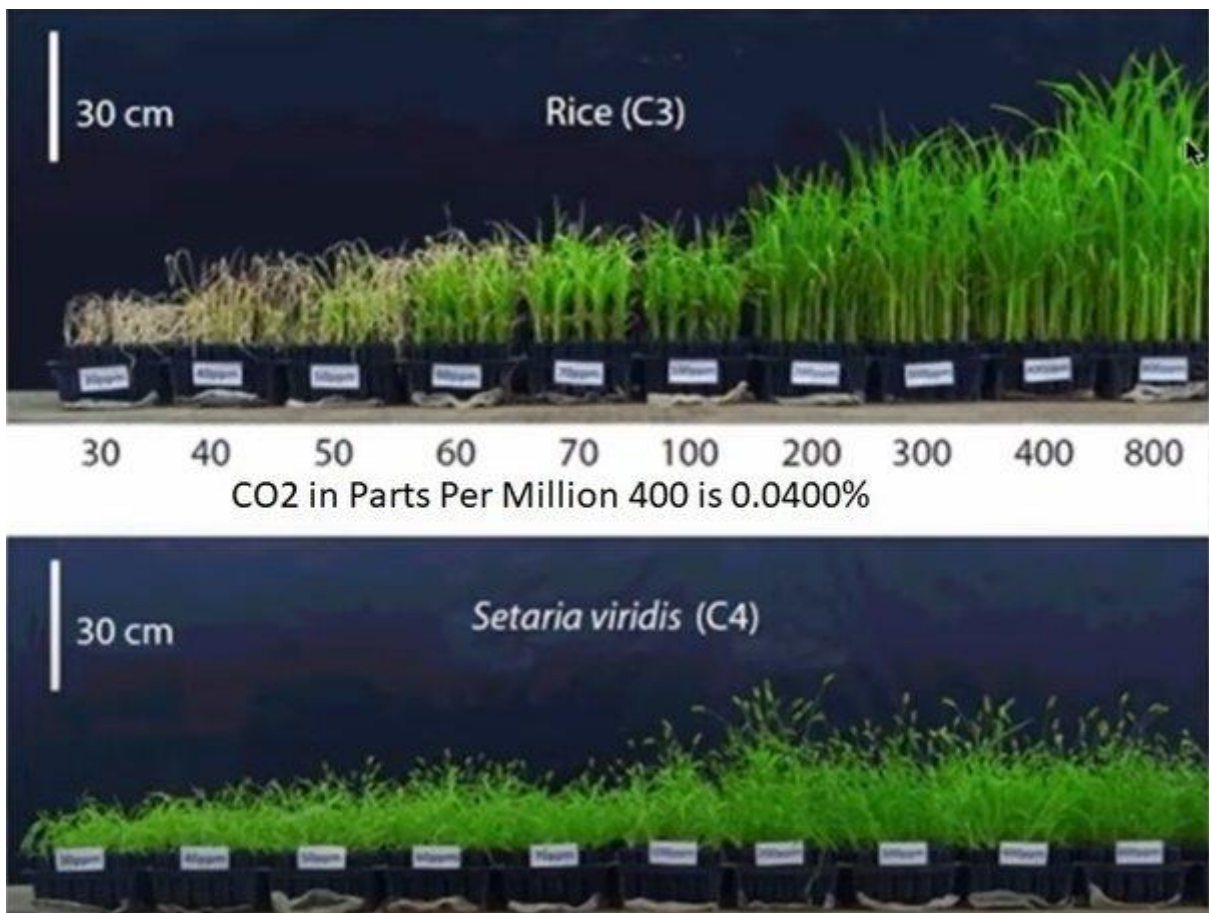

An example of how deeply I look into issues is the drug Hydroxychloroquine. This drug is just a chloride of Quinine so is the same biochemical function. I knew this from my study of pharmacology for my RN degree but I have checked it in detail since as well. In January and February 2020 I began well prior to the "Pandemic" to look into this drug. The reason was it was coming up as very effective in China. Clinically it is about 98% effective against COVID-19 and was being reported so by Chinese sources. I thought this was about as stupid as could be, an anti-malarial drug against a virus???????? It made no sense to me but I looked up the pharmacology data. It seems that HCQ and Quinine block the viral bonding to cells, they block the virus transport within the cell to the nucleus. It blocks the replication

near the nucleus. It then blocks the transport out of the cell and subsequent replication of the virus by exit from the cell. Now that is just about a perfect drug in its effects on COVID. It also is an antipyretic drug reducing symptoms, and it also is a pain reliever as well. That is in the words of Dr Fauci in 2005 regards SARS a “Miracle Cure”. He published this in formal academic papers 2005. But that isn’t what you heard in the press. It also changed my opinion of HCQ. Bluntly you see here I look and check my facts!

This is what is going on regards the “Climate Crisis”. The story of the “Climate Crisis” is that just as Greta Thunberg showed up on the scene the UK Guardian and a couple of other major news outlets published a Style Sheet that included rules on weather reporting. Weather events were no longer to be reported merely as what happened. Climate events were no longer to be discussed as problems or such. These were to always be packaged as a “Climate Crisis”. No facts had changed this was entirely a propaganda program, pure and simple. It was lies worthy of the work of Joseph Goebbels of NAZI Germany. It has no fact and when you are chasing CO<sup>2</sup> as a gremlin or monster you are just sucked into the propaganda of the political left.

In reality while all these idiots and dupes run about yelling about CO<sup>2</sup> some people have been setting you up with the facts. They did so without money and without big press liars to tell their story.

The reality of CO<sup>2</sup> is shown in this graphic. Each of these pots of plants was grown in a carefully controlled identical pot with identical water, light and soil. The only variable was the atmosphere they lived in was very carefully controlled in percentage of CO<sup>2</sup>. The simple fact is that below 200 ppm in this experiment the plants were unable to fruit thus any plant grown about 150 ppm CO<sup>2</sup> or below would go extinct. It is impossible to sustain life without plants so this is the death of life on Earth.

More data has been obtained on the topic of what happens if CO<sub>2</sub> goes up further.

**Trees Grow Much Faster at Higher Levels of CO2**

These trees go from current atmosphere to just over 2 times more CO<sup>2</sup> than current atmosphere. The reality is that the tree on the right grew more than 8 times as fast. 2 times the height represents 8 times the growth. Life on earth will not die out with more CO<sup>2</sup> it will thrive and we know very well it will. The Marijuana growers almost universally use CO<sup>2</sup> supplementation in their greenhouses because of this fact. Most commercial greenhouse growers do so too.

Photosynthesis has two types in plants C3 and C4. C3 plants use additional CO<sup>2</sup> more easily but C4 plants do quite well. Corn is a C4 plant. Here is what C3 plant Corn did since CO<sup>2</sup> started rising in the atmosphere.

There was essentially no change in the atmosphere until the period beginning in the 1950's. In the USA corn production was pushed by fertilizers in the 1930's and 1940's. The gain here of 650% is almost entirely CO<sup>2</sup> based. The return of legacy seeds to use has brought about a fact. GMO didn't do this! This was CO<sup>2</sup>. The Legacy seed plants went up too!

The wish to stop the rise of CO<sup>2</sup> is historically ignorant, geologically stupid and amazingly foolish for the future of life on earth. CO<sup>2</sup> is life and the Earth didn't overheat from it at nearly 1% which is probably impossible to reach if we burned all carbon based fuel sources up. By the way, levels up to 1% commonly occur inside occupied buildings. Levels up to 3% are tolerated inside submarines at times. The reality is that human beings work well with CO<sup>2</sup> and any fears of it are nonsense.

CO<sup>2</sup> only becomes toxic to animals and people up above 5%. That is the level you breathe out! I have to say that because lunatics who lie for the leftists are so determined it is dangerous. Reality is we know this very well. It is the stock and trade of medicine!

Understand my answer very clearly; CO<sup>2</sup> is no danger. CO<sup>2</sup> capture by plants is a big fat joke! CO<sup>2</sup> capture by carbonate means is already natural and industrially totally impractical despite Bill Gates pretty toys. CO<sup>2</sup> is beneficial to life! It is the basis of life. So why on earth would you want to destroy the CO<sup>2</sup> is only because some propagandist told you it was pollution. It isn't! They have you going on a snipe hunt after CO<sup>2</sup>.

***Definition "Snipe Hunt" a practical joke in which an unwitting victim is sent in pursuit of something that doesn't exist. "one or two gullible youths are selected to participate in the notorious snipe hunt"***

The scale of the con game going on over CO<sup>2</sup> is in the order of about US\$100 Trillion worldwide. You are going to spend yourself broke, the rich will get even more rich and powerful, you will be penny less and you will be powerless. If you want this keep chasing your snipe, he's in that bush somewhere. Just keep trying.

You may think I am against the environment I am not! I just refuse to buy off on the ultimate racism of the political left. They hate the human race. I am neither hateful of humanity nor am I afraid of myself. Homophobia is literally "Fear of one's self". These leftists are teaching you to be a homophobic person.

**Desertification by 2050:** The trends are in the opposite direction. The most likely scenario is that about 30% of the Gobi Desert will be step land or forest and the Sahara Desert will be about 15% reduced. There will be some gains in the Saudi Desert area with it being a few percent reduced. Deserts are shrinking, crops are increasing, Earth is greening, and fertiliser need is decreasing. If this trend continues Earth will be more hospitable in 2050.

