Parks for Humanity Our Incredible Reality

This document introduces just one of the many edu-tainment units proposed for Pascas Park.

PASCAS PARK

We may move from 3rd dimension to 4th dimension.

What does that mean? (Actually, from 1st to 2nd.)

3rd level is where the Earth is now, people living openly together who are openly negative and openly positive.

4th level is unconditional love on the positive side and love of self which is on the negative side.

At 4th and 5th levels, openly negative beings cannot live on a planet that has moved to these levels.

PASCAS PARK

Unconditional love without wisdom is a problem.
These people can be very easily manipulated.
They just do not have the strength of character to
say no!

The Earth is moving into a state (4th dimension)
that is 100 times more harmonious than 3rd level
dimension.

These notes are from a talk recorded by David Wilcock

PASCAS PARK

5th dimension is the level of honour.

It is this level that you are willing to sacrifice yourself for a greater cause, in which you have a sense of duty, whereas a 4th D person may not want to do so.

A principle of honour is where you say, I do not like doing this, but it is my duty and I will see that it is done.

PASCAS PARK

4th D is where love exists.

5th D is where light and wisdom exist.

6th D is where love and light exist together – the brow chakra. At this level you have compassion and wisdom – unity – oneness.

7th Level is the level at which we have the Guardians who advise groups like Ra.

The Guardians ensure we all get where we need to go and no one falls off.

PASCAS PARK

After level 5, we move into Oneness, being level 6.

You are re-gaining who you really are.

You are recognising who and what you are.

There are no messiahs, for each and everyone of us is the Christ Consciousness.

The Earth is evolving as are we.

PASCAS PARK

Only beings in 4th and 5th level densities need vehicles to travel inter-galactically.

When you evolve to the 6th density level, you are like a whole planet of people fused into one mind.

That becomes such a powerful entity that you will just think yourself into anywhere in the universe that you want to go and you are there!

You do not require a vehicle or ship to travel.

PASCAS PARK

When we evolve progressively into the 4th dimension, we will have seemingly super hero powers.

We will be able to levitate ourselves,

manifest objects with our thought,

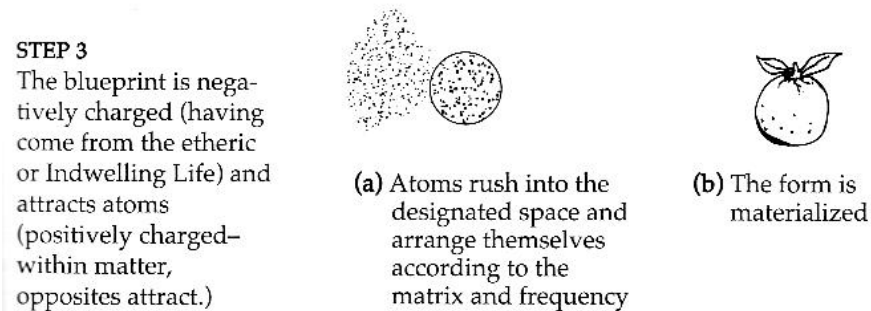

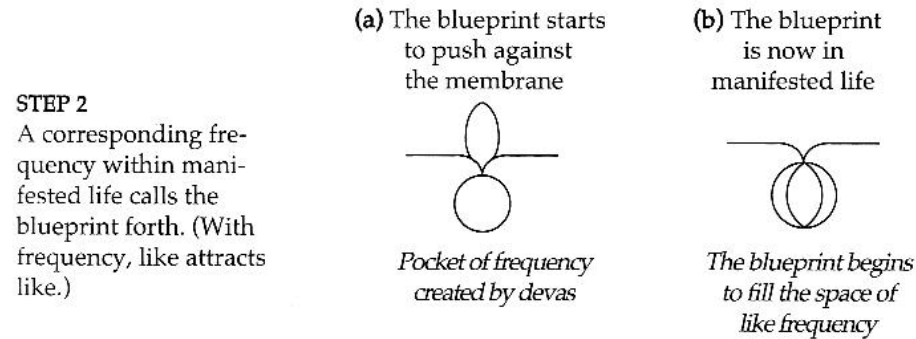

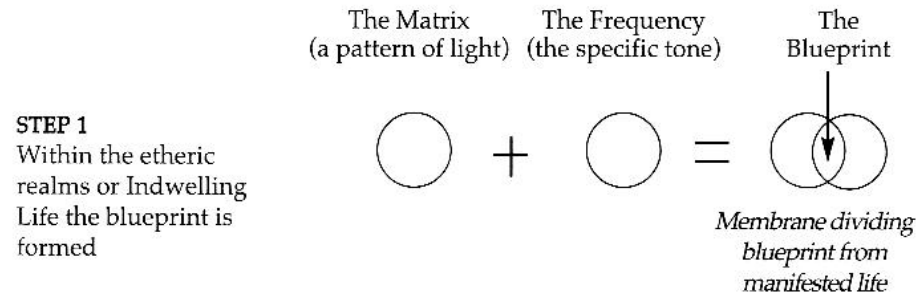

travel through time,

travel through space (with a vehicle),

provide for instantaneous healing,

and communication telepathically – no more secrets!

How Matter is Formed

PASCAS PARK

Extra-terrestrial (ET's) who are within our domain are generally 4th D or higher.

Their influence upon a planet is limited by the desire of the habitants to be subjected to them.

The beings above 5th density, you have the unifying of service to self and service to others.

At the dawn of creation, everyone knew that there was no separation, that they were one with the Creator.

August 2008, Edgar Mitchell says that he knows for a fact that aliens are real, have been in contact with us for 6 decades, that the Roswell crash was real, and that we have reverse-engineered some of their stuff.

Edgar Mitchell UFO interview on Kerrang Radio 23 July 2008

Reverse engineering by NASA has given us Teflon coating and a host of other products – by NASA!

