## Conduits, Gogs & Wheels

### ASSEMBLE

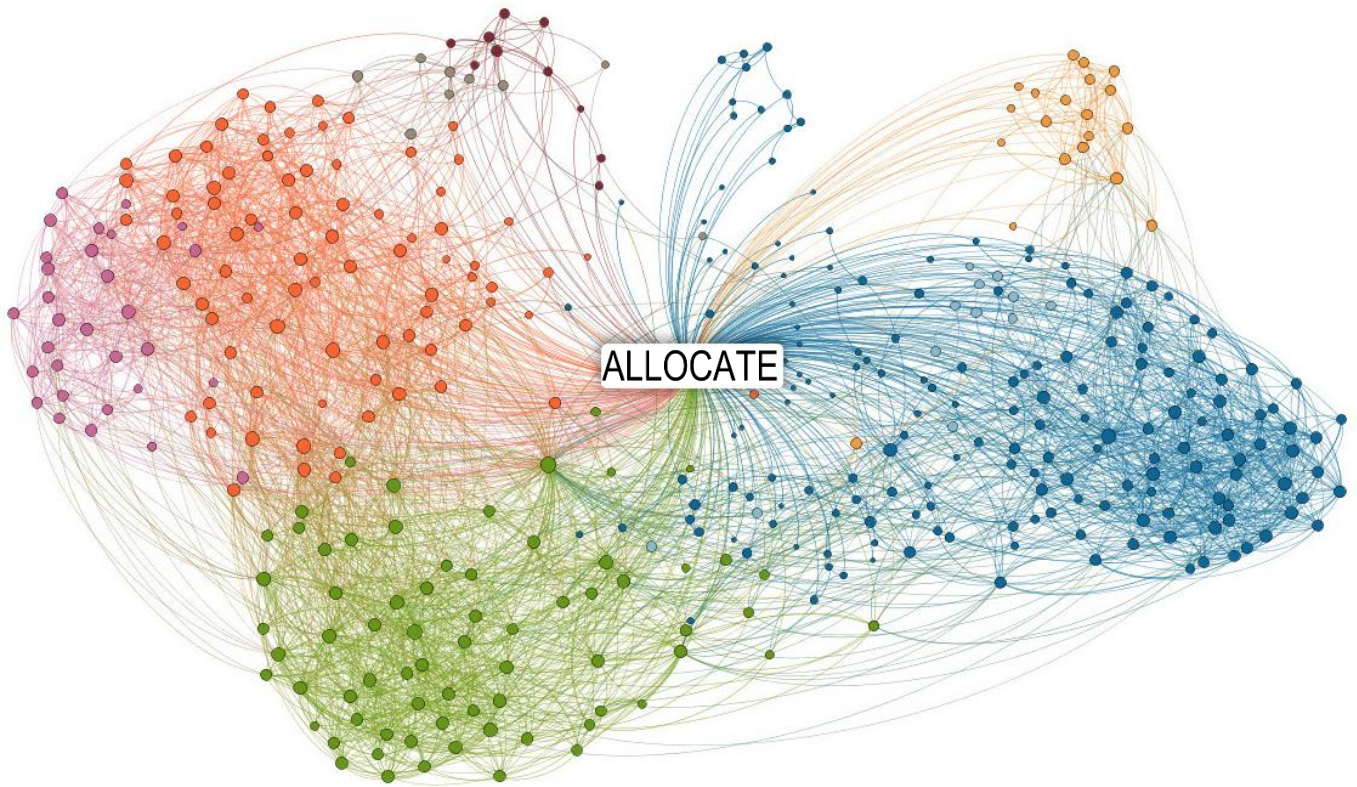

There is this great realisation of decades of work by a few however involving many that is for the benefit of all of Earth's humanity.

It is the drawing together of resources, focused upon humanitarian endeavours, to a central point, with the authority of all involved, to then be distributed through a further central point for the benefit of all nations, societies and communities on an equitable base without anyone's individual ownership and control. This agenda is a global humanitarian program that was envisaged many decades ago and is now able to be marshalled and delivered to all of humanity.

The drawing together of the collaboration from within every corner of the world, then to have all the elements agreed upon, accepted, cleared, legalities endorsed and then the highest levels of oversight of the world confirming support and authorising the initiation of what has required the establishment of the block chain digital global banking system that needed new technology, as well as everything else.

Funds of many now can be assembled through one point and then transferred to a single administrative distribution point for the benefit of every community within every nation on Earth. This is incomprehensible, however a handful of focused people have established what will now become routine.

## **ALLOCATE**

Now it is to the commencement of allocation. Continuing support will unfold for those who deliver.

Focus is upon what is needed that others are not attending to, or to expand upon what can be significantly enhanced with a wider and more ambitious agenda.

There are two levels which coordinate together:

Nation and state, benefitting the government of the country, requiring Public Private Partnership agreement in support of what is agreed to be delivered.

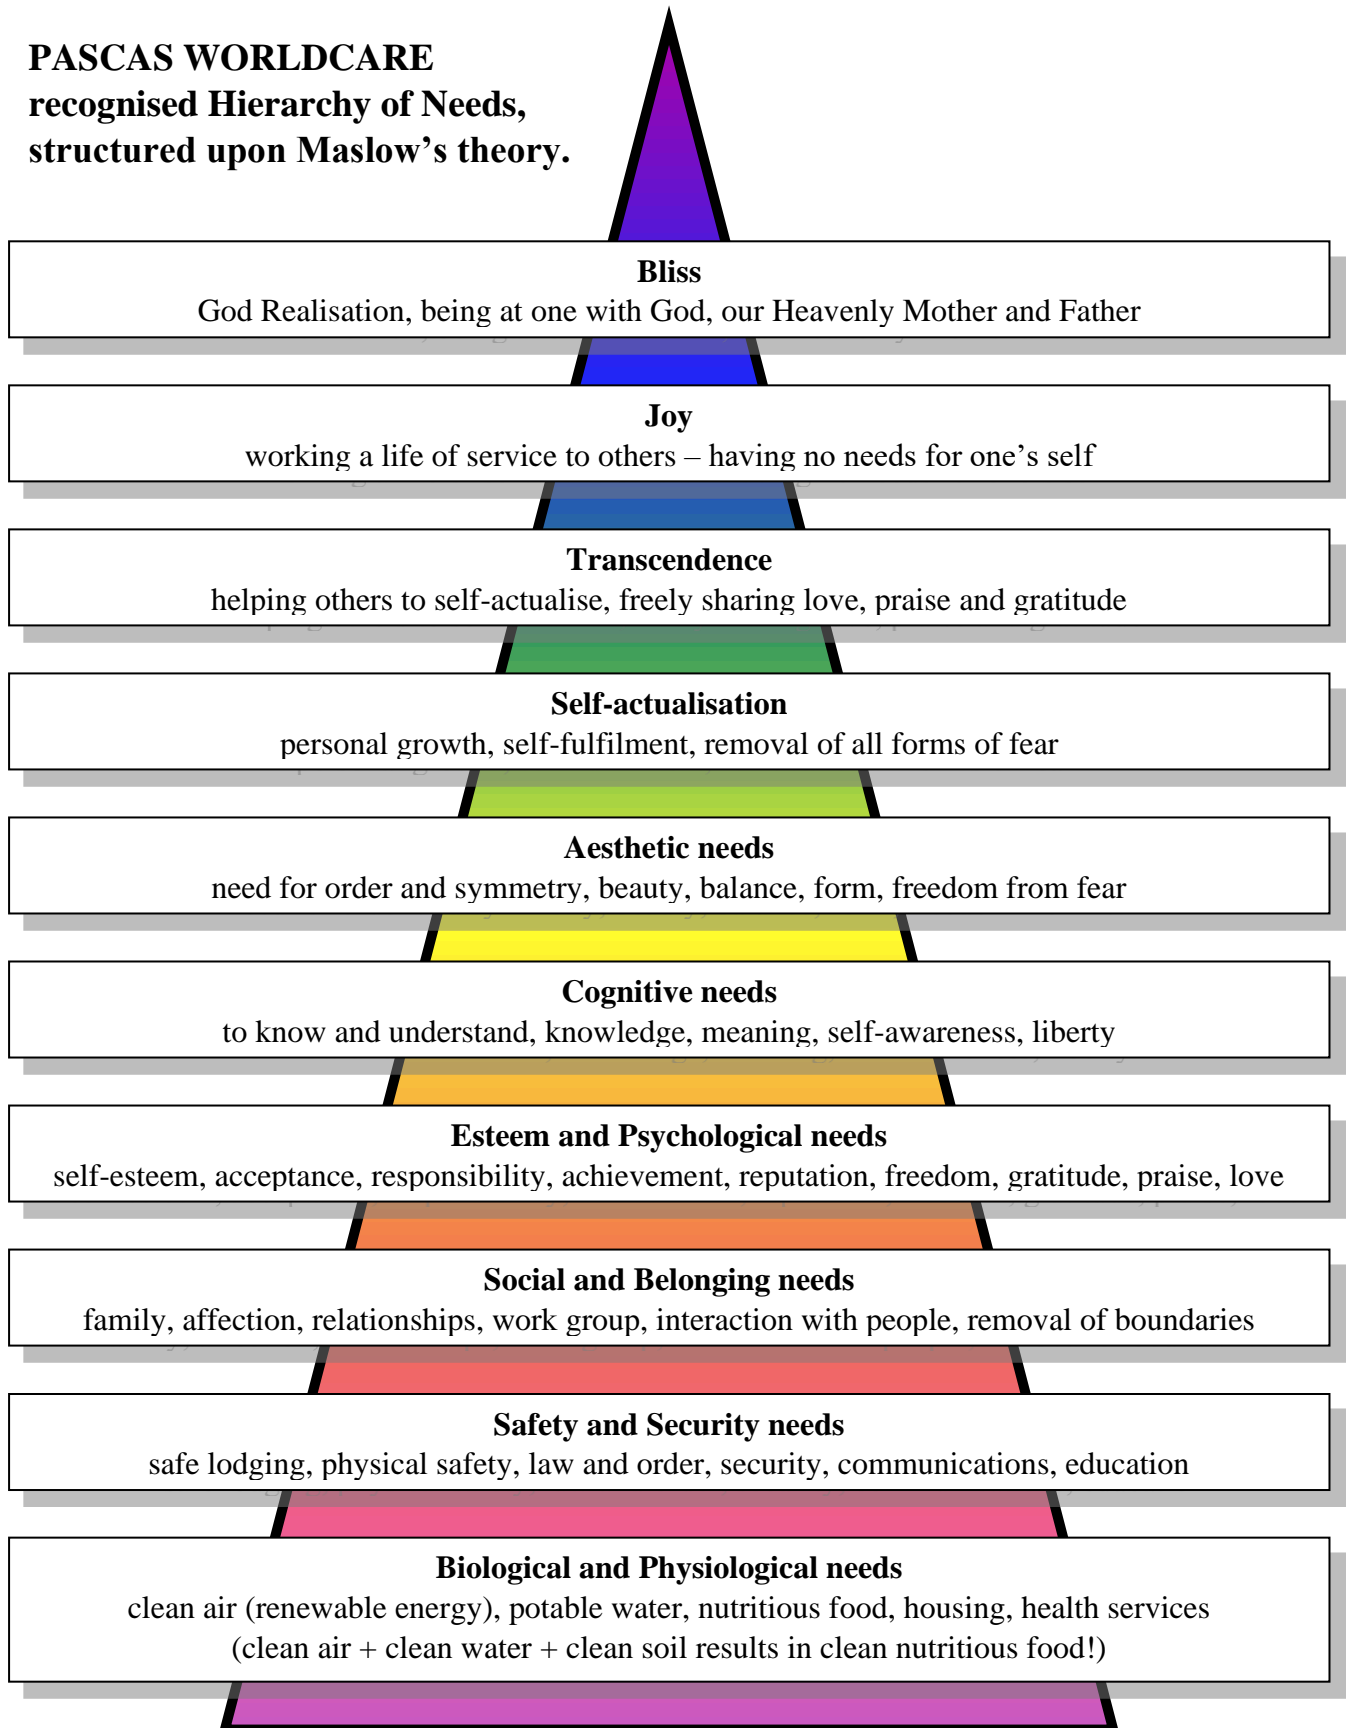

Community and regional projects with the local people driving and delivery the agreed projects all being in compliance with government regulations at all levels.