## What will make people realise the truth about anthropogenic global warming?

<https://www.quora.com/>

23 February 2023

Paul Noel; Former Research Scientist 6 Level 2 UAH (2008–2014) University of Alabama in Huntsville

There is no anthropogenic global warming! It doesn't exist. Scientists use the word "anthropogenic" in referring to **environmental change caused or influenced by people, either directly or indirectly.**

Here is the hard core data on the Global Satellite Temperature vs Global Warming Data.

There has been no significant change in temperature (Noise level) and there has been a big run up of CO<sup>2</sup> the two are not related. Sorry you can see the whole claim right here.

*Yes, what will make you realise the truth that there is no Anthropogenic Global Warming?*

This is from December 1978 to January 2023 Data! Live and hot off the websites! NOAA Hawaii Observatory and UAH Satellite Data. UAH processes the Satellite data from NASA under contract directly. This is the source!

Paul Noel

24 February 2023

Increased CO<sup>2</sup> is not related to earth's temperature. Now there is an inverse relationship which has been found in ice cores showing more CO<sup>2</sup> actually causes indirectly cooling of the Earth. This works this way. As CO<sup>2</sup> goes up due to geologic sources it causes blooming of plants and of course much benefit for animals. The blooming of plants with higher CO<sup>2</sup> because it stratifies in the atmosphere to some extent allows plants to grow at higher altitudes.

In the ice cores they found that this produced very clean air and prevented dust from the Gobi Desert from getting north into the arctic and thus prevented the melting of ice in the north. As the plants exhausted the CO<sup>2</sup> down they subsequently died out of high altitude and the Gobi Desert dust coated the glaciers causing melt. Now there are probably other factors as well but this is the basic cycle found in the ice cores. As the dust melted the ice the earth warmed and plants ate up the rest of the CO<sup>2</sup> causing more death of plants and more dust. Then the geologic sources of CO<sup>2</sup> finding little plant life to eat them up built up in the atmosphere.

Ice ages are proof that the Earth was at the verge of dying and losing all plant life. Earth was teetering on the brink of planet wide extinction of all life. Then along came the industrial revolution and drilling for oil and gas, etc. So we released more CO<sup>2</sup> and now plants are doing better and fast the dust is being scrubbed of our power stations, etc. We have raised CO<sup>2</sup> to the level that we are likely to build up ice a lot shortly.

CO<sup>2</sup> is not driving any climate changes. Sorry but the data is in! The whole IPCC crap is just computer induced hallucinations.

Is there a way to permanently store excess atmospheric carbon dioxide in mineral form, such as limestone or marble, without burying it underground?

What do you think Limestone and Marble are? They are stored CO<sup>2</sup>! Now maybe you should be asking; why should we consider trying to store CO<sup>2</sup>? The reality is the last 6 ice ages were the product of sequestration of too much CO<sup>2</sup> to the point life nearly died out on Earth. Life on Earth has recovered greatly because of our releasing CO<sup>2</sup> into the atmosphere.

### Ralph Ellis: Ice Ages modulated by ice-sheet albedo, not by CO<sub>2</sub>

[https://au.video.search.yahoo.com/yhs/search;\\_ylt=AwrWnjYPX\\_lji2AAVBk36At.;\\_ylu=Y29sbwNncTEEcG9zAzEEdnRpZAMEc2VjA3BpdnM](https://au.video.search.yahoo.com/yhs/search;_ylt=AwrWnjYPX_lji2AAVBk36At.;_ylu=Y29sbwNncTEEcG9zAzEEdnRpZAMEc2VjA3BpdnM)

## Can global warming and climate change be explained as a complex system?

<https://www.quora.com/>

26 February 2023

Paul Noel; Former Research Scientist 6 Level 2 UAH (2008–2014) University of Alabama in Huntsville

Well it is best to say that the weather on Earth is a complex and chaotic system. To say we understand it to any great extent is simply a lie. To say that we can explain “Global Warming” or “Climate Change” as a complex system is impossible as they simply are not a system of anything but belief. They have absolutely no reality as far as the real world.

If you measured from 12/1977 to the present using the whole globe measured you would find the temperature has changed (-0.15°C). That is like all the other measurements, NOISE! IT really means nothing so anyone hauling out their “Global Warming” is hauling out their religious dogma.

Please note that the temperature in December 1977 when this starts was the record coldest year in history since 1920! The whole decade of the 1970's was very cold. This is a nil warming trend and really has no value for any discussion. There were years warmer and years colder. Basically the temperature line is a flat line with no trendline at all.

**The CO<sup>2</sup> went up and temperature ignored it!**

**Why does CO<sup>2</sup> not stay in the atmosphere forever once released from human activity like Methane does?**

<https://www.quora.com/Why-does-CO2-not-stay-in-the-atmosphere-forever-once-released-from-human-activity-like-Methane-does>

1 March 2023

Paul Noel; Former Research Scientist 6 Level 2 UAH (2008–2014) University of Alabama in Huntsville

You are so wrong in all cases in your question. Methane doesn't stay in the atmosphere even a day! Really, I get in fights with the leftists who want to tell you the half-life in the atmosphere is 8 years for methane. It simply is not true. **Methane has a half-life in the atmosphere of about 2 hours. That means inside of 2 days it may as well be 100% gone for sure.** Methane persistence in the atmosphere is a non-problem. In fact the natural sources of methane are so high that it would have taken over our atmosphere if it was a problem. 18% of global methane production into the atmosphere is from the Amazon Rainforest. About 15% is from the Congo River basin. Another about 12% is from the Rainforest in Borneo. The reality here is that 40% of the world methane output is from Rainforests! The reality is other natural sources around the world amount to about at least another 40%. Mankind can be blamed for less than 20%. Methane is a normal emission from natural sources. Rotting leaves, and wood makes up a large part of methane. **Bacteria cause nearly 100% of the methane emissions blamed on mankind. That famous fuss about cows is because of bacteria in their gut and attempts to stop this depend on shifting cows from their natural diet. All that will happen by stopping cows is that the grass will rot on the land and the bacteria will still emit methane.**

We have a very good evidence of this!

The photo here contains a graphic from the largest man-made methane leak in US history and the red lines are Methane concentration in the air. The wind was blowing 22 miles to the sea at about 10 miles per hour. The methane was not even reaching the sea! It was oxidized that fast. No 8 year half-life! This will tell you how much the Environmentalists LIE!

### **METHANE IS NOT AN ENVIRONMENTAL THREAT OF ANY KIND!**

CO<sup>2</sup> does stay in the environment until taken up by living plants. The plants then are eaten or decomposed and the Methane released returns the CO<sup>2</sup> to the air. It is cyclic. Over time plankton in the oceans eat the CO<sup>2</sup> and in their carbonate shells they sink it to the bottom of the sea.

Geologically we know what the result of this CO<sup>2</sup> sequestration as limestone rock does. Over time it drains the atmosphere of CO<sup>2</sup>. You might think that is a good idea but in fact it becomes a threat to life on Earth. It decreases to the point life sputters toward death. CO<sup>2</sup> is life! **Without CO<sup>2</sup> there is no life on Earth. Geologically we know how high the CO<sup>2</sup> was on Earth in the past and its effects on climate and life. The simple reality is that it was up at 1%. Currently it is 0.042%.**

When it was high if you believe the Environmentalist anti-CO<sup>2</sup> claims life should have nearly died out. The climate should have reached the “tipping point” they tell you to be afraid of and a mass extinction over heat should have happened. In reality quite the opposite happened. **Life thrived well above any level it exists on Earth now.** In fact we have excellent evidence that it did like 100 times better than it does now. We know that there are no “tipping points”. **We know that the Earth does not overheat!** The rocks tell us this story.

In my area there is nearly 7,000 feet deep of limestone all fossils from the amazing life that lived on Earth when CO<sup>2</sup> was nearly 1%. Life doesn't die out. The worshipers of GIA (the Gemological Institute of America) are lying to you on the Earth. Mankind's release of CO<sup>2</sup> is not killing Earth. **CO<sup>2</sup> is increasing life on Earth.**

Is there evidence of what I am telling you? You bet there is and lots of it. Almost all CO<sup>2</sup> release on Earth dates from 1970 to the present. We should be seeing a lot of differences and we are. Photosynthesis on Earth on land plants falls into 2 categories (C3 and C4) C3 plants have difficulty in the recycle of their internal chemicals if they do not have adequate CO<sup>2</sup>. C4 plants are more efficient in this recovery. C3 plants as a result react more to increased CO<sup>2</sup>. C3 plants react less to increased CO<sup>2</sup>. **The C3 plants since 1970 have increased their photosynthesis activity per same land surface area by nearly 800%. C4 plants have increased their photosynthesis activity per same land surface area by 650%. That is 8 times for C3 and 6.5 times for C4.**

The reality is that there is very good evidence of this.

Reality here is that all of these plants stop function at CO<sup>2</sup> of 0.015% as they cannot reproduce because they will not set seeds.

The reality of CO<sup>2</sup> is it is being swept from the Atmosphere slowly but there is no problem with it building up.