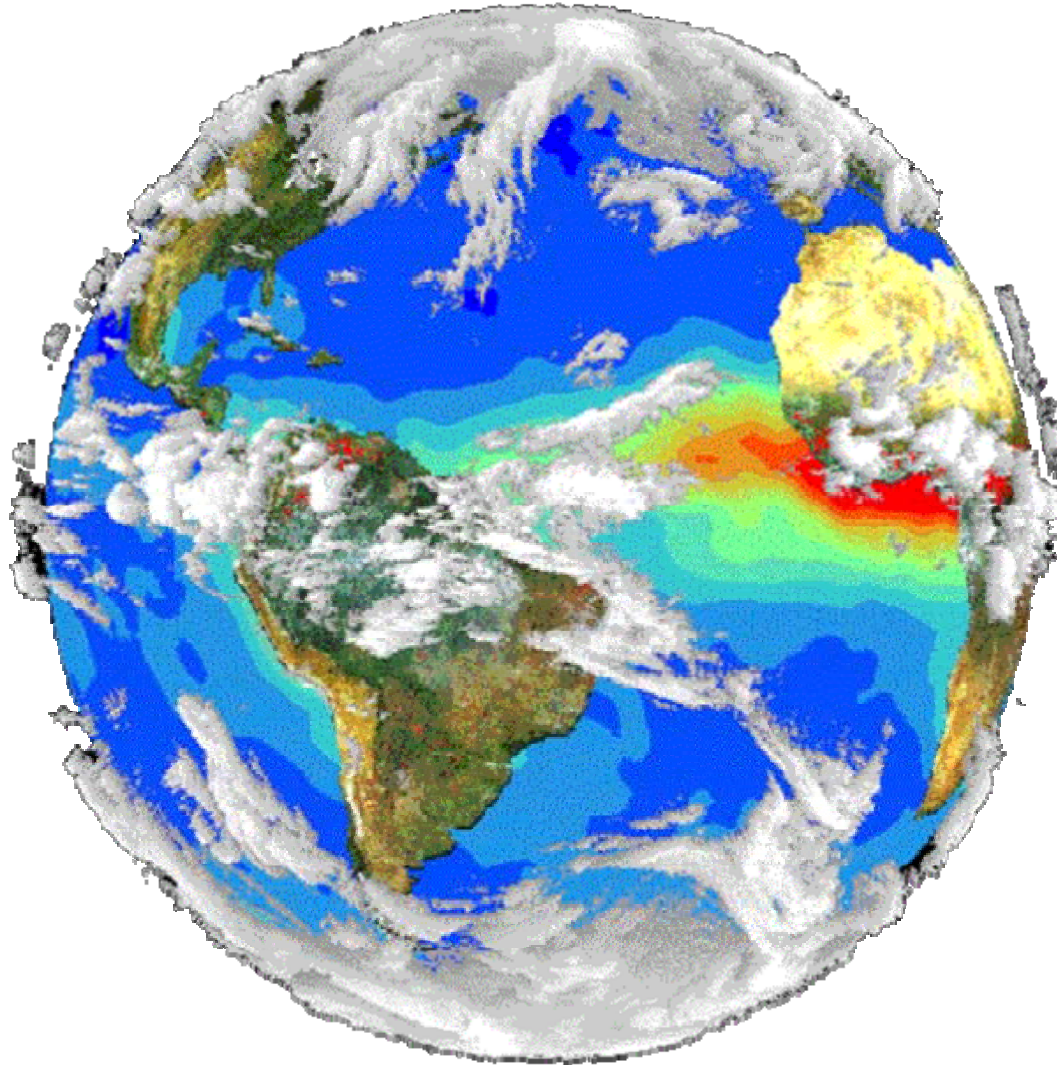

Oh, Ed says our visitors are friendly.

PASCAS PARK

7th Density beings, the Guardians have established and maintain a wall of protection around the Earth to quarantine Earth.

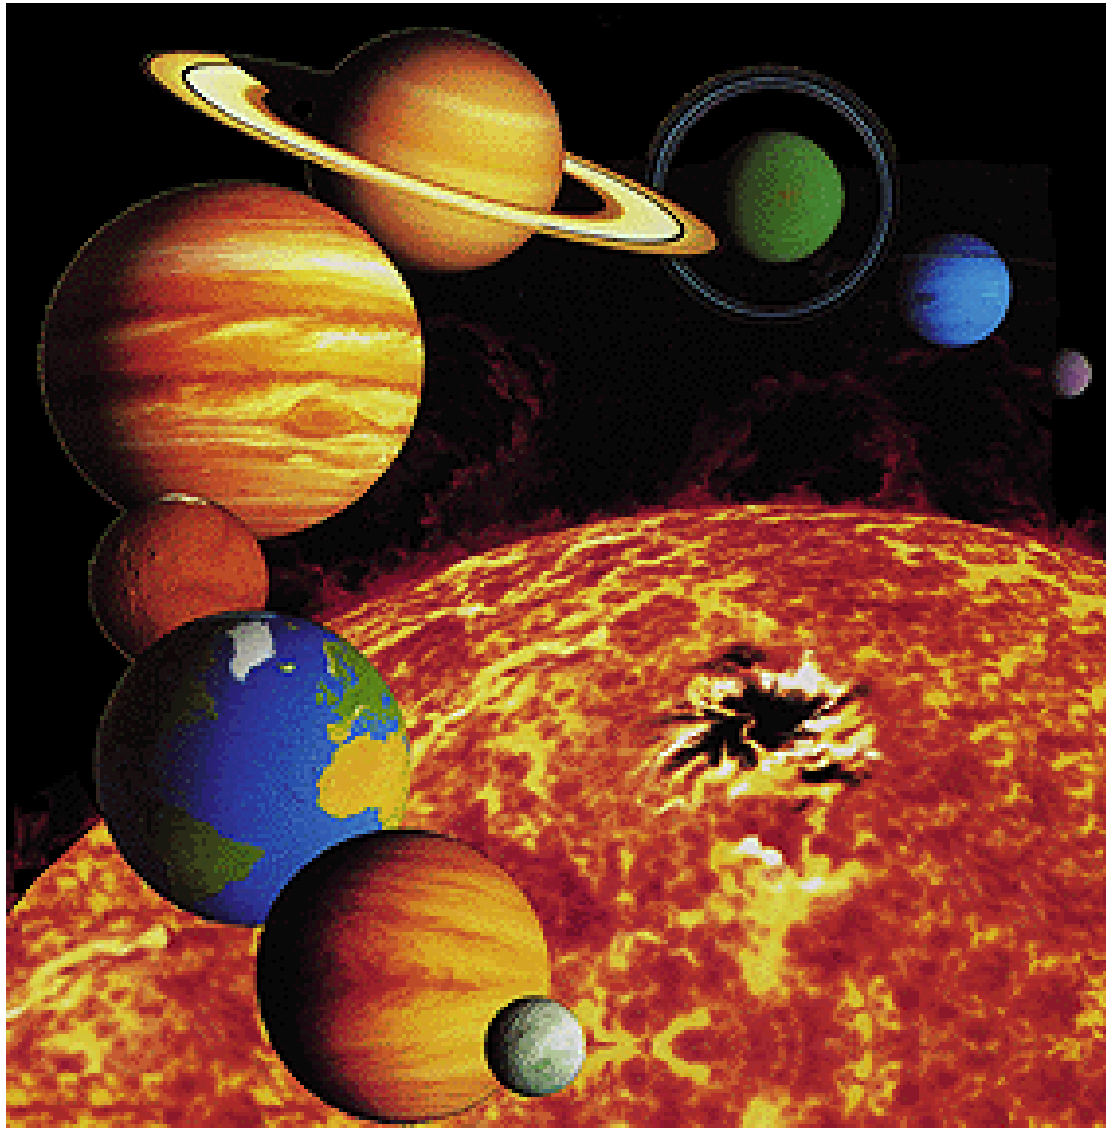

That basically ensures that no unauthorised incursion will occur on Earth by extra- terrestrials.