And yes, cleaning up of the "messes" will be challenging but not overwhelming as deliver will be accompanied with model documentation; the built infrastructure; maintenance education, etc., empowering the locals to complete and sustain. Involvement of locals at all levels of any program is to be a priority. Locals are to be able to go on and further replicate and apply the skills involved with further programs. Programs are not to be imposed upon locals – if they do not want to be involved then the program being considered will be terminated. Further, projects having people in the locality striving to support and delivering it will receive the funding and delivery support earlier than others.

Major infrastructure projects will always require government involved.

Localised community projects are to be local community driven with passive government support typically. Education, schools, universities, medical clinics, food security, social housing and community needs are extensive and the diversity of solutions complex.

# Profound Revelations + Global Humanitarian Funds

Great U-Turn  
The New Way  
Living Feelings First  
Feeling Healing

← begins here !

**PROFOUND REVELATIONS**

Yes, we are continually told to look up there when we should be looking down here! We have proven to be very submissive – easily misled!

We have often seen high voltage power grids around our areas. The same applies to our universe. Science has detected literal lines of energy that connect the stars or which our Sun is one such a star. During the second half of the 20<sup>th</sup> century (post 1950s) there has been a power surge received by our Sun which in turn has fed energy into the core of each of the planets within in our solar system. This has caused the core of Earth to increase its internal rotation a minor amount, which has then placed increased tension on the surface of the Earth resulting in increased volcanic activity (mainly under the oceans), earthquakes and the slight warming of the surface temperatures. Global warming is being generated from within the core of Earth. This is a

cyclical event – it is not manmade – though we need to continue in our endeavours to reduce pollution.

**How much else have we been misled about? Mostly everything!**

# We are TRUTH SEEKERS!

The first event that you may note above is that on the 22 March 2017, negative spirit influence was blocked by the Celestials from within the first of three Celestial Heavens spheres. The Celestials have not taken the place of the mind Mansion World spirits. Since then we of the physical have begun to notice an ever increasing array of incompetencies by leaders around the world. Leaders have been totally left to their devices and have now been found very lacking. Their spirit help has gone away!

This is to continue for maybe around three decades! We are to endure this for as long as it takes for us to push for a better way. We have to take the lead and demand a change that is a more progressive way of living than what we are enduring. We are to realise how and what kind of mess we are in!

## Feelings First with Mind to follow in support.

As we have all been guided to live mind centric, we are essentially living our mind's addiction for control, control over others and our environment. Thus spirit personalities continue control over others (or did until 22 March 2017) through influencing people who are in the physical. Our minds also cannot discern truth from falsehood and are addicted to untruth. Consequently, every society around the world is now in shambles.

As we progressively begin to aspire to live feelings first and then commence our Feeling Healing then we will begin to abate the insanity that is being demonstrated worldwide and even open the doors to connectivity and communications with our Celestial Spirits who are so eager to assist us in our endeavours to end the indoctrination we have each absorbed that has been going on these past 200,000 years.

## Health of all of Our Bodies

**SOUL LIGHT emitted is to be BALANCED by the LIGHT RETURNED!**

**Two separate personalities on parallel 'circuits' having the same soul.**

**What impacts one personality does not impact the other personality.**

The elephant in the room is our Childhood Suppression, from conception through to age six years. This impedes the circulating flow of soul light thus bringing about imbalances throughout our spirit and physical bodies. This manifests as discomfort, pain, illness and disease throughout our lives. All 10,000 identified diseases are of the consequence of Childhood Suppression in its numerous formats.

We are to express our feelings, both good and bad, to a companion who is open to hear what is coming to surface for us. We are to long to know the truth behind those feelings. What enters us emotionally is to be expressed emotionally. This is our Feeling Healing. This is the one and only pathway to bring about healing and harmony throughout all of our bodies, including physical.

**Dr Abigail Marsch's blog** commences on page 32 and **Samantha's** review is on page 80:

### **Dr Abigail Marsh's Blog of March 2022 – observations by Samantha McCabe**

20 October 2022

I have listened to the audio with Dr. Abigail Marsh and feel very sad for the children and adults who have these Psychopathic tendencies, I feel very hopeless for them because the professionals that are trying to help them are not truly on their side but on the side of the parents. They are not seeing the helpless children that these people once were because they won't accept that it is wholly because of the way they were parented, they won't blame the parents so who do they blame then!! It must be the child. These children have been completely desensitised from their emotions from a very young age and cannot feel fear, empathy, sadness or love for anything and this can only come from being desensitised from these emotions in early childhood by their parents, they weren't just born like it, they weren't just born bad, they learnt to be like it by their unloving, uncaring, un-empathetic parents, it is that simple and if these professionals stopped avoiding it and stopped protecting the parents, the truth would be easily seen as to why these people are the way they are.

The interview goes on to say that it is highly difficult for the parents of these children and how do we help the parents deal with this!! It is all about helping the parents deal with this awful naughty child that won't behave and be how the parents want the child to be. This is all about making it easier for the parent who can't figure out why their child is such a disappointment, so unruly. The professionals are backing the parents in this so how does the child have any chance when even the professionals are on the side of the parent and the child is the problem. The problem has to be with the parents and their parenting. The parents have to be confronted and the professionals won't do this.

**Dr Abigail even says it in this interview "The most effective treatments tend to be some combination of training aimed at how parents respond to their children. And I say this with caution because it's too easy for people to assume that if you are addressing parents' behaviour to help treat the condition, that it's the parents' behaviour that caused the condition. And I think that's a huge myth I'd like to dispel. We know that behavioural therapy, a lot of it administered by parents is a really effective treatment for children with autism. You have to use very specific kinds of interpersonal behaviours to help them develop. But we don't think that parents cause autism, or at least not anymore, right? We used to think that. This used to be just accepted wisdom in psychology that refrigerator mothers cause their children's autism. Unfortunately, we're still in that place with psychopathy where a lot of people assume it's the parents' behaviour that causes it."**

I feel that these Psychologists won't put the blame on the parents because they were not allowed to put the blame on their own parents, they are still not allowed to think of their own parents as being wrong and confronting their own parents with the results of their unloving parenting and the affects it has had on them as adults. It is like upsetting our parents is the biggest sin but if Psychotherapists have this issue still within them then the roots of these disorders will never be found because the professionals will not confront the parents because they couldn't confront their own parents. If you want to know why a child is

the way it is, then psychotherapy has to begin with the parents. The first course of therapy has to be aimed at the parents and they have to be confronted with the truth of their own childhoods to find out why the child is the way it is. We have to stop trying to spare the parent the blame, we have to stop pandering to the parents, it is like spare the parents and blame the child and it is all wrong. The child has been taught to be this way right from conception and its teachers were its parents.

I know this interview with Dr Abigail Marsh gives the impression that the child is important but when I listened to the Audio, I felt that this isn't the case and too much importance has been given to not blaming the parents, to me, they are 100% to blame for a ruined child who grows up to be a ruined adult. We all have to confront our denied and suppressed childhood feelings to end this hell loop we are all living of passing on our pain to our children. We all have severe psychological disorders and are prisoners until we allow the release of our denied and suppressed childhood feelings, we will never be free until we confront this within us all.

The interview goes on to say that these psychopathic children are fearless and have never felt afraid of anything and don't respond to punishment through fear and all of that has to be felt through. Why don't they feel fear, are they using the lack of fear as a source of regaining the power that their parents took from them continuously as young children, is their lack of fear their superpower against their parents, are they so terrified as children that they no longer allow themselves to feel fear as a defence mechanism, has fear been so denied and suppressed inside of them that they block it all out so they are now numb to it?

The truth of this fearlessness has to be known and it will only be known through the feelings of the child involved, and it will be a terrifying process to bring all of that terror out, to accept it, to express it and to finally know the truth of it and where it originated, and its origins will be in its early childhood at the hands of its parents.

Huge resources don't need to be thrown at this; just the right communication needs to be given to the child. The child was a helpless little child with no one to talk to, no emotional support and this is what is needed, the right communication and for its feelings to be taken very seriously indeed by its therapist but if the therapist hasn't taken their own feelings seriously about their own childhood denied and suppressed feelings, then how are they able to help a child with the right communication. Medication is not the right communication, this is just more denial of the child's feelings, more of letting the child know that there is no hope for it so let's just medicate it away, this is what they did to me when they told me I had psychosis as a late teenager and I felt hopeless, like even the professionals didn't know what to do with me and it makes you feel like ending it all. **The right way to tackle this is with the right communication, the communication of the feelings and what they are telling the child, I would have felt such a relief to have been listened too!**

The interview says they are focusing on new and more effective treatments of Psychopathy including brain imaging and I feel that this is all so mind driven, and that of course is what drives the medical professionals in their research but for me it is all such a waste of resources. This isn't about the mind leading the way, this is about the feelings leading the way and telling us the truth about how we feel and expressing that. A brain scan can never do that, our feelings are more advanced than any piece of technology available or that will ever be discovered. The feelings will tell us the truth about how we feel and that is never wrong, all it takes is the right communication and someone willing to ask the questions and then just listen, the listening part being the most important because these children haven't been listened to, just told that they are broken and wrong.

Dr. Abigail Marsh says that at least 50% of every psychological phenomena is heritable and the same goes for Psychopathy but throughout my healing I can trace all of my pain (pain I use as the word to describe a whole umbrella of feelings) back to my childhood and the way I was parented, so I have to disagree with 50% and for me **it is 100%**. It is still like the medical professionals don't want to 100% blame the parents for a child's psychological disorders and it makes them feel better to put it down to 50% heritable, and what a nice way to put it, 'Heritable' not blaming the parents and the family lineage, sparing the parents the guilt of what they have done to their child, still on the parents side when I say "You, the parents, and that includes me as I am a parent, are 100% to blame for fucking up your child and now deal with it and what you have done to them".