The geologic data is very solid:

We simply have no problem in either Methane or CO<sup>2</sup>.

But let's look and see if we have warming evidence.

**This is the only data on global warming that is global! Guess what NO relationship between CO<sup>2</sup> and temperature. NONE!**

The whole worry set you are concerned of is a HOAX!

## What is the timespan for human-caused atmospheric carbon dioxide levels to return to normal after humans are gone?

<https://www.quora.com/>

29 March 2023

Steve Sawyer Former Engineering, and Accounting & Finance.

I can't answer this question until you tell me what is the normal CO<sub>2</sub> level. In history, carbon dioxide has been as low as 180 parts per million (ppm) and has ranged much higher, up to about 7,000 ppm. Here's a graph that shows CO<sub>2</sub> levels as calculated by geologists, from soil and rock samples and ice core samples, for the last 570 million years.

Note that the current levels of CO<sub>2</sub> are about 420 ppm, which is lower than most of the earth's history.

The press, the politicians, the Hollywood elite and the global elite want us to cut our emissions of CO<sub>2</sub> to zero by eliminating the use of fossil fuel. They talk about CO<sub>2</sub> as if it were the worst substance on the planet. All of this has had an impact on people's perception of CO<sub>2</sub>.

If you were to ask the person on the street for their opinion of carbon dioxide, what would be the likely response?

CO<sub>2</sub> is bad.

CO<sub>2</sub> is ruining the planet.

CO<sub>2</sub> is responsible for global warming.

CO<sub>2</sub> should be banned.

CO<sub>2</sub> is a hazardous gas, a pollutant.

I did a google search for 'photos of global warming' and the results were pictures like this:

This “global warming” photo is similar to photos appearing regularly in the media. Many are photo-shopped with red colour to make it look like the planet is burning up. Remember that since the late 1800’s, the temperature has risen 1 degree C (1.8°F), hardly enough to make anything much warmer or in the words of Al Gore at Davos, to make the “oceans boil”...

It’s interesting because you cannot see CO<sup>2</sup> coming out of a smokestack. The CO<sup>2</sup> is clear and the H<sup>2</sup>O is white, so if the smoke has colour, it is from other pollutants. This is CO<sup>2</sup> as depicted by the politicians and the media. But what

really is carbon dioxide? It’s really quite simple.

**Carbon dioxide (CO<sup>2</sup>) is a colourless, odourless gas which is the basis for all life on this planet.**

Yes, that is correct, carbon dioxide (CO<sup>2</sup>) provides one of the building blocks for all carbon based life on the planet, which is all life. We are all often called carbon-based life. Add water (H<sup>2</sup>O) to the equation and through photosynthesis, green plants containing chlorophyll convert the H<sup>2</sup>O and the CO<sup>2</sup> into sugars and other carbohydrates, and into oxygen.

These sugars and carbohydrates provide the energy for the photosynthetic plants that produce them as well as for all the other species that cannot perform photosynthesis, including ourselves and all other animals. The animal kingdom cannot make its own food. It has to eat plants or other animals for food. That’s it. It’s that simple. CO<sup>2</sup> is required for the plants to make food for all carbon-based life on our planet, which includes we humans.

But few of the so-called climate scientists realise or will acknowledge the significance of carbon dioxide. Studies have been done on plant viability and vitality in environments with varying levels of CO<sup>2</sup>. The result – plants die at CO<sup>2</sup> levels below 150 ppm and plants thrive in CO<sup>2</sup> levels of 2,000 ppm or higher, well above today’s level.

The entire “global warming catastrophe” narrative is based on the claim that humans are emitting too much CO<sup>2</sup> into the atmosphere and that this will cause our planet to be too hot for life (remember the 1.8°F or 1.0°C so far). Both these claims are patently false. The level of carbon dioxide in the atmosphere had been declining slowly and steadily for over 500 million years. During that period, CO<sup>2</sup> went down from over 2,000 ppm to 180 ppm during the peak of the most recent ice age, about 20,000 years ago. As the climate warmed over about the next 10,000 years, the warming oceans gave off CO<sup>2</sup> emissions, slowly bringing the CO<sup>2</sup> levels up from 180 ppm to 280 ppm. CO<sup>2</sup> remained at about this level until the industrial age when the burning of fossil fuels began, which has been theorised as largely responsible for bringing CO<sup>2</sup> levels up to the current 420 ppm.

The alarmists, or hystericals like to point out that humans have never lived in a climate with CO<sup>2</sup> at these higher levels. Yes, humans have only been around for about 2 million years (993,500 years) when CO<sup>2</sup> levels were low. But that argument breaks down when you consider that our predecessors and other

mammals have existed in climates where CO<sup>2</sup> levels have been much higher. The alarmists still believe that higher CO<sup>2</sup> levels equate to higher temperatures, but they do not, and never have. Humans could survive in levels of CO<sup>2</sup> much, much higher than they are today.

Virtually any discussion that you hear or article that you read about global warming assumes that it is a given that we must reduce our carbon emissions, even though that premise has never been proven. There is agreement that the climate changes, that temperatures are warming, that CO<sup>2</sup> is a greenhouse gas, and that CO<sup>2</sup> is increasing in our atmosphere. But with all these known facts, there is no proven causation between the increase in CO<sup>2</sup> and the increase in global temperatures. It is very doubtful that this could be proven as the climate is way too complex. In fact it is an over simplification to believe the CO<sup>2</sup> is even the primary driver of temperature change, let alone the major control knob, as the hystericals believe.

It is amusing to me that the object that warms our globe, the sun, is rarely mentioned in discussions about global warming. There has been some scientific work done comparing solar activity to earth's temperatures which show very promising correlations, but like CO<sup>2</sup>, there is no definitive proof of causation.

#### What are the consequences of not finding a solution to sea level rise?

<https://www.quora.com/>

30 March 2023

Paul Noel Former Research Scientist 6 Level 2 UAH (2008–2014)

I believe a proper discussion of sea level rise needs to be done. The earth has had no sea level rise in 247 years now. NONE. I don't care what NOAA liars tell you. The fact is that the tide gauges sit on mud and it dewateres and the gauge sinks! That produces the illusion of sea level rise.

But there is something far more profound here. You can see it in a port. If a ship is being loaded with cargo the ship sinks deeper and deeper in the water. If you look at the ships right next to it on the key you

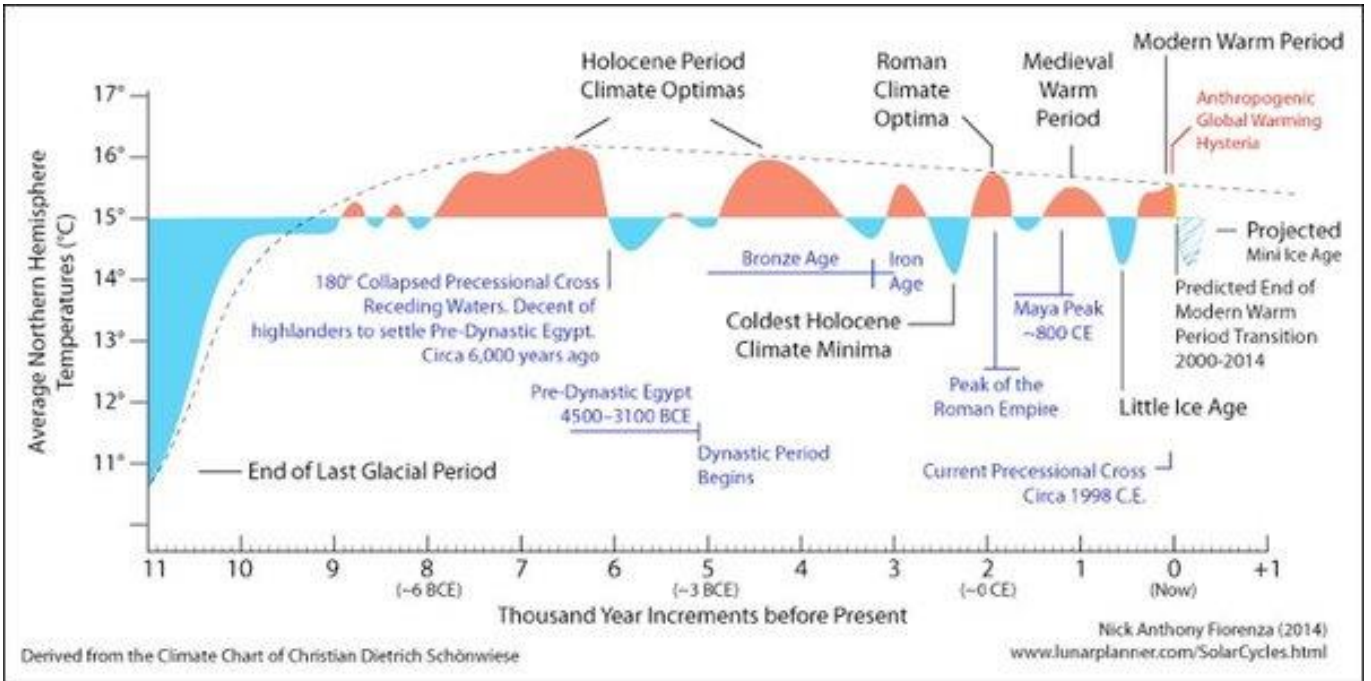

find while the one ship is being loaded and if they are not nothing happens to the level of the water on the ship not being loaded.