The Barbury Castle glyph of 2008 - The racheting arcs starting at the center and proceeding outward express pi as increments of a circle divided into tenths, or 36 degrees. If you proceed outward from the center, the multiples of 1/10 of a rotation (including the small circle as a decimal) are 3.141592654...

What is even more fascinating is the comparative size of our Moon!!! It is a planet in itself.

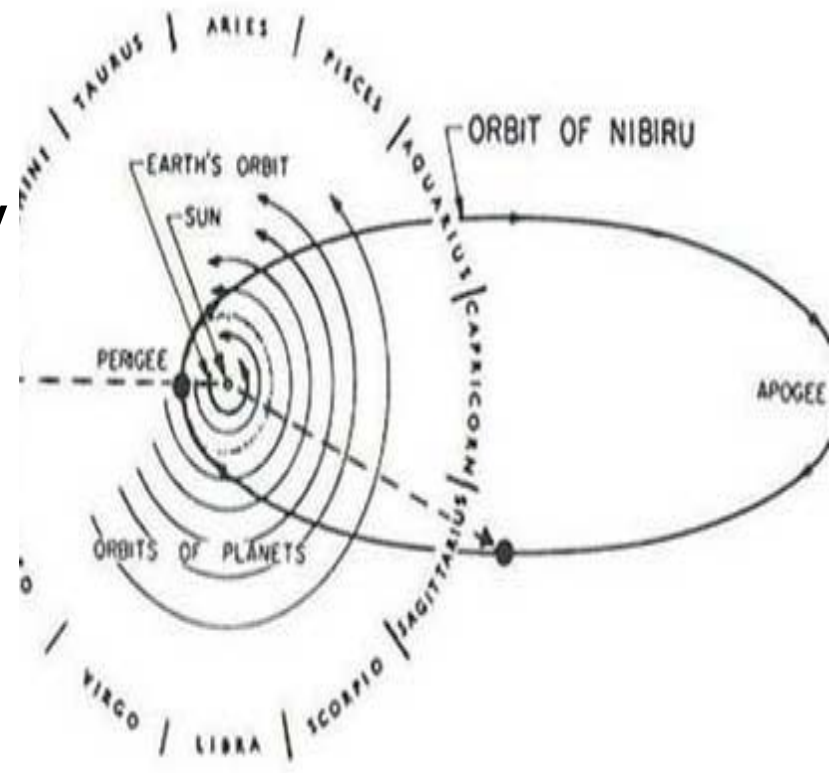

Our moon fits between Mercury and Pluto in size....