We have to confront the pain that our unloving parents caused us, we have to confront our childhood, and that means our parents will have to do this eventually too. If we don't then our denied childhood experiences become the compulsions and addictions in our adult lives and get twisted and contorted into all manner of psychological traumas that we become a prisoner to. All of this pain needs to be released by the accepting, expressing and the truth of our denied and suppressed childhood feelings being known and no technology can do this for us, we don't even need it. What we need is to be heard, seen and our feelings taken seriously by our parents. If children have no empathy, that's because they weren't shown any empathy from their parents, if a child doesn't show any care, it's because it wasn't shown any care by its parents, if a child wants to hurt and kill, it's because it was hurt and wanted to be killed by its parents, if a child shows no remorse, it's because its parents showed no remorse for the way they treated their child, if a child is insensitive to the pain it has caused, it's because the parents showed no sensitivity to the pain they caused the child, if a child shows no fear, it is because it was so terrified as a child and not allowed to express its fear, it is numb to the feelings of fear because it had to be to save its own life as a child with its parents.

Dr. Abigail says she wants to know more about understanding the human psychological behaviour, for this she will have to go to the feelings and let them tell her the truth, she will have to listen and really desire to know the truth of how her patients are feeling to understand them more and this is the only tool she will need.

Just her, her patient and her patients' feelings and the truth will reveal itself without the mind leading the way as it is right now. Let the feelings lead the way and let them reveal everything about her patient. Just listen and let that person begin the journey of healing through their feelings and the discovery will be disturbing of course, but the most amazing revelation she will ever encounter.

She says she is in the middle of pursuing what it is that makes a person truly care about another, but I feel it is impossible to truly care about another without doing your own feeling healing and caring about yourself first and all of this has to be done with the inclusion of God's Divine Love, the relationship has to be with our original parents, the parents of our soul, God. Through our feelings and with the inflow of God's Divine love we will be shown the truth of how we feel about ourselves and others, and it will be nothing like how we thought, all of the lies will be revealed, and we will know that we have been kidding ourselves into thinking that we love ourselves and others.

Dr Abigail also says that our love must come from the original love that parents have for their children, but the truth will also be shown through the truth of the feelings and that the love a parent has for its child isn't true love, if it was true love there would be no pain, no psychological illnesses, no bad feelings, no illness, no murder in the world, all of these bad things come from unloving parenting being passed down to the child. True and real love doesn't do this; love doesn't hurt, kill, cause illness or take the will of

another. **We really have to feel the truth of what we believe love to be and is it right? Our feelings will tell us the truth, not our minds.**

We have all been born into the default setting of our parent's pain and took that on and believed it is the truth, believed it is us, we have no idea who we truly are but through our feelings and the receiving of God's Divine Love we can begin to know ourselves truly and shed the layers of our parent's pain that we have carried around with us all our lives. The pain that we took on in the womb and have let it become our experience. God wants us to know ourselves the way they know us, before our parents got hold of us, and by 'they' I mean God as our Mother and Father, the creator of our souls, our true and loving parents, only they know true love but you can read about Divine Love and more about our Feeling Healing in the PASCAS library.

Parents have done this damage to their children and expect people like Dr Abigail Marsh to take it all away, when really the child is a mirror of the parents level and condition of love, the child is the truth of how it was parented and it is staring the parent in the face every day and the parent hates it, the parent hates what it has created saying it is nothing to do with me why my child is like this, and the parent wants the doctors to fix it, take it away so the parent doesn't have to look at it any more. If a child was truly loved there would be no need for doctors to fix us because love doesn't do this type of damage, an unhealed parent does!!

**NOTE:** Kindly let it be understood, doing one's Feeling Healing is no easy, pleasant task. It takes years to unravel what has been unfolding for 200,000 years and passed down to us by our parents, generation after generation, locking us into never ending cycles with no hope of progressing. Feeling Healing is the ending of that cycle which we will all eventually work our way through by doing our healing engaging with the process that is now being introduced called FEELING HEALING.

**“By living true to ourselves, true to our feelings, we are living true to God. It’s that simple.”**

James Moncrief 18 March 2018

When we, slowly at first, begin to embrace our feelings, we discover that life is so much easier, that a degree of spontaneity emerges, that difficult things become simple – and we are not back tracking and undoing the messes that we make from accepting our assumptions! Clarity can be found simply.

This will require a total makeover of education systems all over the world. This embraces pre-school, primary school, higher school, technical and further education and all levels and facets of university.

Education is the foundations of any growth and development within any society. Teachers need to become educators, this is not a trade but a profession. Education may need to double in its capabilities, in many countries even treble.

From education comes our nurses and doctors – and all other professions. There are universal shortages and that is the consequence of teachers conditions of employment AND the inadequacy of understanding of what illness and disease is. The doctors suppress the discomforts but there is no curing going on.

When we have investigated the social ills of any country, no matter how wealthy or poor the nation and people may be, certain things stand out:

There is high levels of poverty. Nearly 30% of USA’s population live on incomes below two times what they consider is the poverty line.

One (1) percent of the people control more wealth than 50% of the people. In USA it is 1% of the people that controls the wealth equivalent to 90% of their people.

Democracy has been mostly hijacked. If man has created a system, then man will manipulate that system and democracy is mostly hijacked. Through the ‘respected’ secret societies that are mostly worldwide, we have the hidden controllers funnelling money and instructions through to leadership positions. If they can’t get their nominee into leadership then it is through the second tier operations. Who actually influences the anointment of nominees for election? Who actually influences the writing of party policies, these are not people elected by the people? Parties are formed and policies stipulated and then candidates find themselves being dictated to by these controllers who they never know.

Presidents may be appointed for a fixed or limited number of years. Then watch other members of their family follow in the retiring president’s footsteps. They may call it political family dynasties. It is not the people’s choice.

The overwhelming majority of politicians are unemployable in high level major corporation positions because they do not have the appropriate skills – but they run nations all over the world!

Then you look at the social issues that abound in the country and you find the same old failed remedies being repackaged and applied again only to fail. No one addresses the cause – they don’t even know how to ask; “what is the cause?” More children are being put into prisons all over the world and it is of their parents’ doing – their Childhood Suppression and now their ongoing repression.

What is now available for all societies are the pathways and remedies to begin to address the major social issues within every country. This will require major funding worldwide. This will invariably cause inflation to emerge over time. Inflation can be said to be the devaluing of the currency due to increased supply. An apple always remains an apple but the amount of money available keeps increasing.

As the impoverished are the ones without money, then the value of the cash reserves of the super-wealthy do take a battering which is constructive in shifting wealth out of that sector should the inflationary effects on the poor are addressed during and through the inflationary period(s). Inflation appears to become severe in some regions even before these programs commence due to other circumstances.

## INFLATION

Money is talked about as a constant and that everything else is not. A loaf of bread is constant and so is an apple – money is not, it is printed at the whim of those who own the printing presses.

When I was a young adult, 2 cents could buy what \$1 is needed to pay for today. Inflation (printing of extra money) has reduced the buying power by 98%. Examples:

An imperial gallon of petrol used to cost 20 cents. That is 4.546 litres, a litre of petrol costs AU\$2.20 today and that equates to AU\$10 a gallon. That is a fifty fold diminishment of purchasing power.

A typical packet of 20 cigarettes will now set you back on average around AUD \$40 (£22 / US \$30), which is a hell of a lot of money if you burn through darts like a chimney. A packet of 20 Ardath cigarettes was 20 cents.

A single scoop ice cream in the cone is now AU\$2.79 (Baskin Robbins). As a single scoop was 5 cents then four for 20 cents costs more than AU\$10.

The Sunday papers were 5 cents each and stacked with comics and weekend sport. Now they are around AU\$3.00 each, so four is now more than AU\$10.

We have experienced a 98% drop in the purchasing power of our dollar and we are about to experience a further 98% drop in purchasing power.

Imagine paying AU\$500 for a gallon of petrol!!!

As of a consequence to major disruptions to supply chains around the world due to excessive demand by consumers and Covid-19 and now the Ukraine invasion by Russia, the printing presses of the world have printed a mountain of money for a smaller supply of goods and the consequence is inflation.

Authorities tell us to look up there whereas we need to look not only at our governments BUT the major corporations that are the dominant price gougers. You will find the chain becomes very small, all leads back to a few very obscure and secretive families.

The era of very, very low inflation has ended. Headline inflation in Europe is 7.4% and core inflation 3.5%, way above the ECB's target of 2%. Hong Kong – As inflation soars around the world, the world's second-largest economy has kept it at bay. Consumer prices in China increased just 1.5% in March from a year earlier. The USA Consumer Price Index increased 8.5% for the year ended March 2022, following a rise of 7.9% from February 2021 to February 2022.

## POPULATION GROWTH STABILISATION and DIMINISHMENT

Most of us have lived through an ever growing and expanding economy fuelled by growing populations. Our biggest earning and spending years are in when we are in our 40s. Values of corporations continue to benefit from what investors perceive as ever expanding markets. That is all about to come to an end.

Some nation's populations have peaked and are now aging, thus their internal consumer markets are no longer expanding. There are still many growing population with high growth to come in their consumer markets – but the worldwide phenomenon is beginning to wane.

Over the coming handful of decades, the world's population will peak out and then begin to diminish, however their consumer markets will begin to shrink earlier due to aging of the population.

We are presently a population of 8 billion. This could be the range of the population around 2150. China's population could be then half of what it is today. The population will have a significantly older configuration than what it is today. All of this leads to a devaluation of assets that the super wealthy hold today. Consumerism must revert to a pattern of durable goods – electronic appliances that typically last more than 20 years, etc!

Housing needs to be built to endure extremes of weather and have a long structural life. Thus, housing will need to be just that, long term survival and not an inflationary money box driven up in value due to population growth and its demand that will diminish.

These being drivers shifting wealth back to the many.

The environment within we live and work is gradually changing.

Presently, we all generally look to be paid for everything we do for others. This was not the case even generations ago. However, as we move forward a few decades it is likely that cooperating with and assisting others will become a universal norm. This will see the ending of large segments of commerce and of the economy, thus further degrading the wealth of the super-wealthy.

Thus, we have a series of seemingly inconsequential events all adding up and leading into the melting away of wealth of the wealthy and reducing consumerism and the 'need' to be rich. Hoarding is to abate as we will not be driven by that apparent need. These are all part of the Great U-Turn!

**GREAT**  
**U-Turn**

# LAW OF COOPERATION

## The LAW of COOPERATION

Is to work in conjunction with (cooperating with) the Law of Compensation.

# LAW OF COMPENSATION

It's a Universal Law potentially to be 'imposed' upon humanity on Earth. It is currently in 'operation' in the Mansion Worlds, ensuring everyone cooperates in a friendly way with everyone else to maintain a certain standard of life as agreed upon by all involved, that which is determined by the Mind (rebellious) or Truth (Healing) way the spirits might be living.

