Messages from Water

Messages from Water

Masaru Emoto, doctor of alternative medicine, from Hado Institute.

Hado, which signifies the world of subtle energy related to consciousness, synonymous with “Chi” in Japanese.

Water, Humans and Earth

A human being appears on this earth physically for the first time when an ovum of the mother and sperm of the father meet each other and become a fertilised egg.

At this time water accounts for about 95% of the fertilised egg, in other words, it is almost all water.

The amount of water in matured human body is 70%.

No wonder it is said that the human body is made of water.

Water, Humans and Earth

People live their lives surrounded by various kinds of water everyday until the day they die.

The earth is called the “Water Planet” and about 70% of its surface is covered with water.

Isn't this somewhat similar to the human body?

Most of the planet's water such as rainwater, underground water, lakes, marshes and rivers is in the sea.

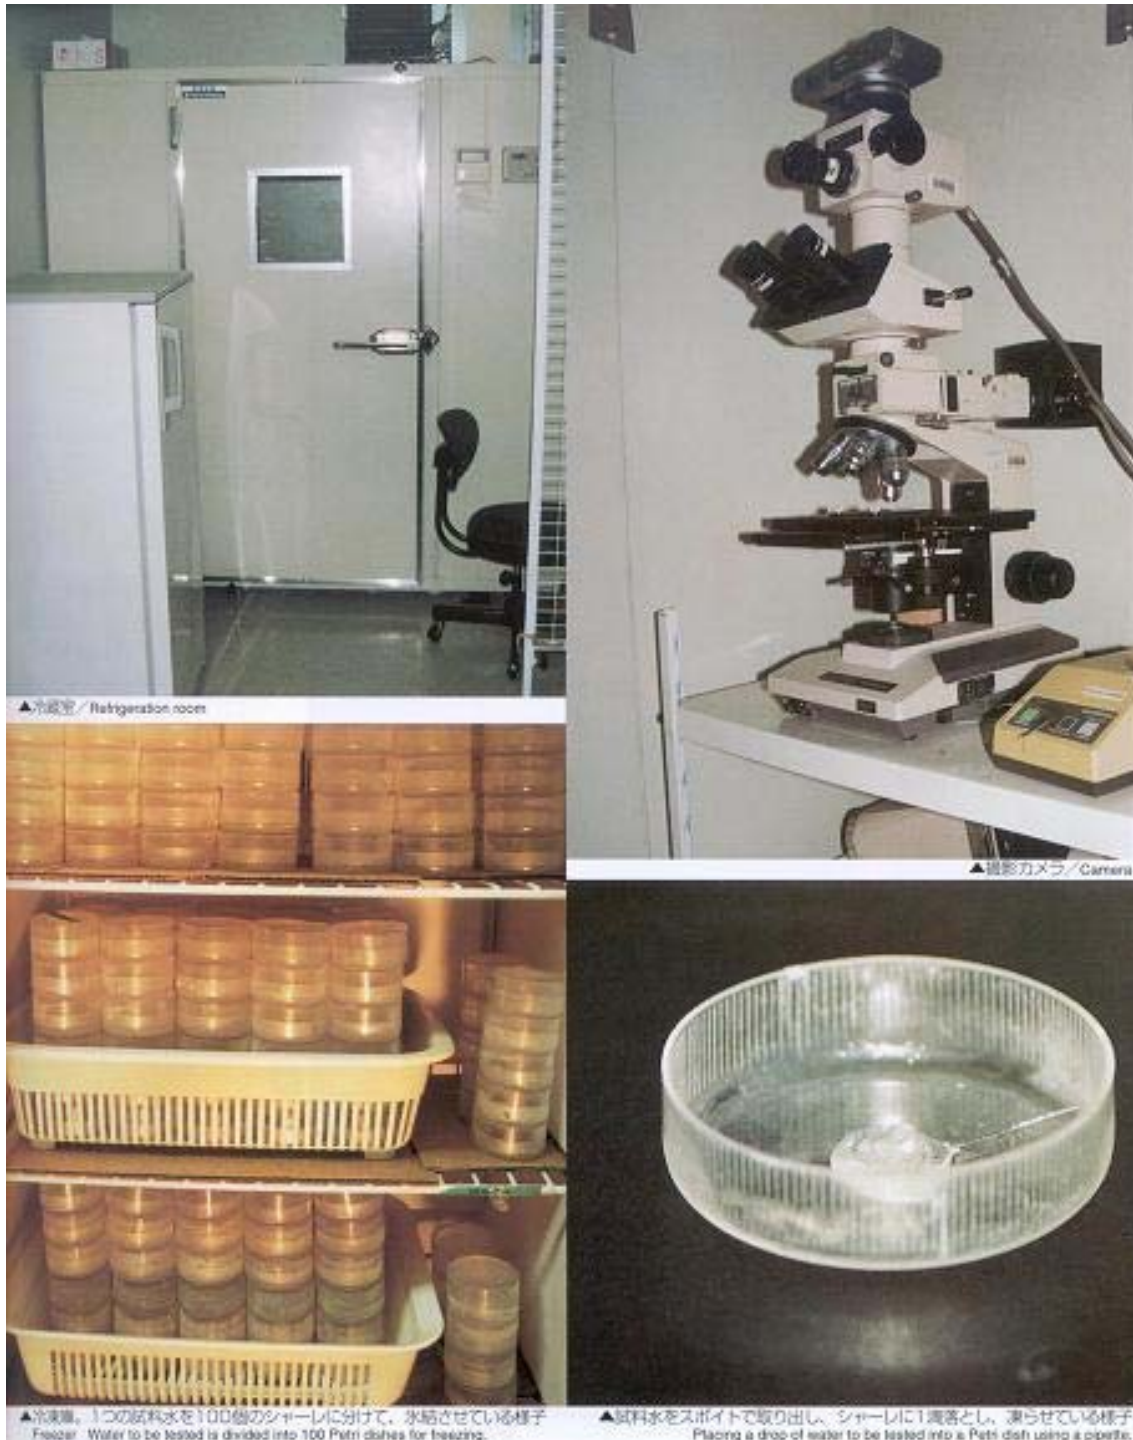

Some water floats in the air in the form of clouds or mist.

Firn in high mountains and ice in Antarctic are also

Originally water.

Process

1. One sample of water is dropped onto 100 Petri dishes.
2. Placed in freezer for two hours.
3. Photographed under microscope at magnifications of 200-500 times.
4. Photography works in freezer at -5°C for maximum of 30 minutes.

Process

When water freezes, it becomes crystallised.

At the moment right before it returns to its water form (with a rise in temperature, between -5°C and 0°C) it creates a shape that is identical to the Chinese character for “Water”.

Did people in the ancient times know this and make the Chinese character for “Water” based on this information?