Mercury diameter is 4,879 km

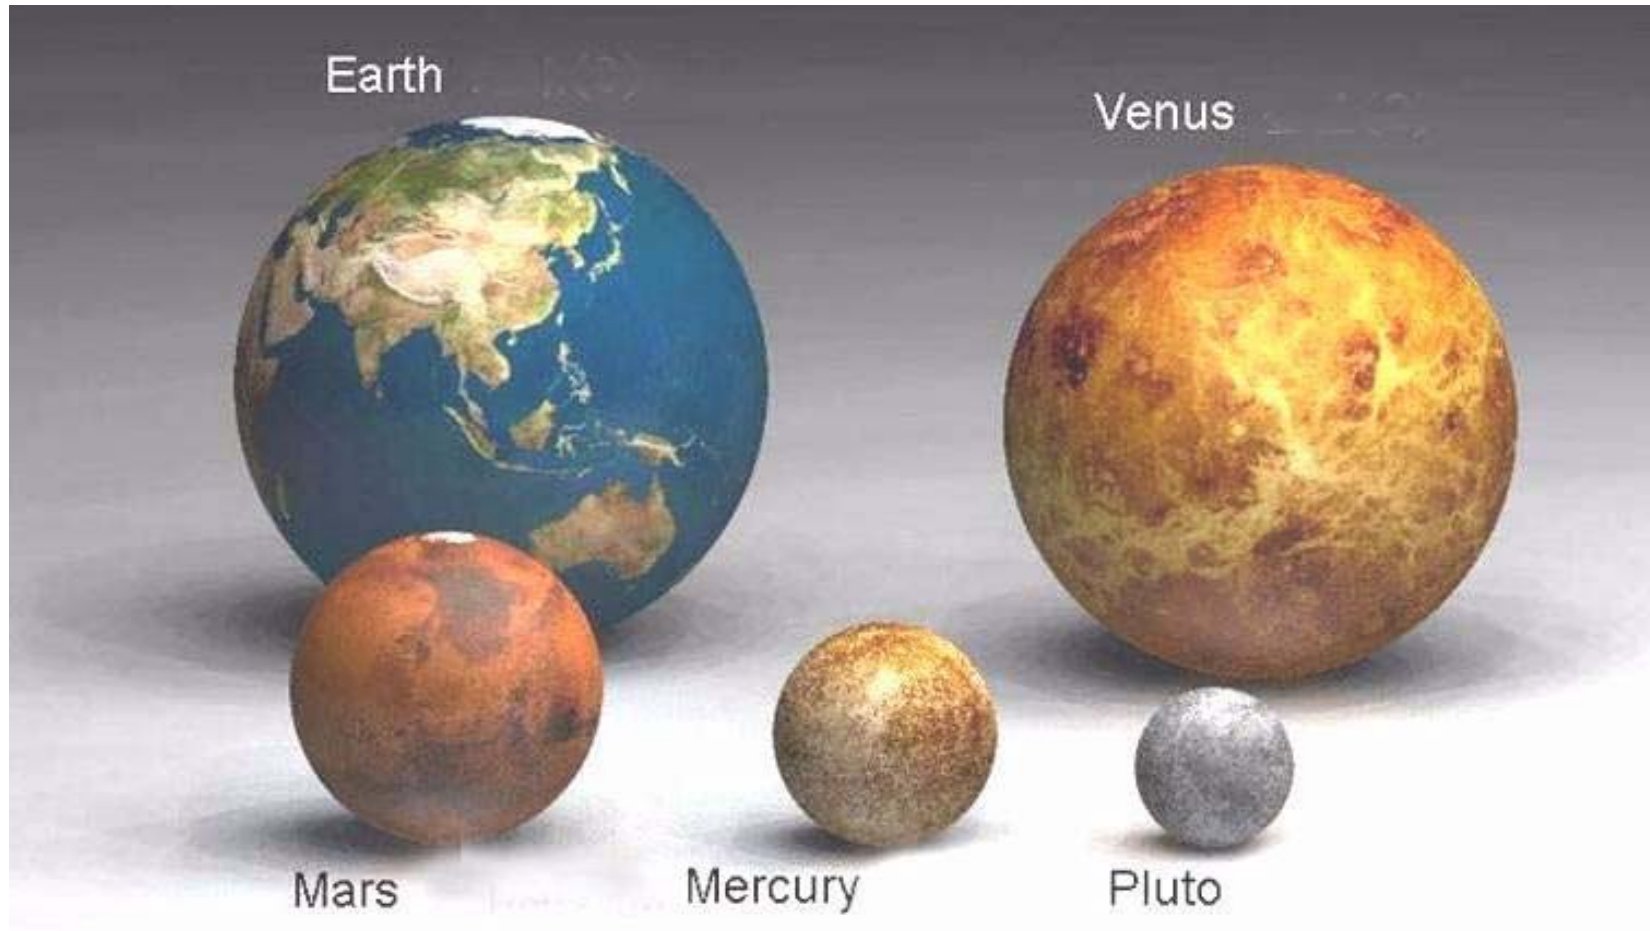

Moon diameter is 3,476 km

Moon is .0123 the size of Earth

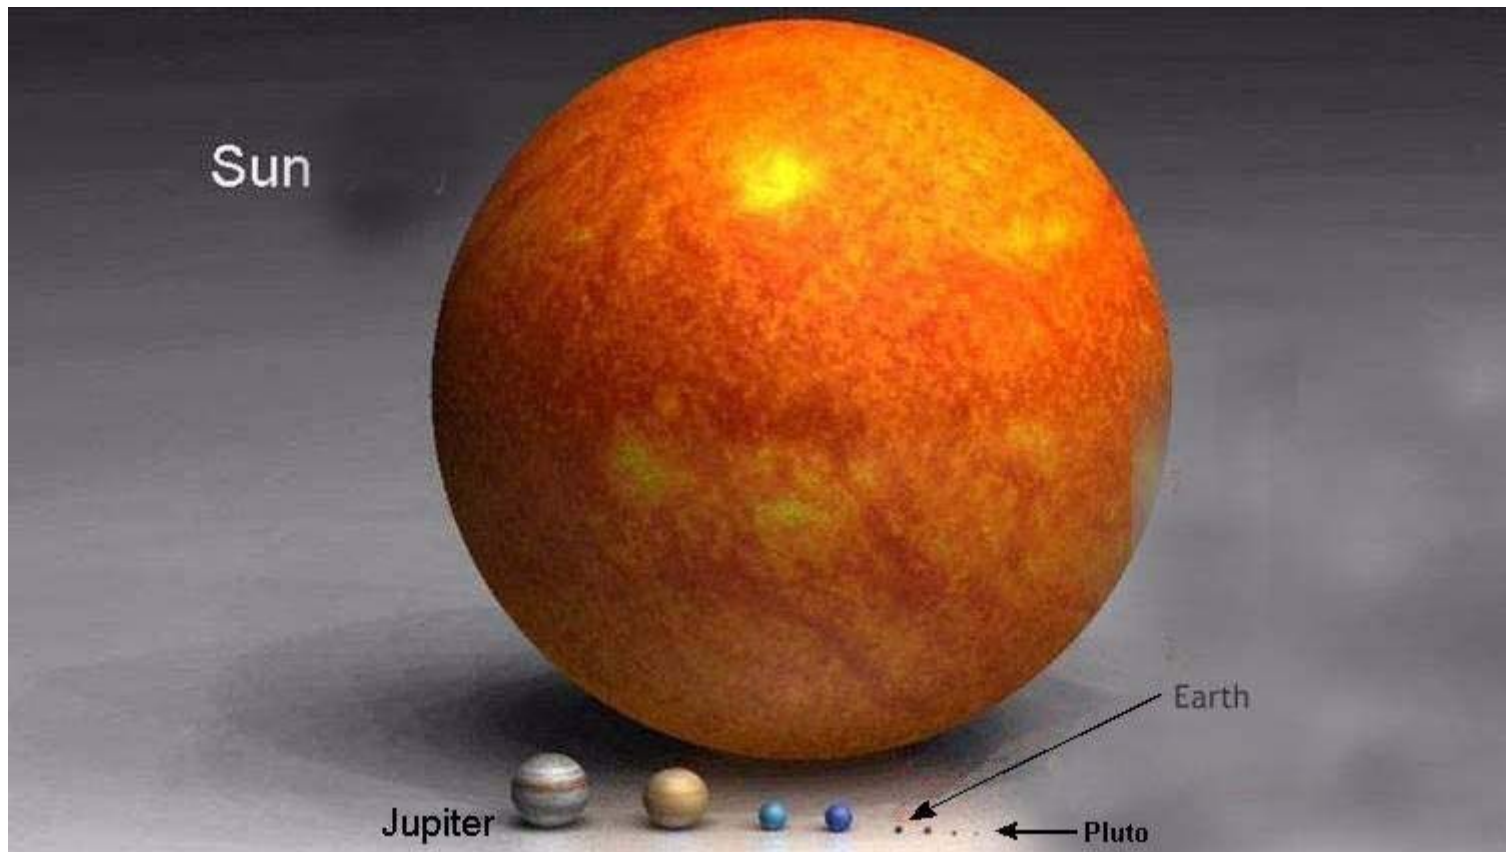

Pluto is .0021 the size of Earth.