Currently on Earth in our rebellious states, the Laws of Compensation and Cooperation are not active. So we live with the 'every man for himself' ethic, the powerful being the successful 'winners' who dominate the not so powerful 'failures'. Whereas in the Mansion Worlds (and the rest of non-rebellious Creation), equality, so even in a rebellious state, is the Law, and so if you cross the line inflicting dominance over another causing some level of suffering, pain and hurt, you will instantly come under the workings of the Law of Compensation and have to compensate for such transgression by feeling all that pain, hurt and suffering you have caused the other spirit to feel. So naturally, Universal Law and Order is maintained by everyone honouring the Law of Compensation, no one wanting to bring its 'wrath' down upon themselves.

Then added to keeping the peace, is the Law of Cooperation, for everyone in the Mansion Worlds who are happy and content to further their rebellious mind state in worlds 1, 2, 4 and 6; or doing their Healing, starting in world 1 and moving through 3, 5 and 7. So everyone willingly feels they want to cooperate with everyone else. Therefore, in the rebellious mind worlds, all spirits willingly and 'lovingly' cooperate with all other mind spirits; and the same in the Healing worlds, together with everyone willingly cooperating with the Healing. If you don't want to cooperate then you'll feel very bad, so everyone willingly wants to do some 'work' for the greater good of all. So there is no need for spirit money or spirit barter for any work done, because everyone willingly loves to work for other spirits, wanting nothing in return, loving giving and receiving as they feel moved to do. So for example, many spirits make spirit clothes out of the spirit material willingly and lovingly for other spirits to wear, freely giving such spirit clothes away, not wanting anything in return other than the receiving spirit being happy to wear and love their clothes. So, the Mansion Worlds function peacefully in their rebellious states – or in their Healing states.

So, now imagine if the two Laws are activated and applied to humanity on Earth... how would things change – and drastically change they would!

For example, everyone who is wilfully doing anything to make another suffer, feel hurt and pain, would cease their harmful ways, themselves feeling all that suffering, hurt and pain they've inflicted on the other person. So personally, as in personal relationship if you hit someone, emotionally, politically, socially, on all levels. If you run a business or government that is hurting people economically, socially, emotionally, spiritually, mentally, in any way causing anyone to suffer, then you're going to feel all that pain of all the people you're hurting. Even if you're doing it indirectly. If you work for a business or company and are forced to hurt others through policy of those controlling the company, no doubt you will still feel bad for what you've done, and you might leave, but if it's your only source of livelihood, then the Law of Compensation won't be as harsh or won't possibly be applied at all. So really it applies to those who are

wilfully hurting, coercing or deceiving others, who will have to do their Hell Time to compensation for all suffering and pain caused.

So, imagine if suddenly everyone had to stop hurting everyone else, including all animal abuse – how would the world be?

# LAW OF FORGIVENESS

Parents hurting their children are exempt from the Law, in that it will still apply, however it is suspended until the parent does their Spiritual Healing, and then it will come under the greater Law of Forgiveness. So parents doing their Healing and waking up to the truth of how badly and unloving they have treated their children, will feel all the pain of their transgressions as the Law of Compensation works upon them, however it will be a part of their Healing under the Law of Forgiveness, because the Rebellion has been thrust upon us all, and so parents won't have to do actual separate Hell Time, however they will feel like hell doing their Healing when they see and feel how unlovingly they've treated their children.

One could argue that it's not fair everyone being subjected to the Law of Compensation because we've all unwittingly and unconsciously been subjected to the horrors of the Rebellion, however once we're an adult, rebellion or not, we're still answerable for our actions. And so if you cross the line and infringe upon another's will to the degree of making them suffer pain, the Law of Compensation will apply to you.

So if the Law of Compensation is applied to Earth, one can imagine there will be many of the world's top controlling people suddenly stricken down with all the pain of their wrongdoing, thereby leaving quite a gap in the way things get done, into which other people will have to step.

And if the Law of Cooperation is applied at the same time, then in theory the world can dispense with the need for money, so no power or wealth accumulation, everyone can have what they want, and no one will want such power over others because of the Law of Compensation – and then how does the world keep functioning when suddenly there is no need to go to work to make money to survive? Hence the need for the Law of Cooperation, because like in the Mansion Worlds, everyone will feel driven to cooperate with the whole, so people will want to go to work for the sake of working to make everything keep working. Not to earn a living, just so they can participate in the whole of making life be as everyone will want it to be, that being a pleasant, good and happy standard of living. So the companies and governments will still work if need be, however their purpose and reason for existence will be for the good of the whole, with workers volunteering to work to keep them going. A utopia heaven on Earth, even a rebellious one, just as the Mansion Worlds are called heaven.

So is the new Spiritual Age that is possibly forthcoming, heralding the end of the 'Lawless' Rebellion? Is humanity on Earth to move to mirror humanity in the Mansion Worlds? So can life over there be applied to life here on the physical Earth? Will people strive to continue living their rebellious ways cooperatively within the overseeing Law of Compensation, all in a 'nice, friendly and loving' evilness, like in the mind Mansion Worlds? Whilst other people will strive to live cooperatively doing their Healing, wanting to finally end being of the Rebellion and Default?

## Social Issues in most Nations

- Affirmative Action
- Ageism
- HIV/AIDS
- Alcohol Abuse
- Airline Problems
- Anti-Muslim Discrimination and Violence
- Automobile and Highway Safety
- Capital Punishment
- Child Abuse and Sexual Molestation
- Child Labour
- Church State Separation
- Civil Rights Movements
- Corporate Crime
- Consumerism
- Criminal Justice and Rights
- Defence and Security Issues
- Divorce and Child Support
- Domestic Violence
- Disability Rights
- Eating Disorders
- Euthanasia
- Environmental Issues, Wildlife, and Extinction of Species
- Food Safety and Drug Safety
- Mafia Wars
- Gambling
- Global Warming
- Government Subversion
- Gun Control and Gun Violence
- Homosexuality – Gay and Lesbian Rights
- Public Health Care Reform
- Homelessness
- Housing Costs
- Human Trafficking
- Illegal Immigration
- Identity Theft
- Copyright and Intellectual Property Rights
- Juvenile Crime Justice
- Juvenile Reform

- Journalistic Reform
- Media Bias
- Media, Sex, and Violence
- Mental Illness
- Money Laundering
- Natural Disaster and Disaster Relief
- Nuclear Energy, Power, and Waste
- Obesity
- Organ and Tissue Transplant
- Organized Crime
- Psychological Health
- Plagiarism
- Pornography
- Prostitution
- Racism
- Recycling and Water Conservation
- Reproductive Rights and Technology
- Scientific Research Ethics
- Sex Education
- Sexual Harassment
- Single Parenting
- Stem Cell Research
- Suicide
- Terrorism
- Toxic Waste
- Traffic Congestion
- Unemployment
- Voting Issues
- Waste Management
- Nuclear Weapons and Mass destruction
- Women's Rights

The above list is not exclusive, as there are many other specific socio-economic and cultural problems that nations are faced with. The governments need to come up with stringent policies to solve the aforementioned problems. This requires planning on both, the micro and macro levels to get resolved soon.

***Violence is never Justified***

The leading issue is that children are not prioritised:

'I had a pretty good upbringing' in comparison to other people!

- Parents have NO understanding of Love.
- Parents have NO understanding of Law of Free Will.
- Parents have NO understanding of blocking emotions.
- Parents have NO understanding of causal / core emotions.

The elephant in the room is Childhood Suppression. It is through Childhood Suppression that we, as parents, impose upon our children all of our emotional injuries and errors of belief, thus perpetrating the stagnation of humanity from one generation to the next. It is only through our personal Feeling Healing that we can start to mitigate this cycle and slowly alleviate each of the social issues listed above.

**This time, in the history of humanity, is the most exciting time ever experienced.**

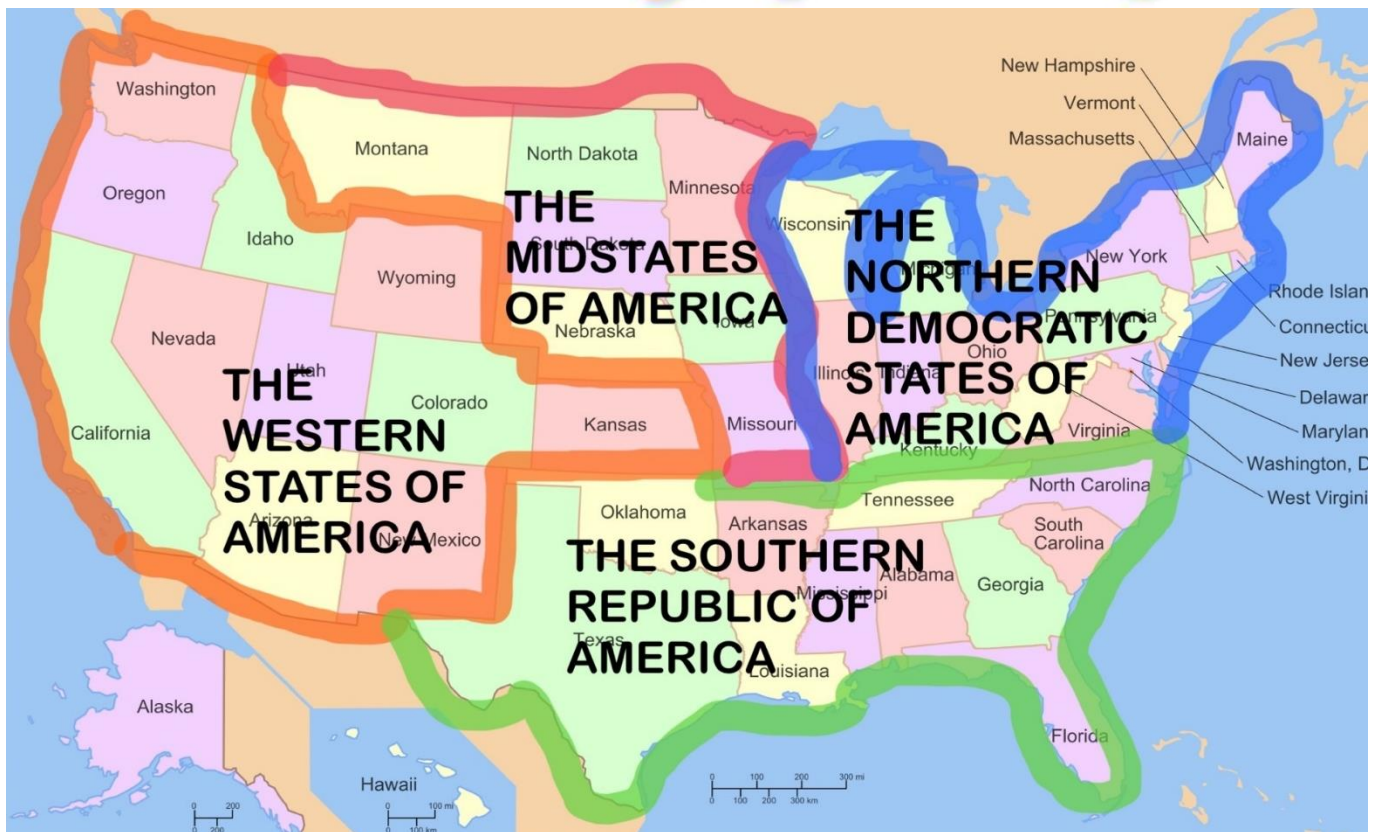

# Benefactors Assisting Humanity

Conduits,  
Cogs &  
Wheels

# Living Feelings First FEELING HEALING

# *I am Breaking up with You!*

As we proceed through the changes unfolding for humanity:

Authoritarian regimes will be rejected by its people and significantly freer environments unfold.