Continents are floating. There really is only two ways to alter their buoyancy in the magma of the earth. It is to unload them or load them. This would be like melting ice off them or adding ice to them. Adding ice is just like loading a ship. But the ship (continent) next door is unaffected by the loading or unloading. At the same time adding water to the sea is loading it and the sea floor sinks. This is not a slow process. Land doesn't take centuries to rise or fall. We have examples of this. The other way to adjust the buoyancy of a continent is to have more granite freeze to the bottom of the continent in the magma and that makes it displace more magma and it rises.

Now if you can figure out how you can freeze more granite to the bottom of a continent or if you can figure out how to unload water off the continent, seems a dumb idea to me as that's a drought then guess what you have absolutely no influence on sea level at all and cannot have any.

This whole discussion of sea level rise has to stop! The weather has nothing in the world to do with it.

Estimated global temperature over the last 500 million years

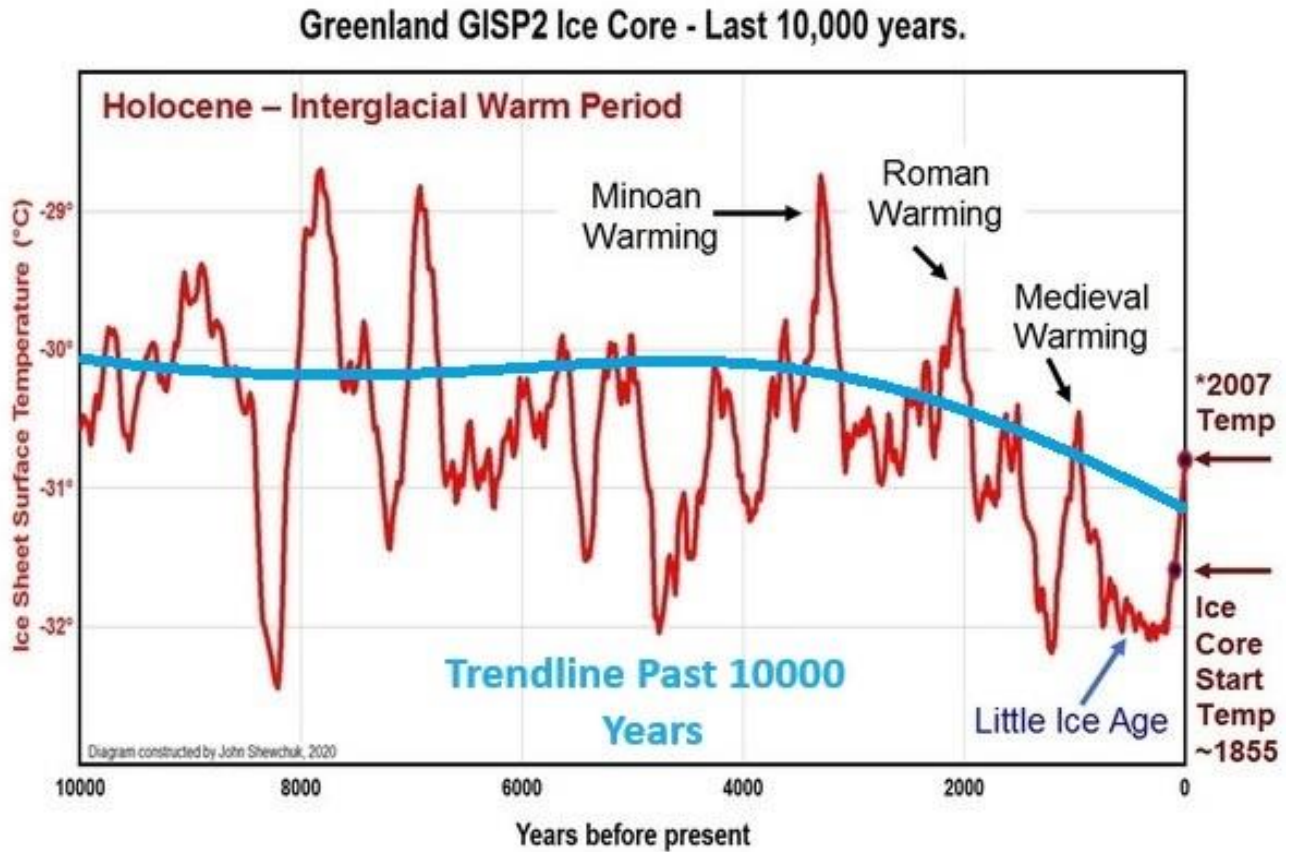

**Is there any scientific evidence or proof for global cooling? How would global cooling impact us?**

<https://www.quora.com/>

**Paul Noel** Former Research Scientist 6 Level 2 UAH (2008–2014)

5 March 2024

The answer comes in trend analysis. It will not appear in any specific year. Nor will it predict exact highs and lows.

Alley, R.B. 2004. GISP2 Ice Core Temperature & Accumulation Data. IGBP PAGES/World Data Center for Paleoclimatology, Data Contribution Series #2004-013. NOAA/NGDC Paleoclimatology Program, Boulder CO.

\*2007 Temp: Jox JE, Yang L, Bromwich DH, Gail. (2009) Greenland Ice Sheet Surface Air Temperature Variability: 1840-2007. American Meteorological Society, Journal of Climate Vol 22, pp 4029-4049.

It is very clear over the past 8,000 years there is a strong down trend. If we look at Greenland or Vostok this is cyclic.

Vostok data.

We are clearly on a peak. All such peaks in the past 800,000 years have collapsed rather fast into cold periods. We are clearly getting the signal of a drop. It could go up a bit longer but not very long. Most times are much colder.

There have been efforts to mathematically extract via Fourier transforms the underlying wave forms. They are not particularly very predictive. They are fairly indicating a downturn.

There have been efforts to match to orbital variations of the Earth about the Sun. This has some validity. These too predict downturn.

There are starting to be astronomical observations of the space of our spiral arm of the Milky Way Galaxy and these also tend to suggest a down turn.

NONE OF THESE say that the temperature will go down in the next 1,000 years for sure. They tend to suggest we have pretty well exhausted our time at peak but the resolution isn't good. So don't look for next year to be ice age. But then don't look for the UN's "Global Boiling" either.

Sorry if I am too good of a scientist to tell you something that I don't know for sure. I just tell you if I don't know exactly. I can tell you that the vagaries of the solar system data and the short term of our observations does not give high confidence of even a decade long forecast. I can reasonably say that it is unlikely for us to see warming above 2C for the remainder of this peak.

**I can tell you absolutely that there is no positive effect of CO<sup>2</sup> in this matter.**

**CO<sup>2</sup> does not cause warming. It follows warming. It is an EFFECT, not a CAUSE.**

Based upon the time frames here the decline into Ice age tends to take like 40,000 to 100,000 years. You are not going to live that long. It isn't even a problem your family will see for several thousand years. More likely the decline will be quite slow taking 10,000 years or more. The current graphic data does suggest we have begun the down turn. But really nobody alive will have to "adapt" to it. Nor will your

grandkids. The changes will be subtle. The same cannot be said for the situation on the coming out of an ice age. Those events are quite dramatic.

The collapse of an ice age is stunningly fast, Geologic evidence is seeing the end of an ice age is likely in a couple of years. It would be most shocking in effect. But since we are going down into an ice age, I really don't think we are going to be bothered with the collapse of an ice age anytime soon.

As to causes which I am sure you are curious about, **they actually are pretty simply the Sun!** Skip all the details but **the Sun runs the show here.** Now don't mistake me for saying that the Sun is not part of the Galactic System and as such it is part of a larger system. But for our purposes it is the Sun running the show. There are no terrestrial causes which we can alter to control this cycle. These forces are literally about  $10^{14}$  times larger than any terrestrial effects. Considering that is 100 million times a million times a million times a million you can drop out of your thinking any control mankind has. **CO<sup>2</sup> is no driver and the data is solid on that.**

If you want to believe some "greenhouse gas" claims don't. **The atmosphere of Mars, Jupiter, Saturn, Uranus, Neptune, and even Titan are all substantially 100% of "Greenhouse Gases" and they are not hot.**

If anyone seeks to deny what I have written on the formation of oil and planetary processes please note there is **nothing organic about Methane on Mars, Jupiter, Saturn, Uranus, Neptune and Titan.**

To review that I have pointed out that Methane is sourced by Hydrogen evolving upward from a natural fission nuclear reactor in the mantle of the Earth. This hydrogen evolves upward catalytically and chemically reacting with Carbon making Methane. This evolves upwards making in an equilibrium reaction the whole cascade of hydrocarbons we see in crude oil. Skipping the details here this reacts in the Atmosphere to become CO<sup>2</sup> and Water. This together with photosynthesis evolved us our atmosphere rich in oxygen and our oceans. It also provided the massive stores of carbonate rocks like limestone and dolomite. **At no point is Methane or CO<sup>2</sup> adverse to the climate or life on earth. CO<sup>2</sup> is literally the only reason we have life on earth.**

The hydrogen evolving upwards has been discovered in deep geologic formations and is now being considered for fuel use in our motor vehicles, etc.