THE NEW SOLAR SYSTEM

PASCAS ARK

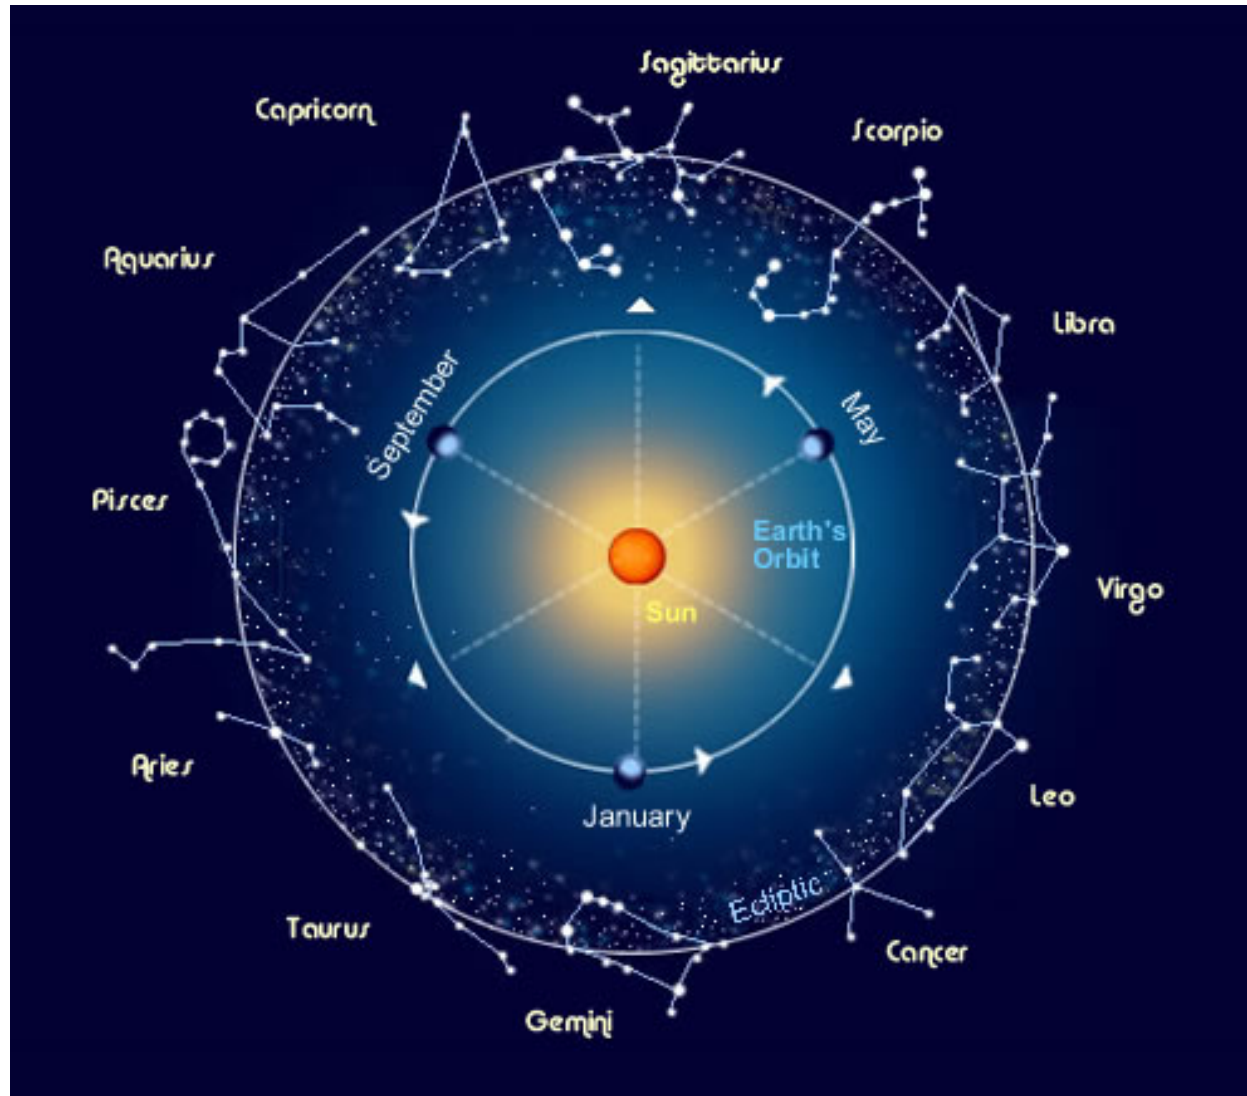

PASCAS PARK

Nibiru, also referred to as Planet X, 10th planet in our solar system, moves oh so slowly, it takes 3,600 years to complete one orbit around the sun.

PASCAS ARK

Constellations have much to do with our lives.

However, horoscopes are an endeavour to have us surrender our freewill.

PASCAS PARK

On average, our solar system, which includes Earth, is under the influence of a constellation for 2,160 years before moving to the next one. To migrate via the 12 constellations requires 26,000 years.

Earth rotates around the Sun, the Sun rotates around its Parent Sun, the Parent Sun rotates around the Universal Central Sun.

Currently, we are on the 'in breath' – at last. We are on the outer reaches of the Universe and we are now migrating inwards, towards higher energy fields.