Through the Law of Compensation earthing, borders will become redundant and nations will breakup.

Militarism will subside, then end with vast industries and armies becoming redundant.

State police systems will have little crime to deal with, criminal courts close, and prisons empty.

Health systems will go through a total make over and true healing will begin to unfold.

Commerce and hoarding will not be the central focus of life, our spiritual evolution will be, our way of living, The New Way, feelings orientated instead of being mind-centric.

No institutional system created during the Rebellion and Default will survive.

Education will become the leading profession for all of humanity.

Children will become the centre of the family and society will remodel.

The next three decades will be dynamic, however this will be unfolding for centuries!

**Never is hatred, nor discord, nor war among men justified – no matter what the cause – and if men will only learn the Truth there will never exist such feelings or acts. Militarism is all wrong. Jesus 25 December 1915**

# Purpose of Life

Purpose of our life is to:

Achieve individualisation. This is truly the moment of our sentient experience beginning. This occurs at the moment of incarnation which is when our newly forming foetus begins to pump blood, usually day 16 after conception. From that moment we are beginning to experience life.

We have a life purpose. We are each a unique personality with individual propensities to experience. Should our physical life be cut short then we will go on and have the experiences that we need in the 1<sup>st</sup> spirit Mansion World. If we miscarry or are aborted then we will become spirit born, be adopted to spirit parents and have a similar life to that should we have gone on and lived on Earth.

Presently we are each subjected to Childhood Suppression which we continue on throughout our lives repressing our feelings and our true personality. This is providing us with unique life experiences as this does not typically occur with any other humanities throughout the universes. Our physical life on Earth is mostly very difficult, however this will provide each of us with unique capabilities to aid newly emerging humanities on worlds further out into space. Yes, we have an enormous journey to enjoy.

Our time of death is predetermined. We often do crazy things – but our life span is predetermined.

What we experience is also predetermined. A few are to be wealthy and become burdened with responsibility. Many are to be poor and enjoy the freedom without trappings of assets and obligations.

Most will have families while on Earth. No matter who we are, we will each parent at least three children before we can enter the first of the Celestial Heavens. We are to experience parenting, even though that may be in the spirit Mansion Worlds.

We are to live FEELINGS FIRST! We are to express our feelings, both good and bad, to a companion. We are to long / ask for the truth of what our feelings are drawing to our attention. What enters emotional needs to be expressed emotional. Should we long for our Heavenly Mother and Father's Love, then we are SOUL HEALING. Our mind is to follow supporting what our feelings are leading us to embrace – this being the opposite as to how we have been brought up to live.

*It's all about*  
**Experiences**  
 &  
**FEELINGS**

As we complete our FEELING HEALING, then and only then can we connect with our Soul Partner who is always of the opposite sex. Our soul is a duplex that manifests two personalities. And we can grow to interact with our Nature Spirits and Spirit Guides!

**BE FEELINGS**  
**EXPRESSIVE!**

# Top 15 Countries by GDP in 2022

<https://globalpeoservices.com/top-15-countries-by-gdp-in-2022/>

Understanding the economic landscape of various countries will help you as you prepare for global expansion. Many businesses go global to access greater talent pools, reach new markets, and diversify their teams for better business continuity. With that being said, we've listed out the top 15 countries by GDP in 2022 as a guide. Click on any of the links to gain more in-depth reviews of these top countries. This is based on the most recent data available from the [World Bank](#).

1. United States:	\$20.89 trillion
2. China:	\$14.72 trillion
3. Japan:	\$5.06 trillion
4. Germany:	\$3.85 trillion
5. United Kingdom:	\$2.67 trillion
6. India:	\$2.66 trillion
7. France:	\$2.63 trillion
8. Italy:	\$1.89 trillion
9. Canada:	\$1.64 trillion
10. South Korea:	\$1.63 trillion

11. Russia:	\$1.48 trillion
12. Brazil:	\$1.44 trillion
13. Australia:	\$1.32 trillion
14. Spain:	\$1.28 trillion
15. Indonesia:	\$1.05 trillion

## 1. United States

- GDP – Nominal: \$20.89 trillion
- GDP per Capita: \$63,413
- GDP – Purchasing Power Parity (PPP): \$20.89 trillion

A number of factors contribute to the success of the United States. An entrepreneurial environment that encourages hard work and long hours certainly helps. But decentralised government, advanced research universities, and favourable regulatory environments also contribute. The United States will likely always be in the top countries by GDP in the world.

## 2. China

- GDP – Nominal: \$14.72 trillion
- GDP per Capita: \$10,434
- GDP – Purchasing Power Parity (PPP) : \$17,204

The Chinese economy, one of the fastest growing economies of the 21st century, now ranked as the second largest economy in the world, is currently valued at a GDP of US\$14.86 trillion. With China's Belt and Road Initiative effectively merging its foreign and economic policy, promotion of using the Chinese Renminbi for the use of settlements has increased. The country is increasingly playing an influential role in the global economy. It has been the largest contributor to global growth since the financial crisis of 2008.

### 3. Japan

- GDP – Nominal: \$5.06 trillion
- GDP per Capita: \$39,048
- GDP – Purchasing Power Parity (PPP): \$5.24 trillion

Japan's four main islands – Honshu, Hokkaido, Shikoku, and Kyushu – constitute nearly 98% of its land area. It has the world's 3rd largest economy by nominal GDP and the 4th largest economy by purchasing power parity (PPP).

Ranked as one of most innovative countries in the world, Japan is the world's largest electronic goods producer and the 3rd largest automobile manufacturer. The country generally has a surplus in annual trade and international investment. The country's workforce is highly qualified and skilled, proving to be instrumental in organisational growth. All of these factors contribute to Japan being one of the top countries by GDP.

## 4. Germany

- GDP – Nominal: \$3.85 trillion
- GDP per Capita: \$45,466
- GDP – Purchasing Power Parity (PPP): \$4.45 trillion

Germany has the 4th largest GDP in the world. The total value of exports and imports is equal to 86.9% of GDP. Germany is a European nation with the biggest drivers of its economy being its service industries, including telecommunication, healthcare, and tourism.

The nation employs a social market economy that emphasises the value of open-market capitalism and also ensures a number of social services guarantees. The country is ranked #1 in the world for entrepreneurship due to its skilled labour force, highly developed infrastructure, and technological expertise.

## 5. United Kingdom

- GDP – Nominal: \$2.76 trillion
- GDP per Capita: \$39,229
- GDP – Purchasing Power Parity (PPP): \$2.98 trillion

The United Kingdom (UK), also known as the United Kingdom of Great Britain and Northern Ireland consists of England, Wales, Scotland, and Northern Ireland. It is the 5th largest economy in the world and the 2nd largest in Europe in terms of GDP. The UK ranks high in the annual Global Competitiveness Reports and the World Bank's Ease of Doing Business Rankings.

## 6. India

- GDP – Nominal: \$2.66 trillion
- GDP per Capita: \$1,877
- GDP – Purchasing Power Parity (PPP): \$8.68 trillion

The Republic of India is a federal democracy that consists of 28 states and 8 union territories. It is the largest democracy and the 6th largest economy in the world. India has thriving manufacturing, technology, and service sectors. Since 2014, the rate of foreign direct investment (FDI) inflows to India has grown steadily as some key policy changes were incorporated by the government to facilitate this growth. This makes India one of the top countries by GDP in 2022.

Some strategic steps have been taken to stimulate India's business environment including reforms to remove bottlenecks in key business areas, reducing minimum capital requirement, and simplifying the process of obtaining necessary licenses.

## 7. France

- GDP – Nominal: \$2.63 trillion
- GDP per Capita: \$39,257
- GDP – Purchasing Power Parity (PPP): \$2.95 trillion

France is the 7th largest economy in the world. It is the most visited destination in the world and consequently has a thriving tourism industry. Also, foreign trade is an essential component of its economy.

The value of imports and exports comprise 63% of the country's GDP. Strong protection of property rights and an efficient regulatory framework encourage investors. France ranks 32 in the World Bank's 2019 Ease of Doing Business index. There are foreign players in various sectors, and 31 out of Fortune 500 companies are from this prominent EU member.

## 8. Italy

- GDP – Nominal: \$1.88 trillion
- GDP per Capita: \$30,657
- GDP – Purchasing Power Parity (PPP): \$2.42 trillion

Italy's economy is the 3rd largest in the Eurozone and the 8th largest by GDP. In addition to its sizable economy, Italy is one of the most influential countries in Europe; it is a key member of the Eurozone, EU, the G7, the OECD, and the G20.

Italy's diversified economic growth is propelled by the consumer goods industry. GDP's expenditure side includes 61% of household consumption, 19% of government expenditure, and 17% of the gross fixed capital formation. Exports of services and goods contribute to 30% of GDP while imports account for 27%, adding 3% to GDP.

## 9. Canada

- GDP – Nominal: \$1.64 trillion
- GDP per Capita: \$42,080
- GDP – Purchasing Power Parity (PPP): \$1.81 trillion

Canada has a mainly service-based economy. The threshold for foreign investment in Canada is CAD 5 million for direct investments, and CAD 50 million for indirect investments. The country has also been a key member of the World Trade Organization (WTO) since 1995.

It also has extensive trading ties with many nations due to its bilateral and regional Free Trade Agreements (FTAs). A well-educated workforce, multicultural / multilingual coexistence, a thriving economy, and the government's support for setting up business make Canada a preferred investment destination.

## 10. South Korea

- GDP – Nominal: \$1.63 trillion
- GDP per Capita: \$30,644
- GDP – Purchasing Power Parity (PPP): \$2.29 trillion

South Korea was considered a developing country until the 1960s. Due to far-reaching economic reforms (referred to as the Miracle of the Hangang River), the country's economy entered a period of rapid growth (about an annual 10% growth for over 30 years). Today, South Korea's GDP is about \$2 trillion, and it's one of the most developed and industrialised countries in the world.

South Korea places great importance on education, innovation and investment into research and development. The country has a highly skilled workforce earning a high median household income. Services provide the majority of the country's GDP at 59%, with industry is at 38% and agriculture at 2%.