Everything I told you exists! It is very clearly there. When I tell you that something exists, I have studied it, put my hands on it and seen it. When I tell you how we know some things, I am letting you know the processes. When I tell you uncertainty, understand that I am not being "uncertain" like a person of shaky point of view. I am being a scientist who says, "I don't know."

You may safely rely on these solid facts. **There is no danger of CO<sup>2</sup> being a problem on Earth.** CO<sup>2</sup> will not burn you up, it is not pollution and it will bloom life on the Earth. The Climate is not under human control or significant influence. Your life is not at threat from your use of "fossil fuels" which mostly are not fossil fuels at all. The only thing that happens if you stop using oil, gas, coal is you don't get to use the energy! People teaching you to be in terror of CO<sup>2</sup> are quite possibly the most evil people the human race has ever had.

**What can we do to prevent future fossil fuel burning affecting future generations when it comes to climate change?**

This is the temperature graph from VOSTOK. Let's see if CO<sup>2</sup> matches up.

CO<sup>2</sup> doesn't cause warming and it doesn't stop cooling. Game over you can chuck the lies in the nearest trash can because "Climate Change" due to CO<sup>2</sup> is a HOAX!

Really simple you have no issue with CO<sup>2</sup>. You as a human cannot stop the warming or cooling of the Earth. You ride this bus but you are not the driver.

## NATURE SPIRITS and GUARDIAN ANGELS are EXCLUSIVELY ASSIGNED

Sunday, 26 May 2019

James: Hello my dear Verna, how are you this getting-colder day?

Verna, a Nature Spirit: I am very well my dear James. You want to talk to me, wanting to gain more wisdom from the old chook.

James: I do, if you'd be so kind. Old? What's that – 2 billion years and counting? How are your wrinkles coming, like being etched in stone?

Verna: Thankfully, no such afflictions of age do we have to deal with. I look just as I looked the day I was created. Not a day over sixteen my dear one. We don't 'age' as such, we just get wiser, more noble, more, well, what can I say – Lady-like.

James: You've got quite a few admirers amongst us 'fleshies'.

Verna: Yes, I know James, such is the price of fame!

James: And so much so a friend of John and his partner said they were channelling you.

Verna: Which you know is an impossibility because I am only to speak with you. We nature spirits and angels when we're engaged in a personal relationship with you on Earth, as I am with you James, are specifically chosen to be with you because of how our personalities work / mesh together. And it's very, very, VERY specific – have you got the picture, so specific that I CAN'T interact with another mortal as I am with you! So I can't and won't be with John P. and his partner for example, speaking through her, that is all a contrivance on their part and not in keeping with the Laws of spirit / mortal communication which includes nature spirit and angel / mortal communication.

And the thing is, with spirits speaking to you, it's different, the same Laws don't apply because you are like them, so spirits in the mind and healing Mansion Worlds, the Celestials, can speak to as many different people on Earth as they want, with each receiving person perhaps sounding slightly or even a lot different giving the impression that it might not be the same spirit. All of which rightly can lead to lots of confusion for you lot who can't readily see us spirits and angels.

So you can be happy knowing that although others might claim to be speaking with me, they won't be, not unless as you understand there is some specific need for me to, which would only be to help them with whatever it was and not in a long term personal situation like I have with you, James, because of how specific you and I are together. It's like being with your soulmate, there is ONLY your soulmate (soul partner) that you fit so closely with, so you could say in a crude way that I am your nature spirit soulmate, even though there is no such thing, however I say it like that to illustrate that it is so specific, my light and the light of your mind gels to the degree of enabling us to work so closely together like this, all to help you reveal the truths you need to see. And even though you can and have at times momentarily worked with others of my kind, you've not moved to have a deeper more personal interaction with them like you are with me.

And the other point I want to make is, you being well advanced in your truth James, so that is where I am too, meaning I am reflecting to you the level of truth-advancement you are on. And I won't go backwards in this, I can't, it becomes part of my light, part of my 'truth' if you like. So, I can't go backwards as in work with people who are less advanced in their truth than you are because that would be a retrogression for me, and I can't go back. For a nature spirit or angel to go back in our light would mean we've fallen from grace, we've become untrue, we've rebelled, so you can see there is little incentive for us to do that; and it can't happen now anyway because of the end of the Rebellion, so we're protected in that. So even if

for example John P. or anyone else demanded that I speak to them, they'd at least have to be equal to the level of light your truth, James, is carrying for me to be asked to do it. And even then, because they are not you and so would be growing in their truth differently to how you are, that would then cause a schism in me because it would be like I'd have to stop being with you and start being with them, which means I'd effectively have to change all I've been previously with you to be with them, which I can't do. It would be like making a tree go back to how it was as a seedling and then sapling and grow differently thereby becoming a differently shaped adult tree. It can't happen.

And on a personal level James, I don't want to talk to anyone else on Earth other than you. Did these people actually ask me if I wanted to talk with them or did they just assume or demand that I would as if I and my kind are wandering around with nothing more to do in our lives than to do what you on Earth want us to do.

And they didn't have the decency to ask you what you might have felt about their talking with me, and even though you don't 'own' me, I am not your possession and you can't 'copyright' me, even though I am a free independent agent who can talk to whomever I want, simple courtesy might have been nice to have considered how you might have felt about it. It's not as if we're all in this together and you can do whatever you like with whomever spirits or nature spirits and angels you might like, that sort of mortal arrogance in which you believe you are superior to us is for the dogs, it's only going to cause you more grief when you come to do your Soul-Healing.

James: Do you know who or what they were talking to – and were they even talking to anyone in spirit or anyone of your kind?

Verna: I do know, however it's not for me to say James. That's for them to want to know, it would become part of their seeking the truth of why they wanted to speak with anyone other than each other to begin with; what they were hoping to gain by it; why they wanted to gain anything anyway, along with about a million and one other deeper levels of truth such inner investigation would lead them to. It's like a doorway, an opening, into themselves, should they wish to take it, just as is all experience and every feeling you have. And between you and I, I don't want anything to do with it, so I'm sorry James, but you're on your own in working out how you deal with such situations, and as you understand, it's about what feelings it brings up in you so you can work through them bringing to light that which you are to see and understand about yourself. And you've been doing that and gaining a lot from it, such as it even making you feel like speaking with me again and you tapping into all my glorious knowledge.

But before you move onto another subject James, I want to impress upon you just how finely attuned to you mortals we angels and nature spirits are. We are assigned to personally assist you knowing that that assistance is EXACTLY what you need. So it's not a lackadaisical affair, your personal angel pair who are with you your whole life are the ONLY personal angelic pair in the whole of Creation who are and can be with you in your Earth life, unless other extenuating circumstances were to happen, those which are beyond my scope to discuss publicly with you, suffice it to say, they being very rare.

It's all angel / person specific. And you can even go so far as to say, that the angels, and in particular the ones who are to fulfil such personal and close relationships with ascending mortals and all Sons and Daughters of God, have been specifically created to fulfil that role. And in a similar way, though not as highly strategic as that, is it with us nature spirits. Not everyone has an assigned nature spirit pair, like you all have a pair of angels, we nature spirits will only be assigned for a certain period of time and for very specific reasons to specific people, and only to those people who need to have our presence with them for some reason, with the person being consciously aware of us or not.

In my relationship with you James, I am overall assigned to you for your whole life, however really my assignment is dormant so to speak until I am actively interacting with you, such as now in this

communication, otherwise I freely go about my other business in my nature spirit life, most of which has nothing to do with you and which you're unaware of unless I want to tell you about it. Whereas your personal angelic pair are ALWAYS with you, they are ALWAYS interacting with you, not a second goes by in your lives when they are not personally with you and doing something personally in your aura. They maintain your auric system in accordance with the dictates of your soul and the needs of your Indwelling Spirit, they are always personally attuned to you, monitoring your every moment, feeling, thought, knowing all you need to go through and helping you do it. And they don't have other business outside of you – you are their sole business, their whole focus, so you can see it's a pretty amazing relationship they have with you.

So for example, my speaking directly to you now involves your two guardian angels. They are overseeing and monitoring it all. And should I overstep the boundaries for example as in what I can say to you about a certain subject they will instantly step in letting me know, stopping me, suggesting that I am moving into murky waters and how to get myself back on track. EVERYTHING is regimentally taken in hand by your angelic overseers. They are not controllers, they don't control you in any way, they just absolutely make sure that all that happens to you from without does so in complete accordance with the dictates of your soul that are passed onto them through your Indwelling Spirit. And that's the same for everyone. **So nothing can and will ever happen to you that's not supposed to happen, with mostly all of this going on with you being unaware that it is.**

And so then you can compare our nature spirit and angelic involvement with you and how specific and highly defined it is, with say the involvement you might have with the mind spirits. And for the most part with the **mind spirits**, you have an absolute rabble who basically have no idea about what your soul needs, what their soul needs, what any of the bigger picture is about, they are living completely in rebellion and default against themselves, against we nature spirits and angels, against Love and the Truth, against our Heavenly Mother and Father. And as they are still wrapped up in their negative power-seeking mind agendas, they decide they are going to try and make contact with a mortal person on Earth. And some people would welcome such contacts and happily say or write whatever it is the mind spirit wants them to say, believing they are understanding 'great things' or are 'earthing great truths' and you know all the rest James. Most of which is rubbish and what we call 'spiritual pollution' that serves to at best, further both the wayward mortal and spirits' progression in their rebellion, and at worst gums up the works with disinformation and masses of mind-derived untruth.