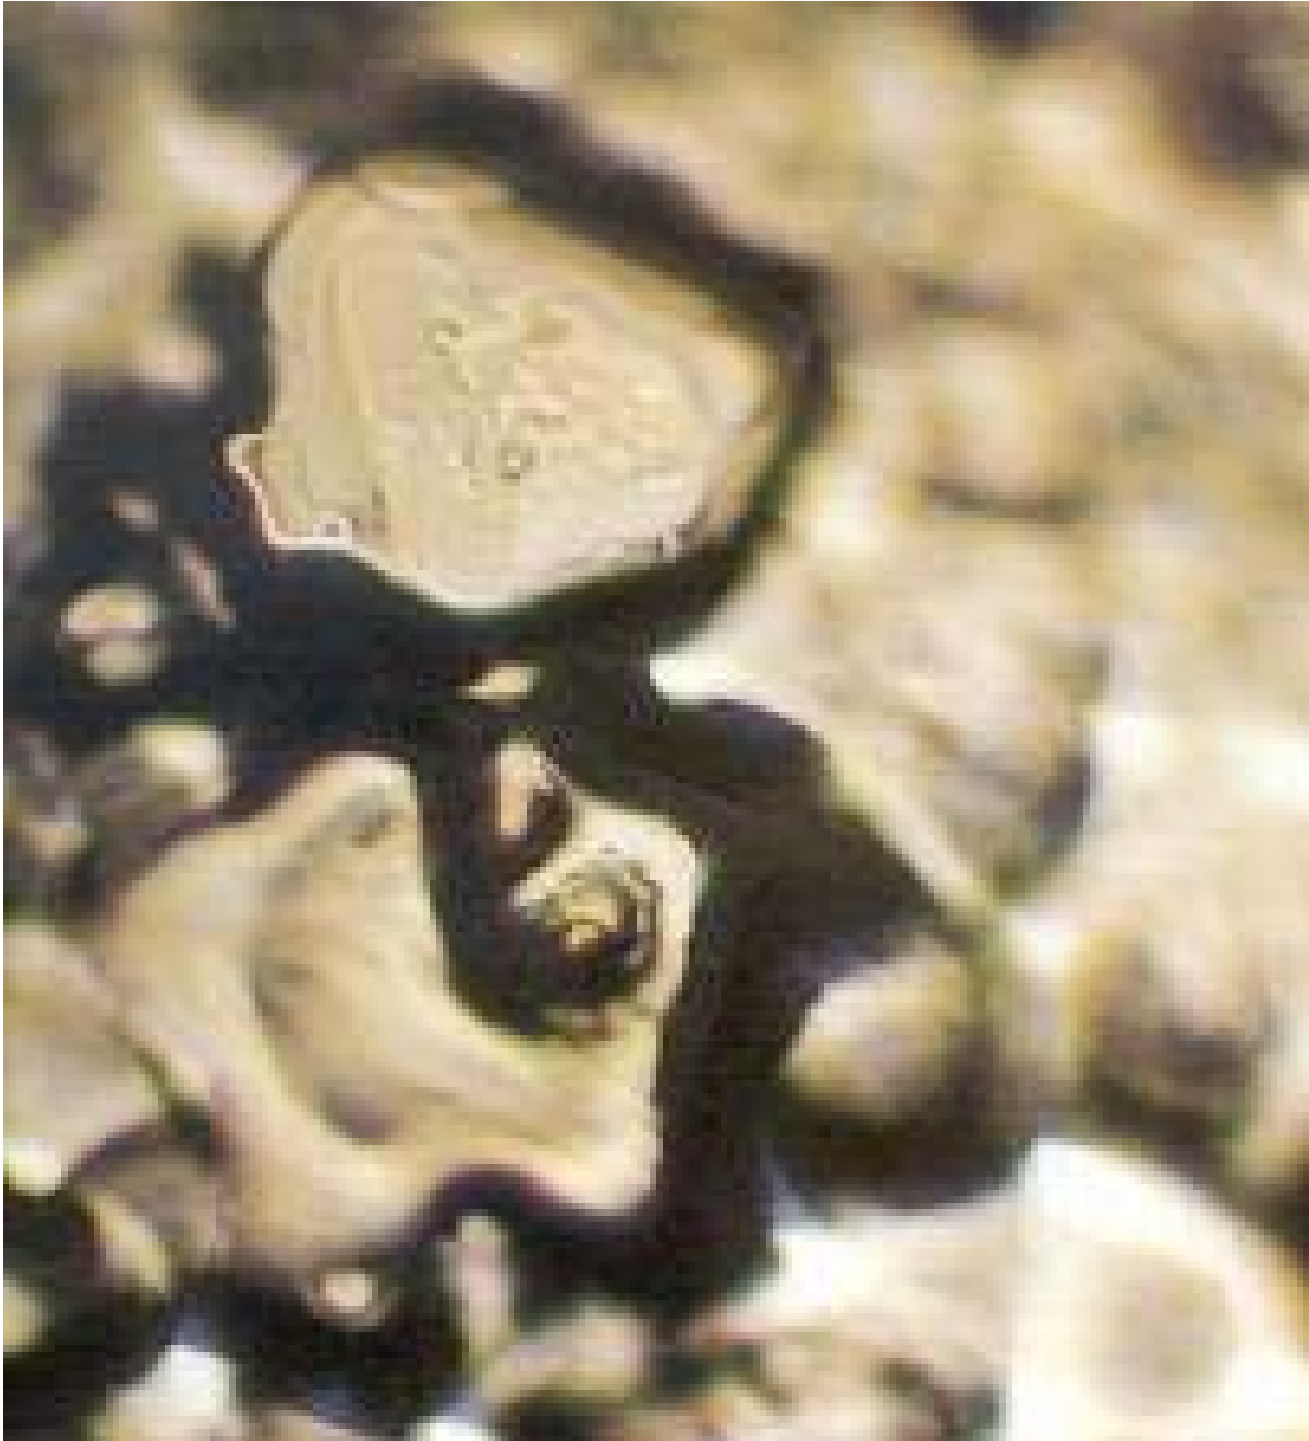

The Chinese Character of Water

Messages from Water

- After seeing water react to different environmental conditions, pollution and music, Mr. Emoto and colleagues decided to see how thoughts and words affected the formation of untreated, distilled, water crystals, using words typed onto paper by a word processor and taped on glass bottles overnight. The same procedure was performed using the names of deceased persons. The waters were then frozen and photographed.