## 11. Russia

- GDP – Nominal: \$1.48 trillion
- GDP per Capita: \$9,972
- GDP – Purchasing Power Parity (PPP): \$4.02 trillion

Russia has the largest landmass of all countries in the world and boasts natural resources worth \$75 trillion, according to World Bank estimates. Ever since the privatisation of Russia's energy and defence-related sectors in the 1990s, the country has taken great strides when it comes to growth.

Revenues from oil, natural gas, and energy drive the Russian economy. Foreign trade is important as the total value of imports and exports is equal to 46.7% of GDP, making Russia one of the top countries by GDP.

## 12. Brazil

- GDP – Nominal: \$1.44 trillion
- GDP per Capita: \$6,450
- GDP – Purchasing Power Parity (PPP): \$3.08 trillion

Brazil's economy is the 12th largest in the world with an estimated worth of natural resources being \$21.8 trillion. This is one of the main reasons Brazil is one of the top countries by GDP in 2020. The country's diverse and open economy has developed

flourishing trade relationships with more than 100 different countries. According to the 2019 Index of Economic Freedom, the total FDI in Brazil was \$62.7 billion.

The Brazilian government promotes foreign investment in scientific and technological infrastructure. Brazil's moderate climate, excellent infrastructure, supportive government and wealth of natural resources make it a highly favoured destination for foreign investment.

## 13. Australia

- GDP – Nominal: US\$1.33 trillion
- GDP per Capita: US\$51,885
- GDP – Purchasing Power Parity (PPP): US\$1.31 trillion

Australia has the 13th largest economy in the world, with an overall GDP of US\$1.33 trillion and a GDP per capita of US\$51,885. The economy experienced slower growth in 2017, with a 1.96% increase in GDP. Having rolled out in early 2017, Australia's new foreign policy (a type of white paper agenda) has created a roadmap for the country's economic, security, and foreign policy relations. The nation is ranked as the 12th best country in the world to set up a business due to low entry costs and streamlined procedures.

## 14. Spain

- GDP – Nominal: \$1.28 trillion

- GDP per Capita: \$26,832
- GDP – Purchasing Power Parity (PPP): \$1.77 trillion

Spain is the 2nd largest country in the EU. Spain's economy is facilitated by structural reforms, transparent judicial / regulatory systems, and sound economic institutions. Steady modernisation has helped the Spanish economy grow continually with the industry sector contributing nearly 27% to the country's GDP. The total value imports and exports is equal to 65.5% of GDP.

## 15. Indonesia

- GDP – Nominal: \$1.05 trillion
- GDP per Capita: \$4,038
- GDP – Purchasing Power Parity (PPP): \$3.33 trillion

Indonesia is the largest economy in Southeast Asia. The country is one on the world's [emerging markets](#) and has been a target of business expansion over the last decade.

The country's economy is heavily dependent on domestic market and government budget spending. Since the 1990s, the majority of the economy has been controlled by individual Indonesians and foreign companies. As Indonesia continues to increase their global footprint, they will likely climb as one of the top countries by GDP in 2022.

## POVERTY MITIGATION in CHINA

[How did China beat poverty and bring its poverty rate down from 26% to 4% in only seven years?  
https://www.quora.com/](https://www.quora.com/How-did-China-beat-poverty-and-bring-its-poverty-rate-down-from-26%-%20to-4%-%20in-only-seven-years?https://www.quora.com/)

Originally Answered: How did China beat poverty?

I am glad to answer this question. Sorry my English is not good.

Chinese government has done a lot of work to help the poor get rich. I'll give you a few examples:

Poverty had been common in many parts of China, because the traffic is not convenient, so the government emphasises improving the traffic condition as the most important work. For example, in Guizhou Province, one of the poorest province in China, the local government has spent a lot of money to repair a lot of roads. In China, there is a saying, "Building roads is the first step to becoming rich."

The Chinese government has a great plan known as "村村通" (Every village has a highway, electricity, tap water, telephone lines, etc.). Sometimes the investment may seem not worthwhile in economic point of view. I saw a news: in a small village in Xinjiang with only one hundred poor people was asked to move out by the local government, but they didn't want to. So they spend nearly one million

yuan to build roads from the highway nearby to their village, and the government never asked them to move out from then.

In some remote places, there is no electricity nor cable TV, so the Chinese government offers free solar cells and satellite dishes to residents.

The Chinese government has ordered communications companies to build mobile phone signal towers in remote areas regardless of financial benefits. Since these communications companies are state-owned enterprises, they have to execute orders.

In some of the rural areas in China, the government has a great plan called "New Socialist Rural Areas." Houses are built in groups and the government has paid most of the expenses, and the rest is paid by the residents themselves.

There is also a policy called "结对帮扶" (help the poor by collaboration), which means richer areas are assigned to poorer areas in order to help them get out of poverty. In the countryside, every CCP official is required to help a difficult family. The job is very stressful. If his work is done badly, it will be difficult for him to advance, some of them even complain about this.

Sometimes, government officials become a salesman to help farmers sell their products. Look at the picture below. A county market sells watermelons on the street.

The Chinese government also has a policy that sounds very interesting, called "精准扶贫" (targeted anti-poverty projects). It sounds like the policy targets poverty and “destroy” it like Tomahawk missiles.

A large numbers of scientists and agricultural experts are sent to poor areas to research the local environment, figure out what is the most suitable product for them to grow, and guides the local people to grow it.

Since 2011, the Chinese government has implemented the rural compulsory education student nutrition improvement program. The central government has allocated about 16 billion RMB per year to provide food subsidies for rural students. The policy benefits 26 million rural students.

In the past, most rural officials did not have a high diploma. Now the Chinese government encourages college graduates to go to the countryside to serve as officials after graduation. They have a name called "大学生村官" (College students as rural officials). The government hopes their knowledge will help farmers become rich.

In my hometown, poor people can apply for subsidy if his house is not safe to live in. The subsidy is between 5,000 to 20,000 RMB.

There are still a lot of poor families in China, but we see the government trying to improve their lives. But now people have a new topic: in some areas, sympathy because of poverty, the government to give them a lot of benefits, the folk also gave them a lot of money, they don't want to change my life, too lazy to work, so that they can continue to make contributions. Such things are not uncommon.

<https://www.quora.com/How-did-China-beat-poverty-and-bring-its-poverty-rate-down-from-26-to-4-in-only-seven-years>

During the past 30 years, China has helped 800 million people escape poverty, which accounts for 70% of all people lifted out of poverty worldwide. Ban Ki-moon, eighth Secretary-General of the United Nations, recognised China's efforts by saying "China has achieved transformational results in reducing poverty". Many global media outlets also applauded China's achievements in this field.

By the end of 2015, Chinese President Xi Jinping brought up the idea, "eliminating poverty in China by 2020" – 10 years ahead of the target of 'eliminating poverty in all forms by 2030' set by the United Nations.

Today, there are still more than 80 million people living in extreme poverty. The success of Chinese poverty alleviation serves as a valuable experience for the whole world.

Besides personalised anti-poverty plans for each person, the nation's targeted poverty alleviation efforts also include various arrangements to create work opportunities and give people job training, turning the anti-poverty mode from "blood transfusion" to "haematopoiesis."

The Dulong Mountain Valley is home to about 7,000 people in China's mountainous southwest. Due to its high altitude, the mountain is snow-covered for half a year, isolating the community in impoverished and rudimentary conditions.

Different from the usual poverty alleviation, government staff are planning to build the mountainous area as a tourism hotspot with its beautiful landscapes.

Pu Guangrong feels like he's over the moon since government has built new houses for him – two to be exact, one for his family, and another for tourists. Like others in the area, he used to eke out a living by collecting wild fruit and hunting. Tourism wasn't even in his mind, but poverty-alleviation workers changed all that.

Today, his village is connected to the outside world by a new tunnel, luring in tourists, broadening their vision and bringing in economic revival.

A Chinese saying goes, **"Teach a man how to fish, rather than give him a fish."**

But targeted poverty alleviation is more than this. The Chinese government would prepare accommodations and jobs in other places for those who live in areas without development value and encourage them to move away from their original places. As for eco-logical preservation area where exploitation is not allowed, the government will arrange jobs for forest rangers and forest planting. Accordingly, the environment will remain protected while people can have jobs.

In the past five years, the Chinese government has invested 196.1 billion yuan in poverty alleviation and allocated petty loans – 283.3 billion yuan to poor people. (7.2 Chines Yuan to 1 USD)

All positive results reflect on the government's efforts and investment into poverty alleviation. The government officials are encouraged to try their best to implement poverty-alleviation programs. To prevent counterfeiting, the Central Committee of the Communist Party of China has set up a strict inspection system, which allows different provinces to supervise each other, while all data needs to be verified by a third party as well.

Kim Hoonae, director of International Fund for Agricultural Development's Asia Pacific Division, has praised China. "This anti-poverty policy based on the accountability assessment is very effective. The more effort you put into it, the more support you get from government. As a result, local governments are working under pressure while feeling inspired at the same time."

Chinese President Xi Jinping has visited nearly all 14 officially designated 'areas of destitution'. During his entire five-year span at the leadership helm, he has visited poor regions even on the eve of every Lunar Chinese New Year – Spring Festival.

Maybe, as The Huffington Post had suggested, "If we were to learn from the experience of the past decade and half, the next development goals could be to create another China story, so to speak, which would bring humanity at the doorstep of ending extreme poverty for good. "