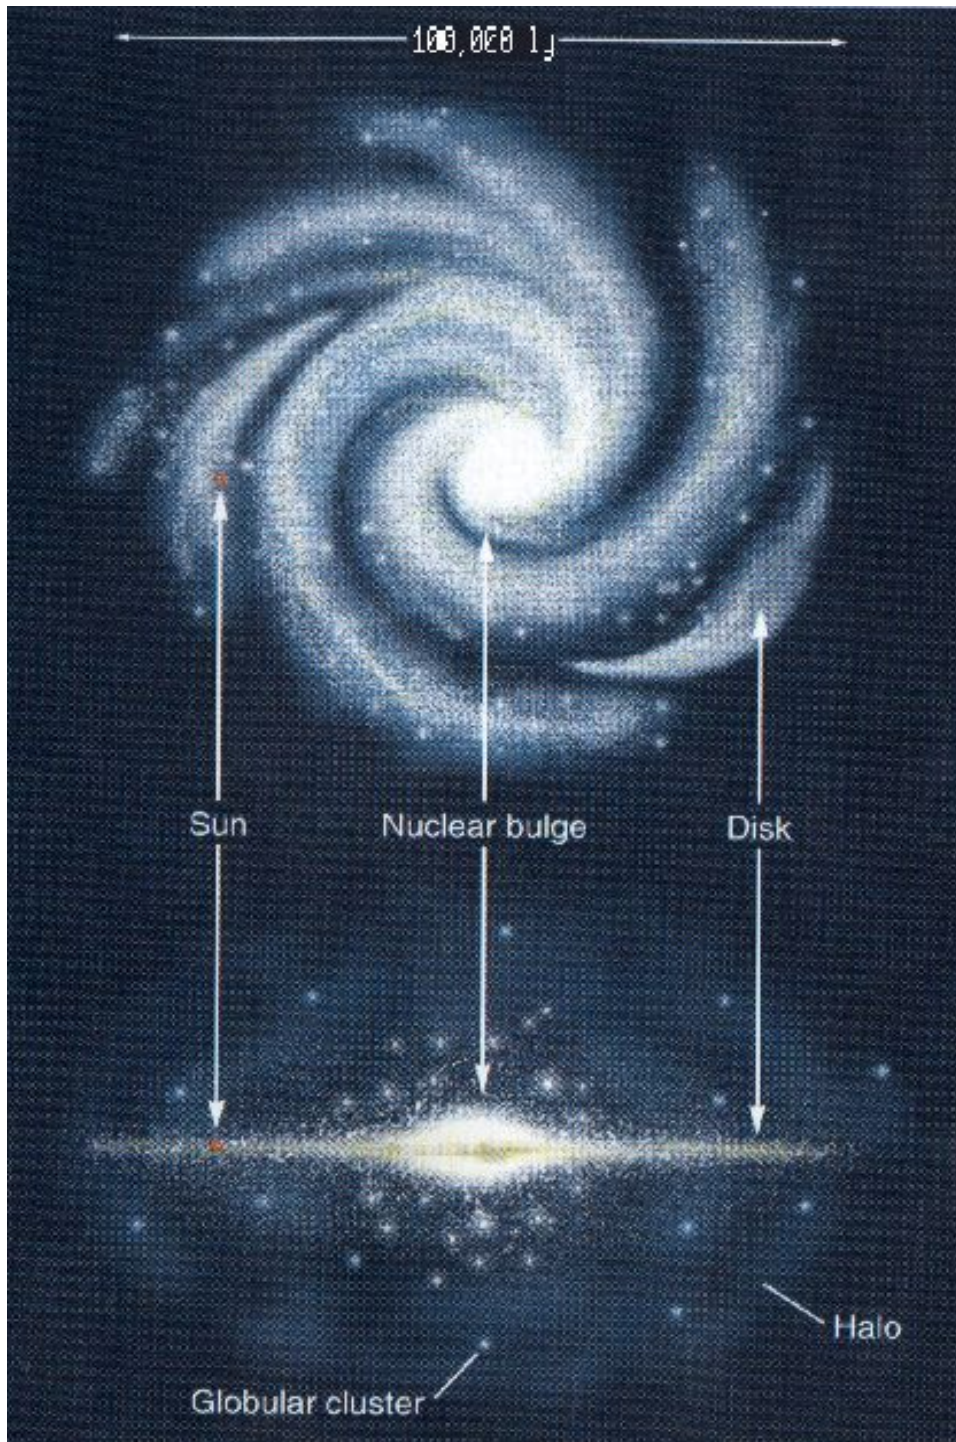

The completion of the Maya Calendar also heralds these changing times.

Dr Carl Calleman's research suggests that the calendar completes on either 28 Oct 2011 or 23 Dec 2012.

Then we restart afresh!

PASCAS ARK

PASCAS PARK

Our Solar System is moving into a higher energy vortex as it moves away from the constellation Pisces towards the constellation Aquarius.

Climate change = Universal Warming:

Here are some highlights:

Sun: More activity since 1940 than in previous 1,150 years, *combined*.

Mercury: Unexpected polar ice discovered, along with a surprisingly strong intrinsic magnetic field ... for a supposedly “dead” planet.

Venus: 2,500% increase in auroral brightness, and substantive global atmospheric changes in less than 30 years.

Earth: Substantial and obvious world-wide weather and geophysical changes.

PASCAS PARK

Mars: “Global Warming,” huge storms, disappearance of polar icecaps.

Jupiter: Over 200% increase in brightness of surrounding plasma clouds.

Saturn: Major *decrease* in equatorial jet stream velocities in only ~20 years, accompanied by surprising surge of X-rays from equator.

Uranus: “Really big, big changes” in brightness, increased global cloud activity.

Neptune: 40% increase in atmospheric brightness.

Pluto: 300% increase in atmospheric pressure, even as Pluto recedes *farther* from the Sun. (David Wilcock) ³³

SUB-ROUNDS ROOT-RACES OF IV ROUND

This is a most incredible time to be living in. The forty years spanning from 1987 to about 2025 will herald such massive and progressive changes that little of what we used to know will continue in any form. All of these changes, though disruptive and painful, are constructive and are part and partial of the evolutionary jump in humanity, which includes the steady emergence of a progressed human species (12 strand crystalline DNA) and all such things that are now occurring.

PASCAS PARK

The dimensions in which various planets are now in are as follows:

Earth – 3rd moving into 4th dimension with some aspects in the 5-6th dimensions

Nibiru – 4th

Pleiades – split (7 sisters – highest 5th dimension).

Arcturius – 5th dimension

Orion – 6th dimension

Andromeda – 4th

Sirius – was a higher level in 6th and has moved down in 6th

1944: birth of almost 200 Homo-Spiritus children.		194
1987: At the time of the Harmonic Convergence but not necessarily related to it, consciousness of humanity jumped.		207
2008: Current observation as we move forward to the apparent evolutionary jump, which will be a slow steady process.		213
4000: Towards the end of the Aquarian cycle, the average consciousness of humanity will be within this range.		450-470
During the Aquarian cycle of 2,160 years, the vast majority of humanity will progress through the first initiation and many will also complete the second initiation.		46

PASCAS PARK

What comes first? Consciousness elevation is followed by possible initiations:

Initiation Level	Dimension Level	Map of Consciousness (MOC) calibration base
1	3	MOC 300 +
2		MOC 400 +
3	4	MOC 500 +
4	5	MOC 600 +
5	6	MOC 800 +
6		MOC 1,000

PASCAS PARK

The possibilities of progressing through an initiation follows achievement upon raising one's own energy or level of consciousness.

The above MOC calibrations are the minimum consciousness levels that one must have, to even be within the realms of possibly progressing through an initiation within the spiritual realms.