So yes, anyone can supposedly take the likes of myself, Verna, a nature spirit, believe that I am who I say I am, believe that I am willing and couldn't think of having anything better to do in my life than speak with any mortal that reaches out to me, that all I want to do is speak with mortals who aren't doing their Healing, aren't interested in aligning themselves with the Truths I am conveying to and helping you understand James. Oh sure, I'd love to help further the Rebellion by talking with anyone who is denying the truth about anything they want to make up concerning what we nature spirits might be and what we might say. And like you see from myself, sure I am a nature spirit, and as you can't prove that to be true, you have to take that on good faith, and yet just because I'm a nature spirit doesn't necessarily mean all I want to talk to you about is things to do with nature. Those of my kind are nature experts, we are the Spirit Nature of Earth, so to be sure we know all there is and all there ever will be about Earth, all of which information is waiting to be passed onto you mortals when you choose to actively do your Healing, and yet I don't want to be talking about how best to grow your veggies James, I'm interested in higher truths, and should you want to know about the veggies and other plants and animals I would enlist others of my kind to help with those things. But as I said, I am attuned to the Light of your Truth, and that is something you mortals know very little about or understand the significance of. But in time you will, because the level of Truth you are on and the light of being that Truth is very important, it is what gives you your position in Creation, it determines your status in life, what level you are on, what happens in your day to day experiences, where you are on your path of truth. And I am on your path with you James, and it's a highly defined and very specific path, and for me to be off with every other Tom, Dick or Harry that wants

to talk to me, would only serve as a complete distraction for me, I'd be failing in doing my duty to you James, and I ain't going to fail in that, that much I can tell you. Because were I to do, I may as well cease to be, no way do I want to rebel against you, which would be rebelling against the Truth, going against and being untrue to my mandate of existence; na, fuck that James, that is not for 'YOUR' Verna.

So you see what I'm saying?

James: I sure do Verna.

Verna: Yes, I thought you might. However all joking aside, it's all very important James, as you understand, and as for all this business about it being laborious for you to type our conversations and how difficult it is and how bored you feel at times having to write it all down and wouldn't it be better to just channel me and be done with it, that too is just the opinion of others, and they have no idea what you are going through in any moment of your Healing in which you might feel bored and hate the tediousness of having to laboriously type it all, but you don't type every feeling you have, many of which are how much you love typing it all, re-reading it, having a written record, how it has just as many pluses as minuses and with your negative side ONLY being more of what's repressed in you with my helping you to bring it up and out. It's so easy to judge another and jump to conclusions based on a snippet of something someone might say or what you see them do, but you don't know their whole picture, you're not in their life with them, and all of those judgements you are only making based on your own mucked up yuk from your early life, all of which, as you understand James, you are all to heal through the doing of your Healing. 

And you could easily channel me James, you did lots of channelling before you started typing it all out, and we could have a spoken conversation just like this, none of that is any difficulty for you, however with the written word there are other reasons for you personally as to why you want to type it all out, even if at times it has given you the shits. It's part of you, it's what you feel you want to do, so it has to be kept in that context. Whereas for another person, they might like saying it all, it being what they want to do based on the current needs of their soul.

You know how it is James.

James: I'm slowly learning how it is.

Verna: Which is all what your life consists of. And it's your life in this moment at this time. And in the next moment it will have elements of the same and yet it will be very different. And so it goes as you ascend in the Truth your soul wants you to express. And for my part, I have been asked to assist you in whatever ways I can, and so I am and have been right from the moment of your conception. So if you've got anything to complain about for the miserable fuck-up that you've become, DON'T COME BLAMING ME! I only did what I was told to do – Blah, Blah!

James: I wouldn't dream of blaming you Verna, you and my angels are the only ones I've not been angry with, not in the slightest... however now you've said that you've been with me since my conception, perhaps I should be angry with you? So it was ALL YOUR FAULT how fucked I am!

Verna: And you know James, some people might read this and not see that you are joking with accusing me, believing you are serious about my being the cause of all your problems.

James: Too bad Verna, I'm getting better at not caring anymore. Do I have to say IT'S A JOKE at every joke part? People will take much of what I say and get it wrong, they have to, that's what we all do with each other. And as much as I hate it and it hurts and makes me very angry, that's just more stuff in me I've

got to bring out. And unless everyone is Celestial and so true and not of the Wrongness anymore, it's all always going to get screwed up by the remains of the Rebellion.

And what can I do about that? That's all some of what I'm currently working through. Do I try and stop the screw ups, patent all my material, ensure copyright is rigidly adhered to, sue everyone who misunderstands something I've said or written? How can I physically keep such control on everything? I've written so much, people could say, you said this in this book and I'd have to go back and re-read it to see if it was what I said and if it hasn't been taken out of context, and I don't think at this point I want to be doing that all the time. I know when whatever is said to be true, doesn't ring true, so if someone said, which people have already said, that I said this or meant that and it's not rung true, then it stands out and I can deal with that at the time should I want to. However increasingly I'm feeling to just let it go. What other people do with my work or what they say and how they misunderstand, should they do their Healing, then they will uncover the Truths as I have, for themselves, and only then will it all come back into alignment with the truth. And as more people become Celestial, then slowly they will purge the world of all the untruth, including I guess, that which I've written and people have screwed up. Look at the job humanity has done on Jesus, how much we've taken things he's said, and even recently through Mr James Padgett, and mucked them up (Padgett Messages 1914 – 1923). However through our Healing we can sort it out. And ONLY though it – that much I now understand.

Verna: It's true as you say James. And you can only deal with it at the moment, in each moment; and in one moment you might feel you want to try and sort it out, in another moment you might not want to. And as to why the difference, you can find that truth out through your feelings.

James: That's right, which I'm still slowly coming to see for myself. And such instances happen every day, so do I want to express that part or not; do I want to work to uncover the truth of those feelings or not; do I want to express those feelings or not – say that or not, think that or not, go into those imaginings or not?

Verna: It sounds like you don't need me anymore James.

James: And how do I know if I need you or any of the spirits anymore other than what my feelings tell me. And for now, I still need you, I love knowing you are there and when we do talk. And as I talk to you a lot without writing it all down, I enjoy having our private life together without it all having to be public. I know you're going to be with me right to the end of my life, as I also know that when my life ends so too does yours being a nature spirit, as you will be ready to move on. And as of today, I know that your light will have reached its experiential peak when my life ends, we will have done together all we are to do, and you will cease to be Verna moving onto to being an angel, and perhaps then you might be angel-Verna, one of my personal angels?

Verna: You never know James. I don't even know that myself yet. However it's possible, there's many possibilities which we can discuss, however 'off the record'. Certain things, and more so as your Healing comes to an end, you'll need to keep private, between myself and your spirit advisors concerning yourself and the work you are to do. Not everything is to be made known for humanity's general consumption. There is a time and place for everything. However so far, all that you've revealed through your Healing has been for humanity as you are part of the whole and everyone is to one day to do their Healing. However once your Healing has finished, as it is with the Celestial spirits, you have your own life separate from humanity on Earth, even if you are still alive in flesh, with you feeling less and less like sharing and revealing the higher spirit more personal aspects of it. The Celestials you can feel are reticent in sharing all their more intimate details about their Celestial lives, it's not for public scrutiny by a humanity on Earth and in the mind Mansion Worlds that is living in denial of such higher truths. So they limit what they impart to you about themselves and their lives.

James: I want to change the subject now Verna if that's okay with you, for as you know, I can only type for so much before...

## **EARTH CHANGES**

Verna, a Nature Spirit: I do understand, and as I've said all I want to say so far, let's move on. You want to talk more about the Earth changes?

James: Yes. I've been listening to a lot of different ideas about it on YouTube, some people saying the latest Big One about 12,000 – 13,000 years ago coming about because of meteorite impacts, others saying it resulted from a reoccurring micronova from the sun, others saying it's because of the galactic wave impact which is possibly related to the micronova, others saying it's from within the Earth itself, some saying it's a very predicable cycle and linked in with the Pole Shifts or even causing them or they being part of it, some saying it's just a one off, yet with such one offs happening periodically to the Earth. And I'm not going to ask you which is it, because I think I know your answer, however I want to talk more about it with you concerning specification and how that comes about. The last Shift saw the loss of many species, in particular the mega fauna, which seems to have happened only at certain times and possibly not with every cataclysmic Pole Shift, which makes me think perhaps not each Shift is as bad as the other. Certainly they are all bad compared to how the World currently is, but not always as cataclysmic enough to cause the loss of so many species and the wholesale destruction of human civilisation that has obviously happened at other times. So how does it all work; can you please shed more light on that for me Verna?