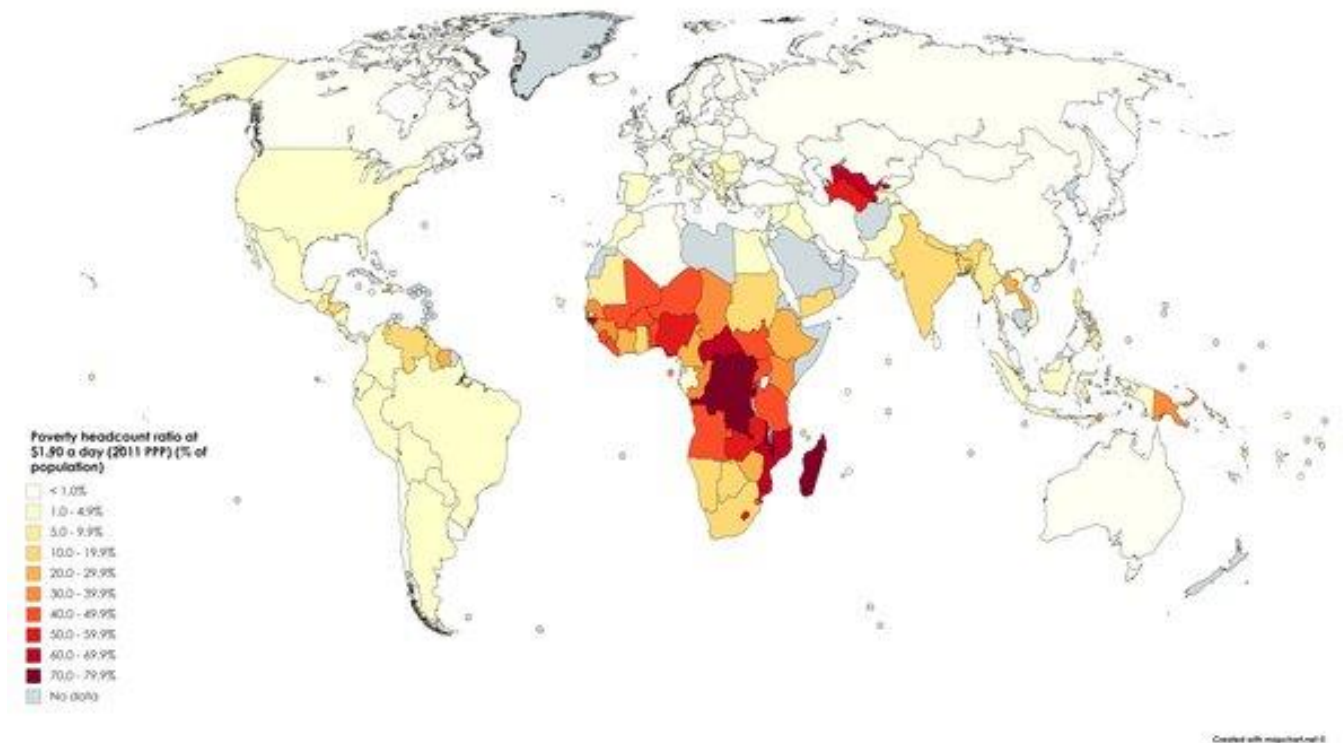

[How is China able to have a poverty rate as low as 1.7%?](https://www.quora.com/How-is-China-able-to-have-a-poverty-rate-as-low-as-1-7?)

<https://www.quora.com/How-is-China-able-to-have-a-poverty-rate-as-low-as-1-7>

Because fighting poverty is one of the major tasks of China since the inception of the **PRC**.

Since 1978 China raised more than **750 million people** out of poverty. That alone amounted to **50% of the global poor population**.

An amazing achievement. While poverty alleviation is a task that many developed countries still are working on, including the USA, China instead vowed to end absolute poverty for the Centenary of the Communist Party of China (2021).

2018's absolute poverty headcount ratio according to international poverty line (under US\$1.90 per day). Interestingly, the % of people in absolute poverty is lower in China than in some Western countries, like Spain, Italy and USA. Source: Wikipedia

The national poverty line is not the same as the international poverty line – its requirements are actually higher.

### How does poverty alleviation work in China?

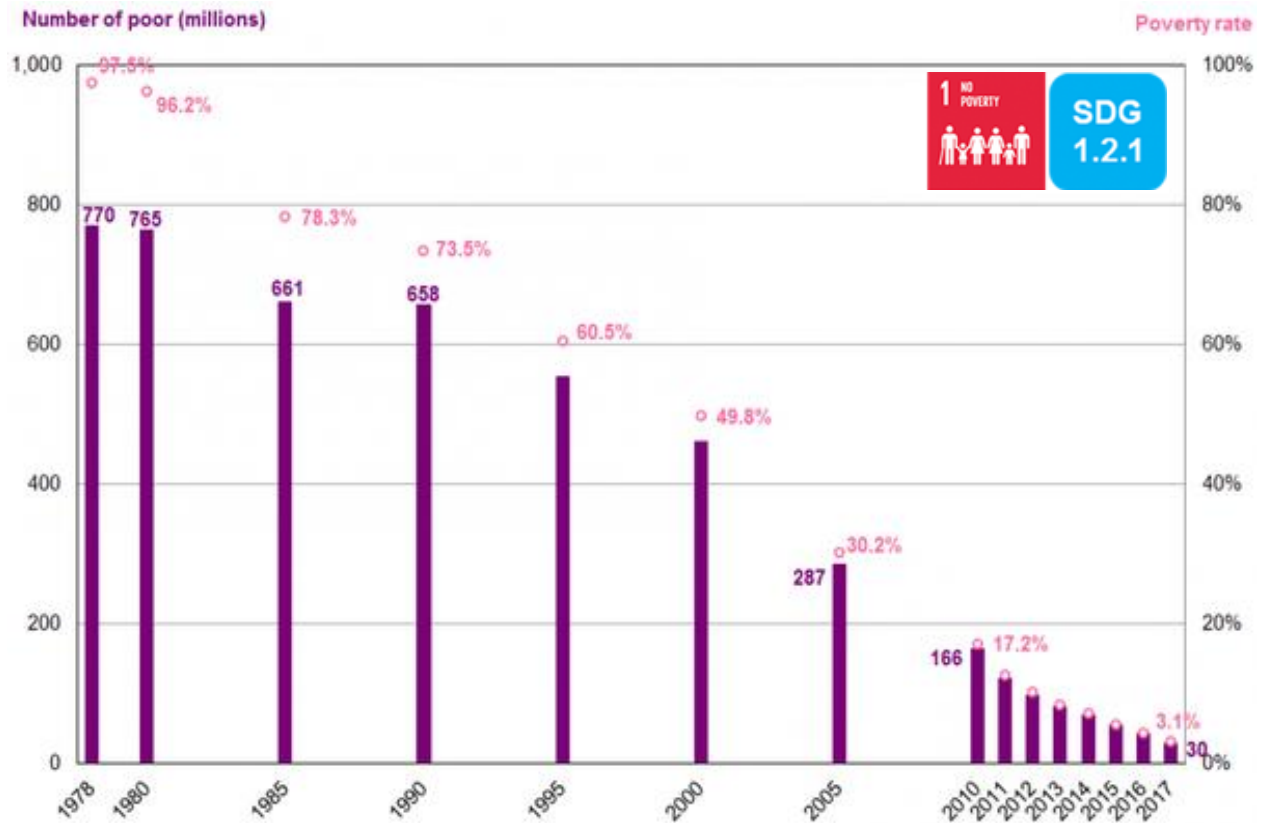

According to the Chinese government, a person can be considered as lifted out of poverty if all the following conditions are true:

1. Income is above the national poverty line of US\$3.20 per day. By comparison, international poverty line, set by the World Bank, is US\$1.90 per day. Both are adjusted by **Purchasing Power Parity** (2011);
2. Must live in a decent housing, with electricity, running water and a proper roof;
3. Any child should be going to school; illiterate adults need basic education too.

All the work that needs to be done to ensure these three points is on the shoulders of the poverty alleviation commissioners. They are members of the **Chinese Communist Party** who volunteer to go far away from their homes to help lift people out of poverty. As such, they need to do all kinds of tasks, from building modern houses to teaching basic hygiene.

As one may guess, it is also a dangerous job. **Almost 800 commissioners already lost their lives on duty**, but their results are incredible.

China's results in fighting poverty in rural areas from 1978 to 2017. Source: Unicef [CGTN made a documentary about a poverty alleviation commissioner's work in late 2019](#), showing the issues and the challenges of poverty alleviation.

## Making sure people won't get poor again anymore

This is the most important part.

The Chinese approach against poverty has been effective especially thanks to **long term planning**. It is not enough to just provide **subsidies** to survive. Otherwise, once the subsidies are removed, people will just fall back into poverty again.

Chinese government believes that the basis for overcoming poverty is **education**.

For this reason, commissioners need to both ensure that **children go to school**, instead of working in the fields, for example. **Adults have to receive some basic schooling** as well.

In order to do that, they combine economic aid and support the adoption of new technologies, especially in farming. For example, schools provide lunch for children in the most impoverished areas. Some parents will send them to school only to have a **free meal**.

While COVID-19 is not exactly making things easier, China has very good chances of finishing the job right on time.

After that, it will be time to work on other categories of poor people: not in absolute poverty but, anyway, needing aid.

[How did China get rid of its poverty in a few decades?](https://www.quora.com/How-did-China-get-rid-of-its-poverty-in-a-few-decades?)

<https://www.quora.com/How-did-China-get-rid-of-its-poverty-in-a-few-decades>

**To understand China's "secret," we must first look back to 1978, when the period of reform and opening up began.** Former Chinese leader Deng Xiaoping, the chief architect behind China's pro-market reforms, famously said, "Poverty is not socialism. Socialism means eliminating poverty."

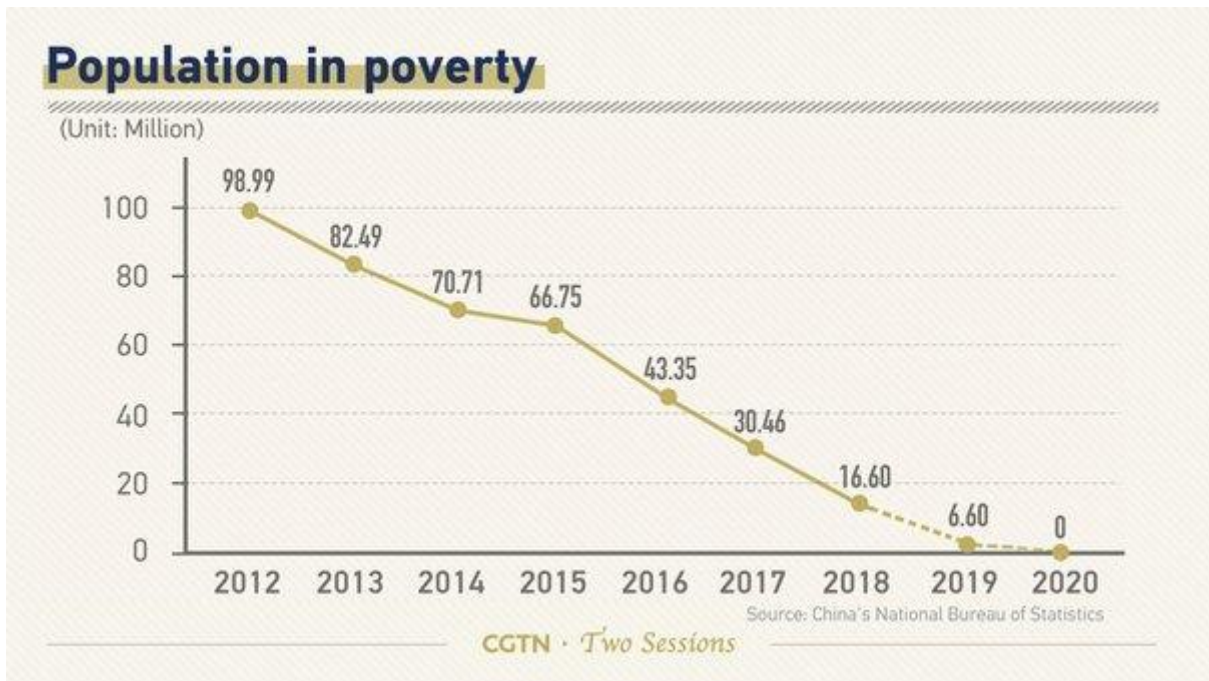

Since the economic reforms were launched, China has witnessed unprecedented economic growth. Decades of rapid growth have served as the bedrock of the country's development, without which China's poverty alleviation miracle would not have been possible. That said, economic development alone was not enough to completely eliminate poverty.