Once you have completed an initiation, you do not lose that level of initiation even though you may digress and slip back somewhat in consciousness.⁴⁸

PASCAS PARK

Increasing our consciousness can be as simple as choosing appropriately, that is consider the best option.

High truth books may grow one's consciousness, e.g:

- David Hawkins "Power vs Force"

- Eckhart Tolle "Power of Now"

Oneness Blessing - receiving and giving Deeksha

Prayer is asking God,

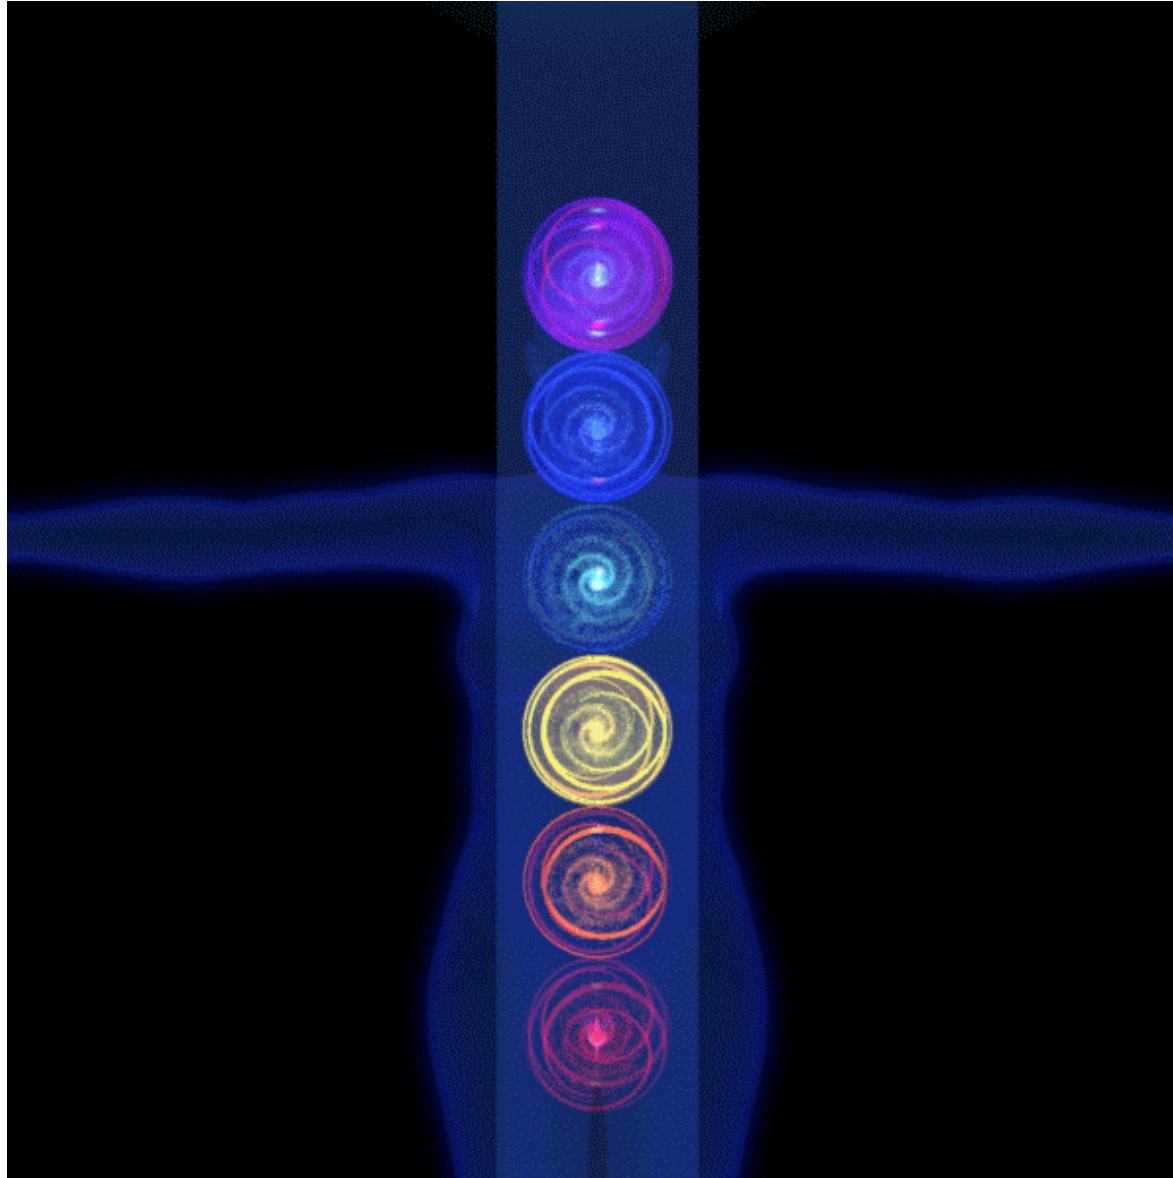

Meditating is listening to God,

Transmission Meditation is working with God.

Transmission Meditation - being a vessel for energy to be transmitted.

Achieving non-thinkingness is a great blessing.

PASCAS PARK

As we progress with the raising of our energy / consciousness, then the elimination of items from our diet is necessary so that our body can withstand and manage the higher vibrations.

Meat, fish, and fermented liquors of all kinds, as well as the use of tobacco are the first to go.

Eggs and cheese are sometimes better eliminated from the diet, but not always necessary.

The lower nature becomes clogged and heavy when meat is included in the diet.

PASCAS PARK

The evolutionary shift in progress, is being aided by the emergence of homo-spiritus beings who have the capacity to achieve and manage higher levels of consciousness greater than homo-sapien sapiens - us.

It took 1,900 years for the level of Intention of the common man to rise from 300 to 700 (MoC), however, it has only taken about 65 years for the incoming level of Intention of Homo-Spiritus children to rise from 1,000 to 25,000 (MoC) (the limit of materiality on this planet).

PASCAS PARK

As of January 1st, 2006 there were almost 23,000,000 of Homo-Spiritus children worldwide. These Homo-Spiritus children are our teachers for as long as we remain within the materiality of this planet.