Crystal of water that is untreated and distilled

Tap water before and
after remote prayers

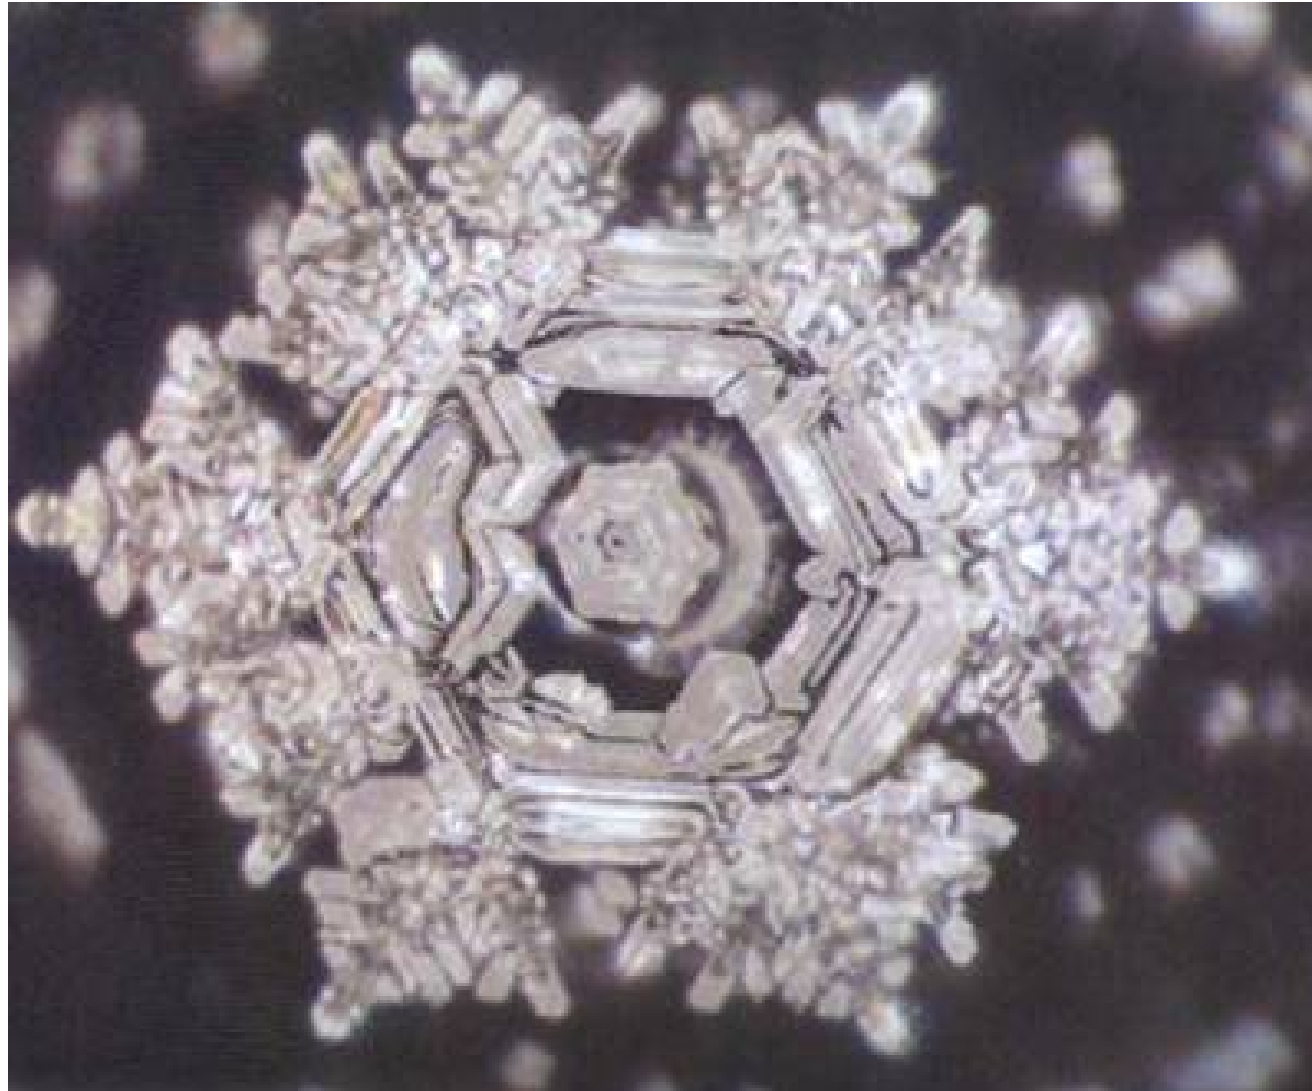

Water crystal of Fujiwara Dam before and after offering a prayer

- After the a water sample had been taken, the Reverend Kato Hoki, chief priest of the Jyuhouin Temple, made a one-hour prayer practice beside the dam.
- After that, new water samples were taken, frozen and photographed. As you can see (follow on photo), the change is stunning--the ugly blob of the former sample has become a clear, bright-white hexagonal crystal-within-a-crystal.