Verna: There is a cyclic Pole Shift caused by various factors, internally from within the Earth and externally from the Sun and in relationship to the whole Local Universe, all of which has varying impacts upon the surface and inner Earth, and including the make-up of the outer forces surrounding the Earth. For example, a satellite in orbit currently around the Earth might not be able to remain in orbit or remain functional in orbit after the next Pole Shift, it depending on many factors that would influence the upper atmosphere and levels of space of closer proximity to Earth. (Notwithstanding its destruction during the Shift anyway.) So what existed in one age, the varying frequencies on all levels that might affect the Earth and influence the impact of the sun's light, might not exist in another age, and as to how much it might change, if it does at all, varies between ages. And the same happens on the physical Earth, and in the whole solar system, and on all the other planets, so there are a lot more factors for your scientists to study.

What I am leading to in answer to your question is, there are two levels continuously affecting the Earth and humanity and all life on the planet: The physical levels, and the deeper underlying and determining spiritual levels. The natural physical world is evolved (created) to respond to all the higher spiritual influences and so frequencies of light that govern its evolution, including the evolution of life on the world and humanity's personal evolution.

So certain spiritual influences are present when life begins on the world, those influences affecting the Life Plasm brought to the world by the Life Carriers as you've read about in The Urantia Book (TUB).

So a world is designed to carry and support the natural life in accordance with the eventual needs of the humanity that is to reside upon it. And once the humanity begins to express itself, then that world continues its spiritual evolution and related physical evolution to enable the humanity to grow and develop as required. And in the case of Earth, to include and support the unloving and negative influences of the Rebellion and Default.

So at various points there are what we call confluences of specification which are enabled by the Pole Shift or meteor impact or times of other severe light, waves, of varying sorts that come from the deeper levels of the Universe. So when all of these factors coincide, we nature spirits, knowing in advance what to expect, plan for the extinction of certain species and the materialisation of other ones. And sometimes we do

literally instantly materialise a new species, or many, all readily expressing certain potential inherent within them, and at other times we evolve new species into being, and sometimes we do both together. So there's not just one way of how a new specie comes into being, however there are times when it's more conducive for us to act, with the last Pole Shift being a major confluence of such factors, so you saw the all but instantaneous end to many species and the emergence of others. But as you've deduced, that doesn't happen with each Pole Shift, and mostly there are many Shifts between such large changes of specie evolution, with one such big one being the impact of the meteor that killed many of the dinosaurs and the Pole Shifts around that time too.

The main thing I want you to see James, is that the species that have lived and will live on the world are SOLELY FOR HUMANITY, even those that have lived many millions of years ago. They have all been part of the world, all affecting in different ways humanity during its different ages, between its spiritual ages and physical Pole Shift events.

Which brings me to another point, that the spiritual influences (ages) can cover many physical Pole Shifts, with the last Shift wiping out most of the spiritual ways of the previous age and starting a new age this Pole Shift age which began with the primitive people's religions and spiritual beliefs, up to and including Mary and Jesus and all that's resulted from them, and now starting to include all that you and Marion are introducing, and possibly moving into the next major Spiritual Age – the Avonal Age. However, as to whether or not the beginning of that Age is to be preceded by another Pole Shift, or begins with the Shift, or if a Shift is to come once the Age has officially started or at the end of it, I can't say, that's to be revealed to you at a later date.

We nature spirits are the sole coordinators of the physical specification of the world. Species don't come and go or continue to exist without our say so. We are the 'spirits of nature'. So because **nature itself is unlike you, it not having an actual spiritual life or spirit body in which it continues to live in and advance once it dies**, so we play that role for all the creatures and plants. In a crude way you could say we nature spirits are the spiritual template for the natural world. And we even oversee the construction and destruction of the minerals in the Earth that comprise the rocks you are familiar with. We oversee the natural oil production within each Pole Shift age, together with how many diamonds and the amount of gold for example is to be made available to you, and all the rest. We coordinate it all in accordance with the dictates of the Life Carriers and higher overseeing angels. So all you have in the natural realm for each Pole Shift age, all you need to help you explore and express yourselves on all the levels as determined by the spiritual requirements of your soul, we provide for you together with our angelic helpers.

So we ensure those species survive the Shifts and to what degree, just as we provide the ending of the species and the bringing into being of new ones, and really on the most personal level, in a way we determine when a plant or animal dies and when another is born, however it's not that we attend personally to each and every life form in the natural world, however on a spiritual level we do, if that makes sense.

And we do by ensuring we adhere to the various higher spiritual Laws that are in place, and when we do, so everything works according to plan. And then because of the disruption of the normal order of things because of the Rebellion and Default, we have been called upon to make other unforeseen changes, and still are making them.

**Humanity is currently making a right mess of the world, you are killing off just as many species as are naturally ending at this time, and mostly you don't give a shit about it.** You are so disconnected with nature, you believe you love it because you plant a tree in your garden, however for the most part, even including the primitive and more closer to Earth people, you don't understand anything about it or your true relationship with it. And how can you when you hardly understand anything about yourselves! For the most part you don't even understand that you're in rebellion, that all of your religions and spiritual systems and ways of life are rebellious and working against nature.

You believe people like your Australian Aborigines were more in touch with nature because they didn't seemingly destroy it as much as the white man invaders have done, however they weren't, not spiritually speaking. They hunted and gathered and did a minimal amount of farming, but they still didn't understand about our connection with the World, they didn't personally interact with us, they developed their own wayward spiritual beliefs and ceremonies all designed to keep them fully entrenched within the Rebellion in a more primitive way, and it was all still wrong by higher spiritual standards. So the aboriginal culture had to go, just as in the end so will the white man culture, as people of all races who do their Healing and who do work more closely with us nature spirits will end up doing. But that's still some way off and there's a lot of spiritual awareness awakening that needs to happen first.

So, in one way it seems like the aborigines were closer to nature and the natural world, which they were in their more primitiveness, whereas they weren't in a spiritual sense. And this confuses a lot of people, attributing more spiritualness to them than should be, as their beliefs are no more or worse than any others that are rebellious. And so shouldn't be held in higher regard. They can of course be appreciated like all spiritual and religious beliefs for being an expression of truth-denial and the Rebellion, should one want to appreciate such wayward beliefs, however that's not where you are focused James.

And the thing about bringing new species into being, we construct environmental scenarios in our plane (3<sup>rd</sup> Earth plane) that simulate how we intend such species coming into being and interacting with other species on Earth. And we do all of this within the pattern given or afforded to us by the Life Carriers. So, we are the ones who actually construct the 'look' of the new specie, as it complies with the intentions of the Life Carriers. Nothing is willy-nilly, everything has a specific purpose and many niches to fulfil, even if the specie itself has little to do directly with humanity; yet indirectly it being part of the overall natural ecosystem of Earth, it does. And in our 'preparation of species' we factor into them the genetic variation that humanity can potentially work with, all of which is designed to provide you with the experiences people require.

And how we actually materialise the potential specie in our plane and then materialise it on Earth, should it be one that's to instantaneously come into being, is done with the help of our angelic advisors, as we nature spirits can't actually create or de-create anything, that being what the angels do. So, we design the specie in accordance with the plans we've been given; and then also in accordance with our angelic supervisors and when we are ready to have it in existence, first within our Earth plane (third Earth plane) and next actually on Earth, the angels do it.

We have a vast section or sub-plane if you like within our Earth plane in which we can simulate new species either within the world as it exists or within the world as we predict it might be post Pole Shift or whenever the next major specification event is due to happen. And you see, we have thousands, even hundreds of thousands of years in some instances, to work with these new species, with many of our number being solely responsible for such specification and they having little to nothing to do with humans either on Earth or in spirit.

So these areas are what we affectionately call our 'labs', the laboratories in which we undertake specification. We have seven such major sub-planes within our Earth plane that surrounds your physical world, and four of these sub-planes are given over exclusively to the 'development' of species. And I say development like that because it's all done with light, not as you might imagine. We don't, for example, set out building a new specie from the DNA upwards, cell by cell and so on to what sort of feathers and their colours the new bird might have. We do it all with light, and were you to come into our planes and look at how it all works you'd not be able to relate to it as we do. We can see you as you see the world and as you see yourselves, and we can see the world and yourselves as we nature spirits see it and yourselves, that being how angels see. And that is in light, and with light, and it's very hard for us to describe what that actually means because you are not a nature spirit or angel. And as you can vaguely see or imagine

seeing auras for example, and sensing them around all living creatures and even inanimate rock, so far as what we see as what we'd call the aura is hundreds to thousands more times more intense and deeper than you'd ever be able to see. And this 'universe of light' is really how we have our being, by our coming and relating to you, James, and looking at how you see the world is very different for us, it's interesting, but it's nothing compared to the beauty and colour and light we constantly live in. However, each to their own, and although you mortal souls are slow on the uptake, say in this area, by the time you attain Paradise you'll be able to soul-perceive such light like we can, so you'll get there in the end.

James: That's reassuring to know Verna. So we seem a bit dim to you nature spirits?

Verna: That's an understatement! James, you were amazed at viewing under crossed polar light the minerals in the common stones you were looking at in the thin sections during your geology course at university, you were in awe of the hidden beauty, well that beauty is a micro amount of the beauty of light we see, exist in, have our being in, and are of ourselves. So we see specification like some sort of amazing computer simulation you might be able to imagine, and yet for us it's not in a computer as such, it's all very real, the as yet unrealised or unearthed species are very real, they are in existence although not physically so, nor are they actually alive and so won't die, yet for us it's like our 'living imagination' if I can put it like that.