**Ban Wei, deputy director of the Editor's Office of Xinhua News Agency, noted that the market is ultimately unable to deliver for those at the bottom.** In an address to the International Forum on Poverty Governance and Development Towards Modernization, Ban explained that many of China's rural poor were excluded from the market for living in remote locations.

**The market is a decisive and important resource-allocating factor, he said. "But market economics is based on efficiency and the market is unfriendly to those people in poverty."**

Robert Walker, a professor with the China Academy of Social Management at Beijing Normal University unpacked this point further. "The market will always favour the city because the city brings economies of scale," he told Beijing-based media China Focus.

**Under the leadership of President Xi, China waged an all-out war against poverty in late 2012.** Officials in Beijing rallied the 91 million Communist Party of China members, together with the private sector and members of the general public in pursuit of one central aim: The elimination of absolute poverty by 2020.

Local authorities largely took the lead over regional development, adopting a two-pronged approach that weaved together large-scale infrastructure projects with targeted poverty alleviation measures.

**Targeted poverty alleviation**, explains producer and writer Robert Lawrence Kuhn, means individualised attention to people in poverty.

Using a standardised criterion—which looked at income, opportunity, and access to basic necessities—all households below a certain threshold were assessed on whether they met the classification of "extreme poverty." The root causes of a family's poverty were then explored, and a customised plan was developed to ensure all received the support needed.

"Every poor family has its own file, a literal notebook, each with its own targeted plan to lift each above the line of absolute poverty," said Kuhn.

More than 250,000 teams were dispatched to offer on-the-ground support. In total, more than 3 million people were sent to the country's most remote villages as special commissioners for poverty relief.

**A common cause for many in poverty was found to be their location.** Take Tibet Autonomous Region for example. Tibet has historically been China's poorest region, mainly due to its remote and hostile environment. Known as the Roof of the World, the Qinghai-Tibet Plateau sits at an average elevation of 4,572 meters, and is surrounded by one of the most formidable mountain ranges on the planet.

Living in the remote highlands meant being cut off from high-quality public amenities, such as healthcare and education. It meant being unable to grow a variety of stable crops. And it also meant being restricted from engaging in trade and commerce.

**To alleviate this problem, local authorities launched an ambitious relocation program in 2013.** Following the example of other remote regions in China that incorporated relocation programs with a

mass-infrastructure drive, Tibet's most impoverished people were relocated to newly built communities with full access to essential services. More than 260,000 residents across the autonomous region took advantage of the scheme. Within six years, Tibet had shaken off absolute poverty.

In the hope that others can learn from its experience, China has committed to sharing its knowledge and methods with the developing world. It has made clear, however, that although China's methods worked for China, other countries must follow their own path in line with their unique challenges and environment.

**The key to China's development, then, is not any particular policy or method, but rather its political economy.** To understand China's success in poverty alleviation, researchers often refer to the five Ds. They are determined leadership, detailed blueprint, development-oriented, data-based governance, and decentralised delivery.

The determined leadership of President Xi and the Party has been noted by the UN secretary general and so bears not repeating. Its detailed blueprint refers to the plans sketched out by national and provincial-level leaders, some of which stretch for decades. Local leaders were largely responsible for the implementation and delivery of the detailed plans, and this is where decentralised delivery comes in.

Data-based governance refers to the more than 100 million files created on impoverished households. Development-oriented refers to the government's intervention in the market to promote more equitable growth.

With clear national priorities and using the power of the state to intervene, it is possible to organise the market in the people's interest while trying to control some of its disadvantages, Walker explained. The result is that "you can achieve the best of both worlds and benefit all sections of society," he added.

**China's secret then, if it can be called a "secret," lies in its creation of a powerful synergy between the state, market and society.** Socialism with Chinese characteristics has ultimately developed a new model of political economy with a proven track record in delivering high-quality development that is more fairly distributed across society.

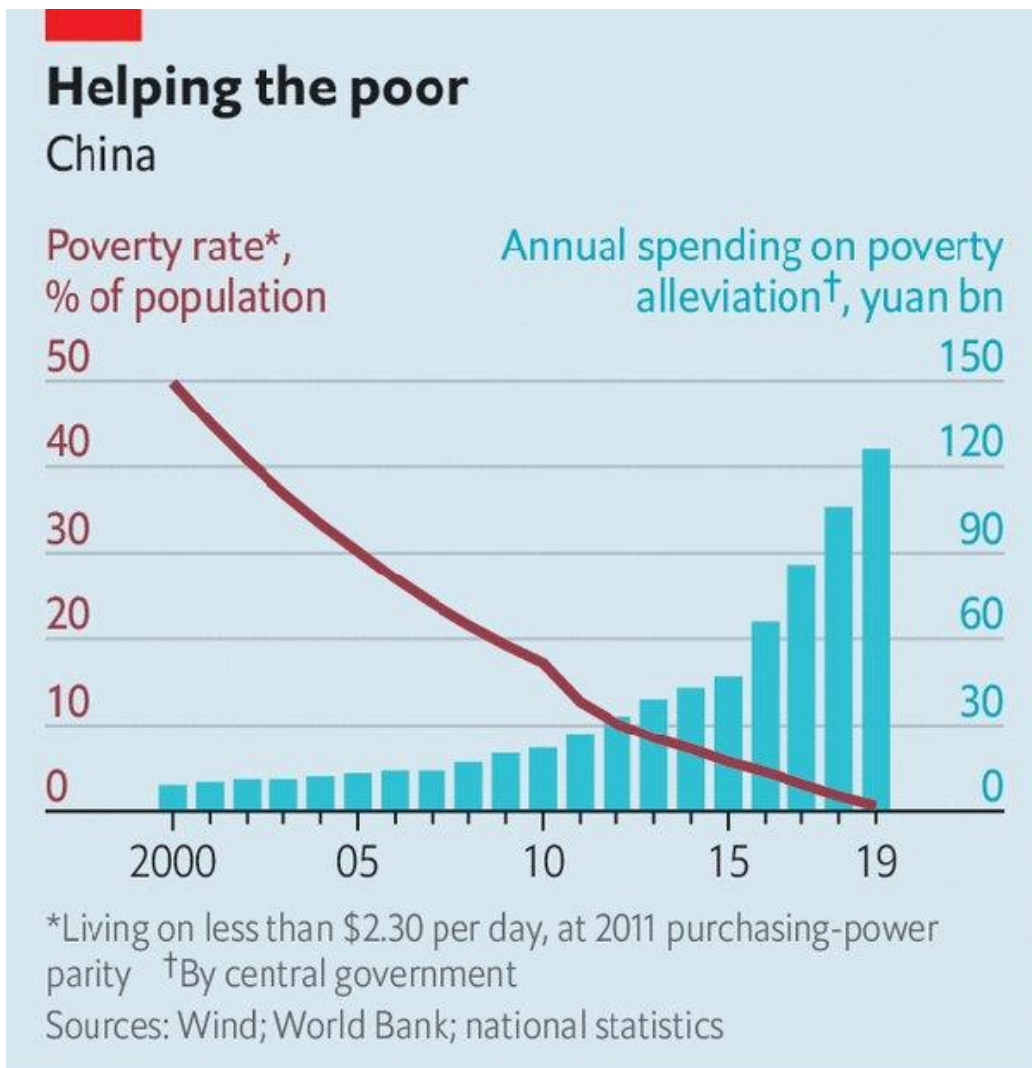

[What unpopular opinion do you have about China?](https://www.quora.com/)

<https://www.quora.com/>

That President Xi got it ‘right’ on his biggest policy choices since becoming President. In the West it is extremely popular to attack Xi because of the damage that China does to the environment, or the aggressive way in which China conducts geopolitical diplomacy, or on human rights issues. That is because these are ‘outward’ looking issues and so people outside of China are disproportionately affected by them.

However, if you look on an inward basis he has lifted a staggering number of Chinese people out of poverty by focussing upon the poorest people in China rather than the wealthy. This is something which he receives virtually zero credit for doing, even though it is an absolutely staggering achievement. Admittedly: this didn’t all happen under his watch, but the low hanging fruit was already won by the time he was President. He was left with the ‘hard yards’ of reducing the final balance to something close to zero. Getting the poverty from 50% to just about zero in two decades - staggering. If any other country did it, that would be Nobel prize material.

There are plenty of valid criticisms to be made of President Xi, but I don’t think he gets nearly enough credit (or indeed any credit) for his signature policy success – almost single handedly ending Chinese poverty, and thereby cutting global poverty to a tiny fraction of what it once was.

# Root Cause

Highly esteemed Lanonandek spirits from within our local universe of Nebadon were assigned as System Sovereigns of our local system to oversee Earth's humanity and their spiritual development. 200,000 years ago they, the Lucifers, became infatuated with their authority and turned against the regents of Nebadon, Mary and Jesus, as well as rejecting God. Through their Planetary Princes, also Lanonandek spirits, they had taken the humanities of 37 worlds within their local system into their Rebellion.

Through living through our minds, suppressing our feelings, we on Earth will continue to be at war with each other, illnesses of all descriptions will continue from our feelings suppression, famine and inequalities prevail, control of others is the core of all systems, we cannot determine truth from falsehood and life on Earth is a living hell. We have been continually seduced by mind Mansion World spirits and we live life in a stupor – nothing more than zombies doing the begging of the evil ones, the rebellious Lanonandek spirits.

Through living through our minds, suppressing our soul based feelings, we have been progressively going further and further away from our Heavenly Parents, now to the point that we cannot go any further. Through working cracks in the Universal Contract governing the Rebellion and Default, this control has been ended formally as of 31 January 2018.

# Pathway Forward

To liberate one's real self, one's will, driven by one's soul, moves one to embrace Feeling Healing, so as to clear emotional injuries and errors. With the Divine Love, then one is also Soul Healing. We are to feel our feelings, identify what they are, accept and fully acknowledge that we're feeling them, express them fully, all whilst longing for the truth they are to show us.

**God's Divine Love: Pray for it, ask for it, and receive it.**

**The Golden rule is: Never interfere with another's will.**

**Golden Rule: that one must always honour another's will as one honours one's own.**

**New Feelings Way: learning how to live true to ourselves by living true to our feelings.**

**We are to express our feelings, both good and bad, at all times, and to long for the truth of them.**

**By living true to ourselves true to our feelings, we are living true to God. It's that simple.**

# **PASCAS FOUNDATION for the World**

We enable awareness so that people and communities may profoundly grow their lives, livelihoods and exponentially enhance their futures.

Empowerment is by:

the New Way: Learning how to live true to ourselves by living true to our feelings;

enabling the true liberation of women through the truth of their feelings;

assisting urban as well as remote and rural communities with access to truth through all levels and forms of education;

supporting delivery of quality and accessible healthcare;

improving opportunities for and the safety of all, especially women and children;

and fostering a new era of leadership and leaders.

*It takes a village to raise a child.*