Water crystal of Fujiwara Dam before offering a prayer

Aromatherapy Oil information on Water

- When water is treated with aromatic floral oils, the water crystals tend to mimic the shape of the original flower.
- On right, water crystals were exposed to aromatic essence of chamomile.

Aromatherapy Oil information on Water

Crystal picture of camomile water

Water Memory

- Tap water will lose its memory quickly. We refer to the crystalline structure of water as "clusters." The smaller the clusters, the longer the water will retain its memory. If there is too much space between the clusters, other information could easily infiltrate this space, making it hard for the clusters to hold the integrity of the information. Other micro-organisms could also enter this space. A tight bonding structure is best for maintaining the integrity of information.

Micro-cluster Water

Before and after
immune vibrations

Micro-cluster Water

- Clustered Water
- When we are born, the trillions of young cells in our bodies are filled with a special kind of water. This special water is "clustered" in beautiful, star-shaped molecules.

Micro-cluster Water

- The perfect shape of these water molecules allows them to slip easily through the cell membranes, carrying nutrients into the cells and carrying waste and toxins out.
- This easy passage of star-shaped water molecules in and out of our cells is what keeps the cells clean and young and vibrantly healthy.

Micro-cluster Water

HEALTH BENEFITS OF CLUSTERED WATER™

- Energizes the body
- Hydrates cells and organs
- Helps remove waste and toxins from cells
- Helps boost nutrition absorption

Tap Water

Medical College of Wisconsin's Dr. Robert Morris has been the featured water expert on Dateline NBC.

Dr. Morris and colleagues at the medical center have concluded after examination of ten previous studies of the cancer-causing problems of chlorinated water, "There is a clear pattern between consumption of chlorinated water and rectal and bladder cancer."

It is projected that by the year 2015 the combined death rate from bladder, rectal and pancreatic cancer will exceed the lung cancer death rate due to carcinogens in water and food.

Micro-cluster Water

- Clustered Water™ helps transport nutrients, enzymes, and proteins into the cells.
- Clustered Water™ also helps remove waste products and helps maintain proper communication between cells.
- This allows us to sustain the high clustered water levels so necessary in our body.

Micro-cluster Water

- Even the DNA in each of our cells, which determines how we grow and what we look like, is folded around a core of this remarkable water.
- Photograph of healthy water: DR. LEE LORENZEN