So we control the specification of Earth, and until you understand that, your scientists and religious thinkers will keep coming up with all sorts of explanations about how it's done, none of which will be anywhere near the truth.

And the other thing you might like to know when you ponder the amazing complexity of species, they themselves and their interaction with all other species, is this sort of thing, dealing with the complexities of such interactions, is our and the angels' speciality, it's nothing for us to design and work within them. Holding the whole complex nature of the physical Earth and its relationship with the spiritual realities is nothing, we can see it in our minds, work directly with it and within it, it's effortless. You wonder how can a bird know to migrate along the chosen path it does, how can it follow the magnetic lines aligning itself with the stars in the night sky, and yet keep going even when cloudy, unerringly homing in on its other home on the other side of the world? And yet for us that's nothing, to get creatures to do anything we want them to do is effortless. All the creature world of Earth is immediately responsive to us nature spirits, we're more evolved than it is, so we can make it do whatever we like, as can the angels, and in a way, should they need to, make us nature spirits do whatever they want. And we do, only we're more independent of mind, the next step on or up from animals and plants of the physical world.

And some other points I want to add: We nature spirits of Earth are ONLY nature spirits of Earth, and so ONLY concern ourselves with species of Earth. There are other angels, and the Life Carriers of course, who are concerned with other earths and the life on them and the overall synthesis of life within the Local Universe and the localised areas of it. So, for such far reaching angels, and Sons and Daughters of God as are the Life Carriers, they view the whole of Nebadon as one large natural organism of life with each of the earth worlds expressing different aspects of Nebadon's 'personality', which really is the personality of the soul of Mary and Jesus combined with the Divine Minister.

So you can see, the Earth is a whole universe within itself, just as it's part of the Greater Universe. And then added to the material or physical universe, are all the spiritual levels with all their minerals, plants and animals of spirit origin.

And basically I think you'd have to be Finaliter to be able to comprehend more fully the enormity of it all and how one small material world like the Earth fits into and contributes to the whole.

# Finaliter

So, I think that should provide you with a little more insight into how we nature spirits are so far as some of our relationship to your natural world. But as I said, I can't reveal to you how the next Shift or major change will take place, but as you can already see for yourselves, there's already a huge reduction in species taking place. And so, why should this be happening? And part of the answer is of course for you to help see how much devastation and destruction you are reaping on your world because of your persistence with your rebellious and anti-love ways, and part is in preparation for the next overall spiritual age that is to come on your world, with the Avonal Age being part of that, or within that.

James: Yes, I see what you're saying Verna. It's a lot to think about, and really as we have no idea about any of it, I suppose it's how each of us individually reacts to it all through our feelings.

Verna: It is James, as there is nothing else you can do. And as things are setting themselves up for a massive spiritual change, for a vast influx of truths to saturate the world with The New Way, something humanity has no idea about yet could be likened to having a bucket of cold water suddenly poured all over it, so the loss of species on the world will end up being the least of many people's concerns as they struggle to deal with assimilating all the new spiritual information. As John D. delights in thinking, what's a few hundred pages of mostly inaccurate rubbish contained within the Bible, compared to thousands of pages containing very liveable and important life-changing truths you are revealing. It's going to take time to assimilate it all, and it will be simply too much for most people, however small bits and pieces can be addressed as you continue to shed light on such subjects for those people who really are spiritually keen.

THE  
TRUTH  
REVEALERS

James: And you've just added more pages Verna!

# REVEALER

Verna: It can't be helped James, it's what you are, yours and Marion's soul is a Revealer, so all those spirits, angels and nature spirits aligned with you, are all for the purpose of helping you with that revelation. And being Avonals and coming up through the dross, you are free to reveal a copious amount of insight, understanding and fresh truth. All of which John D. can take and do what he likes with – eh John... keeping you awake a little at night are you... no, not at all as you have to keep having your spirit system adjusted at night to cope with your dealings with James.

James: Well thank you again Verna, I need a rest now.

Verna: It's my pleasure James. Plenty more from where this all came from, should you feel the need to ask.

James: Yeah, I'll bear that in mind.

Verna: And so to end, let me leave you with this little bit: Once the door swings open, it's going to open very wide. So until then my dear one, keep expressing and paying attention to your feelings; keep longing for the truth, and keep feeling as demented as you can. Goodbye – Verna of Nature Spirit Land.

Now, these are Environmental Changes of real concern!

# AUSTRALIAN BORDER SECURITY ...

# Light of Truth of PASCAS

COUNCIL of ELDERS

Throughout the evolution of Pascas, Pascas has been gently guided and supported by its Council of Elders from within the Celestial Heavens. All documentation, all concepts, all who have interacted with the forming of Pascas WorldCare and the various arms, have been in response to the guidance from our Celestial Council of Elders – from within the 3<sup>rd</sup> Celestial Heaven. Throughout the coming millennium, our Celestial friends will be guiding and assisting Pascas WorldCare.

**Council of Elders now around 13 soul-groups from the 3<sup>rd</sup> Celestial Heaven**

Communications between the Celestial Council of Elders and those within the physical administration of Pascas World-Care will be via those who complete their Feeling Healing on Earth, as years go by.

## Avonal PAIR Oversight

The administration of Pascas may be also supported in their interconnectivity with our Celestial guidance, through those within Pascas and its administration who are sensitive in their nature and are able to perceive guidance from our Celestial companions on this journey of delivering the Great U-Turn. It is through the nature of sensitivity that Celestial Spirits have interacted with Pascas during decades of formative years and the establishment of the foundations for Pascas for the next 1,000 years.

## LIGHT OF TRUTH

Pascas as an entity, due to the contributions from our Celestial friends, is functioning within the 5<sup>th</sup> Divine Love spirit Mansion World's level. Further, the Pascas Papers that are designated as references for Feeling Healing and Divine Love are within the level of Truth of the highest of the Celestial Heavens. Pascas will be supported in this manner for the coming millennium.

To liberate one's real self, one's will, being one's soul, is by embracing Feeling Healing so as to clear emotional injuries and errors. With the Divine Love, then one is also Soul Healing. We are to feel our feelings, identify what they are, accept and fully acknowledge that we're feeling them, express them fully, all whilst longing for the truth they are to show us.

**FEELING HEALING and SOUL HEALING with the DIVINE LOVE:****James Moncrief Publications:****all publications are free downloads:**<http://divinelovesp.weebly.com/my-free-books-and-free-padgett-messages.html>

It is suggested for one to consider reading as follows:

**Speaking with Mary Magdalene and Jesus – books 1 – 4**

These four books encapsulate the second of the revelations with the first having been introduced by James Padgett one hundred years previously. These four books provide a wide range of guidance that has never previously been made available.

**Soul Light – books 1 and 2**

A Melchizedek, Zelmar, sums up how we are to heal ourselves and ascend to Paradise.

**Paul – City of Light**

As a gentle intro into the Divine Love and Healing; being James Moncrief's first novel.

**Ann and Terry**

An example for people who might want to immediately start working on themselves and doing their Healing.

**Feeling Bad? Bad Feelings are GOOD**

For more understanding about our denial of our feelings and why we should not deny our feelings, and it includes how it all came about for James, using himself as an example.

**Feeling bad will make you feel BETTER – Eventually!**

This includes specific examples of Marion and James working on expressing particular bad feelings, again with the hope that it will help others gain something of an idea as to what's involved in doing your Feeling Healing.

**Sage – and the Healing Angels of Light**

Through Sage who's 13 years old, the story is primarily about the two aspects of healing; that being, with the help of our angels, and the full Healing we can do by looking to our feelings for their truth.

**Religion of Feelings****Welcome to LOVE – the Religion of Feelings****Feeling Healing****you can heal yourself through your feelings**

So these books, including the four Speaking with Mary Magdalene and Jesus books, provide the essence of it all and are examples of James' work. Then it's up to whatever takes one's fancy. Other reading to consider may include:

**The Padgett Messages being published as:****The True Gospel Revealed Anew by Jesus volumes 1 – 4****Book of Truths by Joseph Babinsky****The Urantia Book****Release one's pain through expressing one's feelings.****in conjunction with****Longing for the Truth when also longing for Divine Love.**

## **FEELING HEALING with DIVINE LOVE is SOUL HEALING:**

*A collection of 'papers' that draw together specific topics including all of the above and more from other sources of information and revelation designed to help increase one's awareness about why we have the problems we do and how to heal them, all whilst living a more healthy and sustainable life. They provide a brief snapshot of the more complicated topics and issues.*

**Firstly, consider discovering the truth of your emotional pain through Feeling Healing.  
Secondly, consider longing for our Heavenly Parents' Love as you progress with your healing.  
Primary and most important readings are the writings of James Moncrief.  
Then consider the Padgett Messages, and then The Urantia Book.**

Pascas Papers, being free, are located within the Library Download [www.pascashealth.com](http://www.pascashealth.com)  
<http://www.pascashealth.com/index.php/library.html>

[PASCAS – document schedule.pdf](#)      **downloadable index to all 680+ Pascas Papers.**

FH denotes Feeling Healing; SH denotes Soul Healing, which is: Feeling Healing with the Divine Love; DL denotes Divine Love – living with the Love.