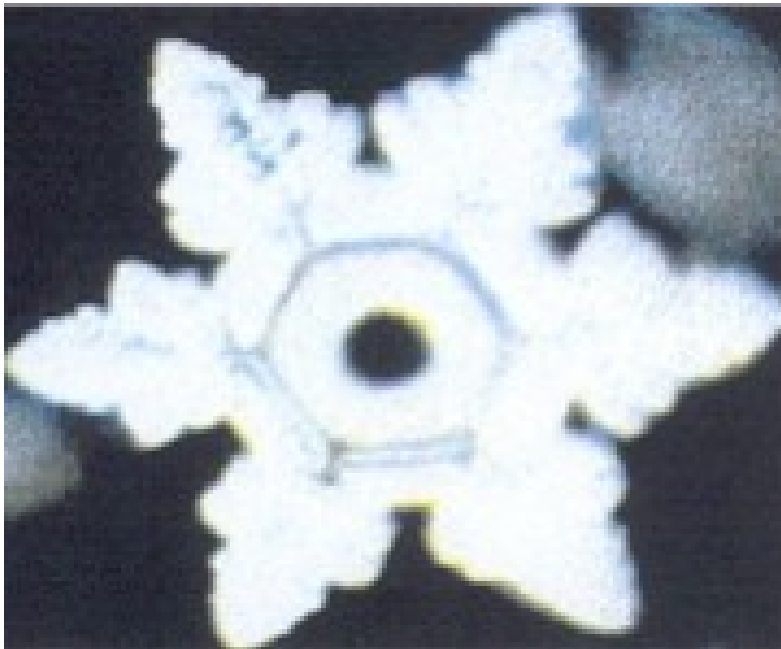

Micro-cluster Water

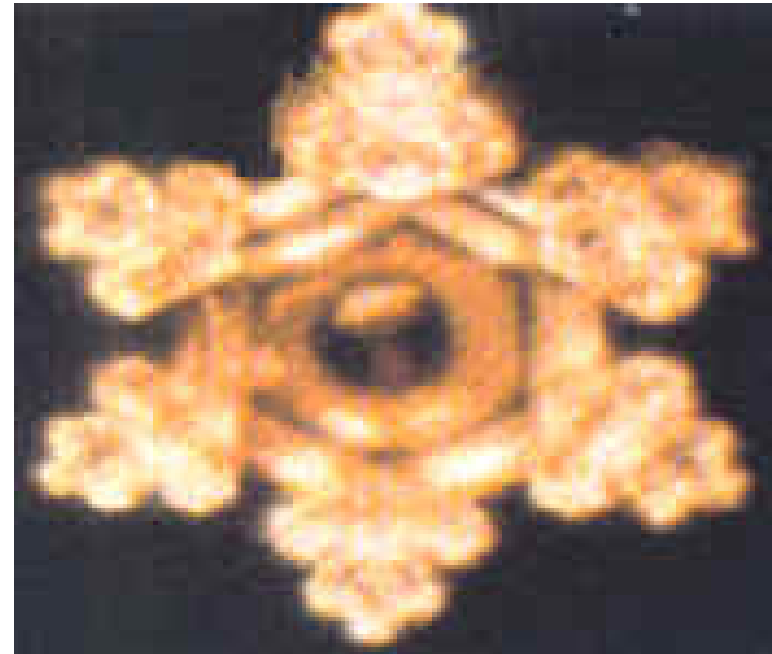

- As we get older, the star-shape of the water molecules changes. Because of stress and pollution, toxins and accumulated wastes in our bodies gradually bind to the water molecules, enlarging and distorting them.
- As the normal clustered water molecules in our bodies get bigger and lose shape, it becomes difficult for water to pass the cell wall barrier.
- The cells of our bodies, once highly lubricated and cleansed with normal clustered water molecules, slowly gather more and more toxins and waste.

Micro-cluster Water

World's Purest Water

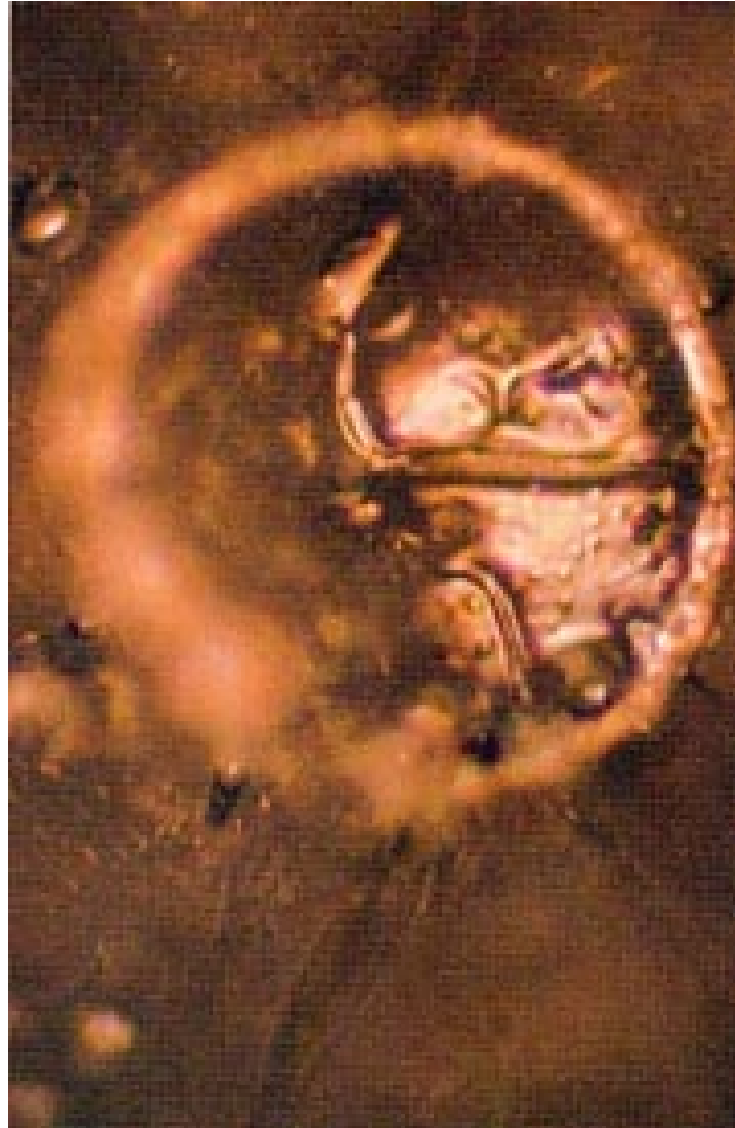

Clustered Water

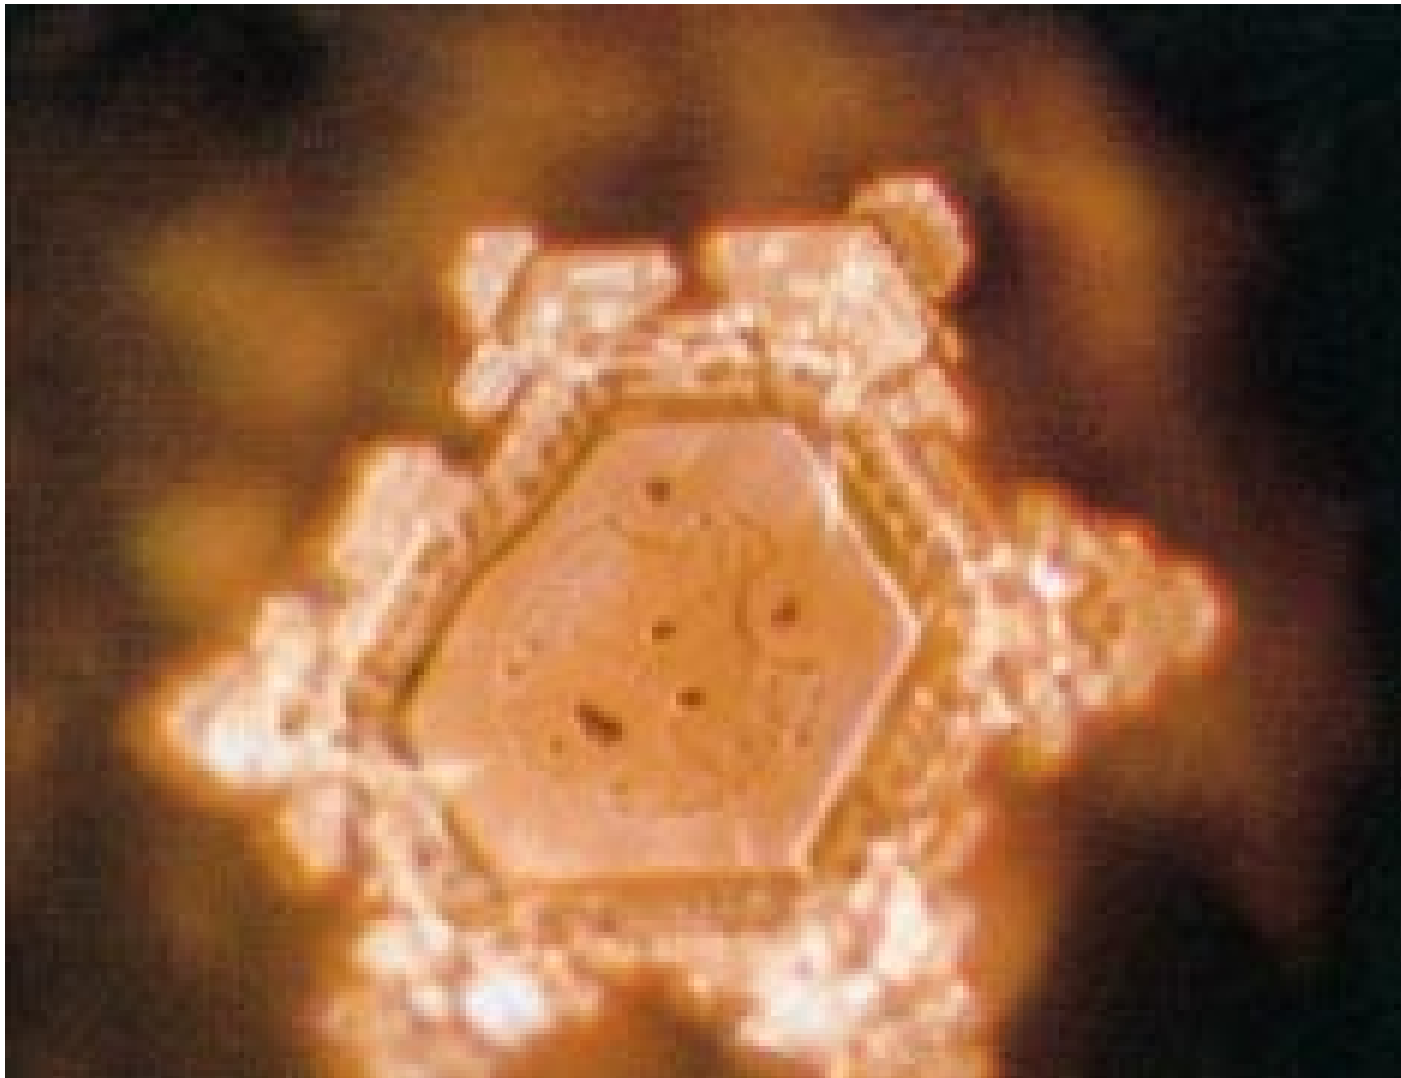

Showing Person's Name to Water

- A person's name shown to water enables the water crystal to reflect the level of consciousness of that person!
- This parallels with the Map of Consciousness developed by Dr David R Hawkins –
Power vs Force

Adolph Hitler

Mother Theresa

Messages from Water

- These photographs show the incredible reflections of water, as alive and highly responsive to every one of our emotions and thoughts.
- It is quite clear that water easily takes on the vibrations and energy of its environment, whether toxic and polluted or naturally pristine.

Messages from Water

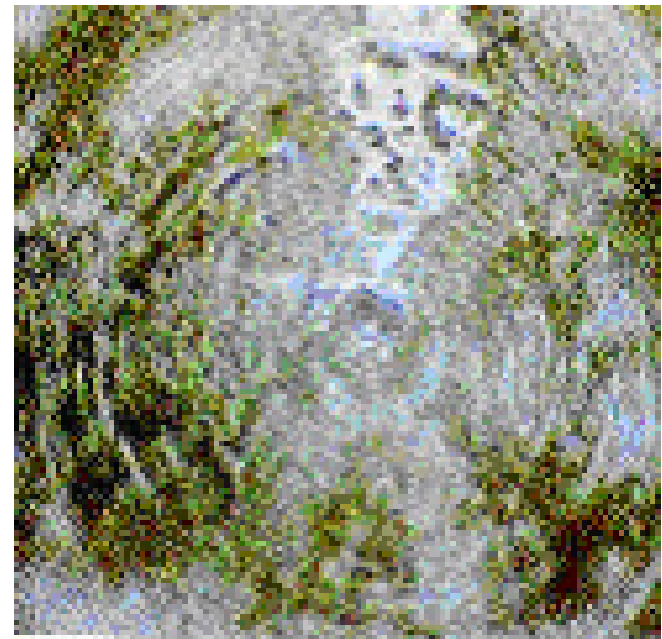

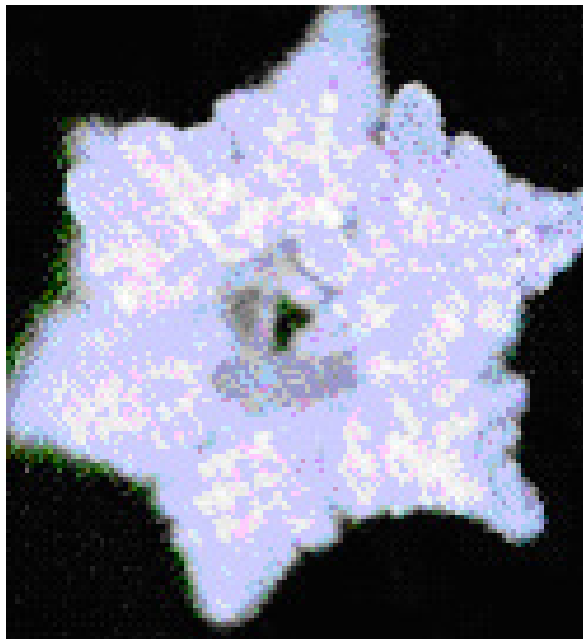

Masaru Emoto's extraordinary work is an awesome display, and powerful tool, that can change our perceptions of ourselves and the world we live in, forever. We now have profound evidence that we can positively heal and transform ourselves and our planet by the thoughts we choose to think and the ways in which we put those thoughts into action.

Messages from Water

- Pure water creates beautiful, snowflake-like crystals while polluted water is entirely unable to form crystals and resembles mud.
- Dr. Emoto followed this by placing distilled water in front of speakers playing various forms of music, ranging from classical to heavy metal.
- Soothing, uplifting music inspired the formation of exquisite crystals, while discordant music forced the water to assume distorted forms.
- He found that positive or negative words and phrases typed on paper and affixed to bottles or simply spoken nearby created vibrations that enacted change in the water's structure.