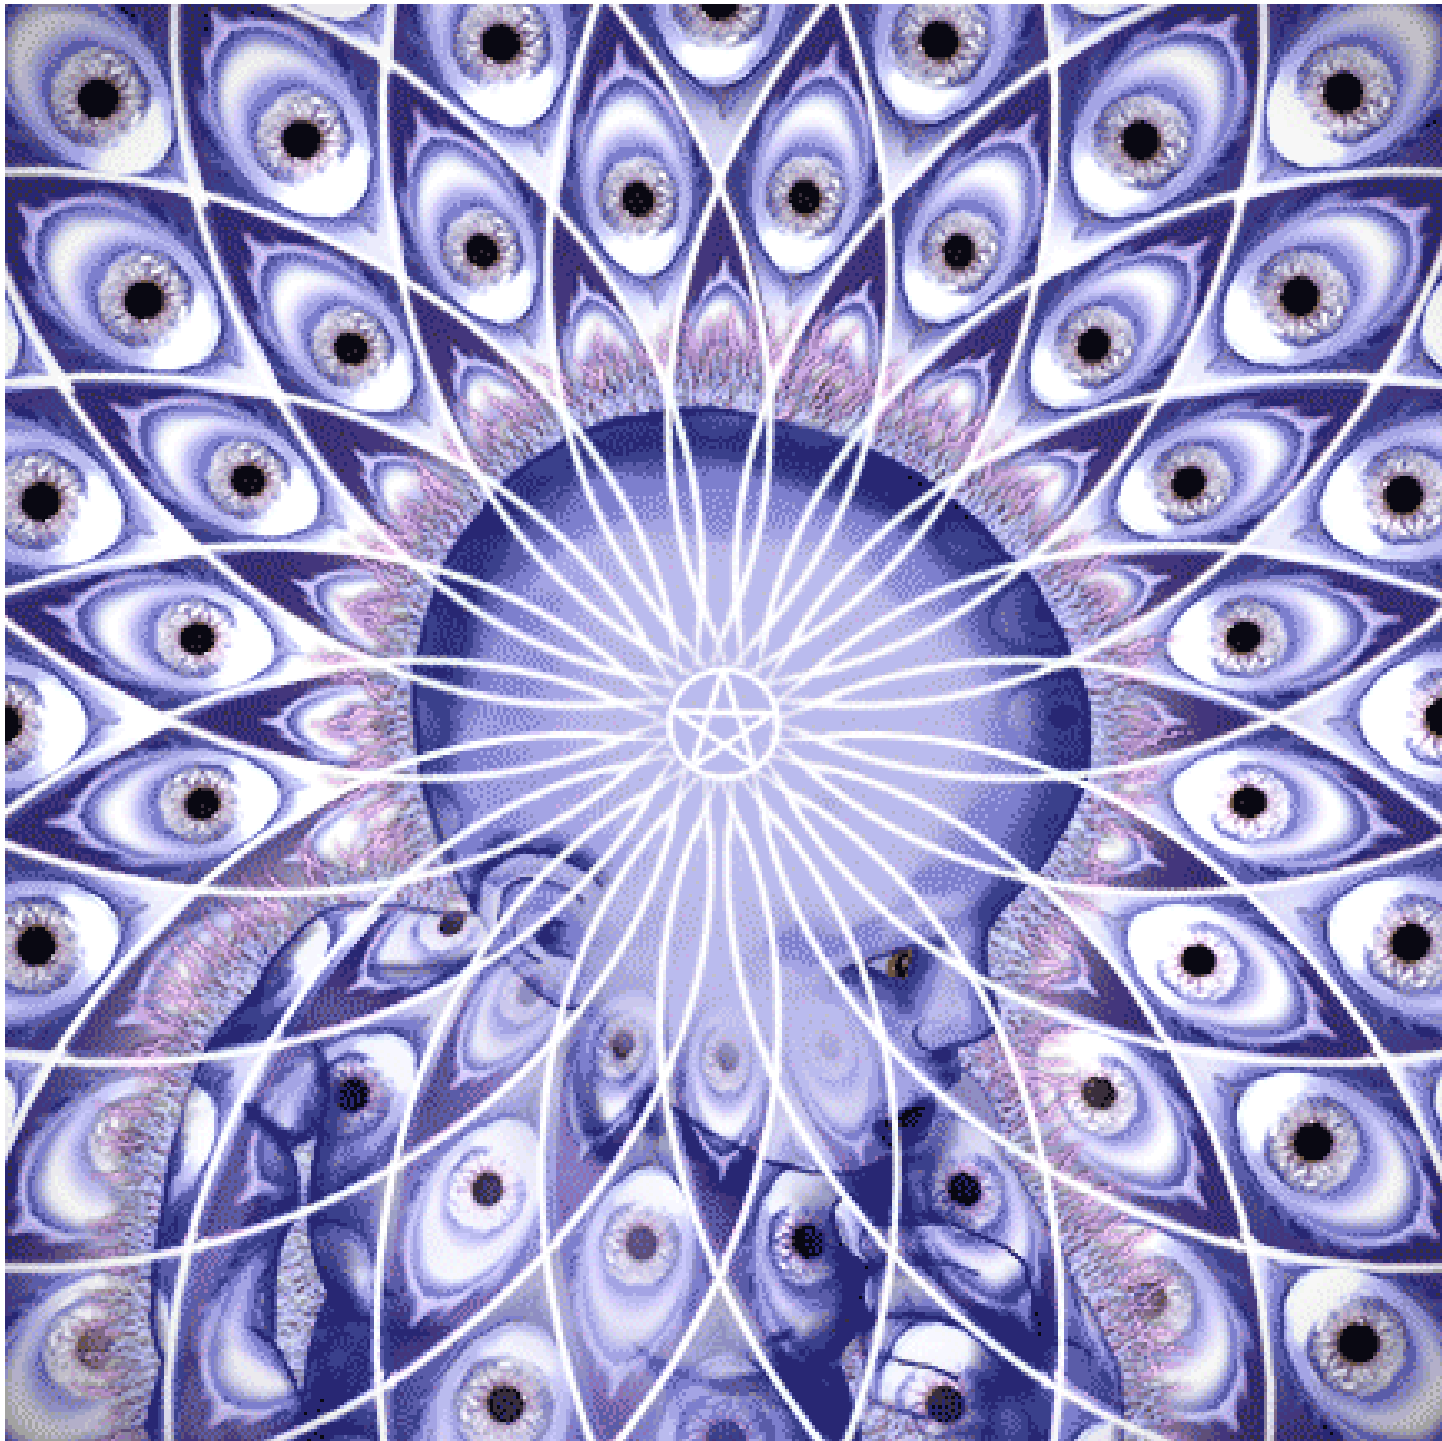

The souls of many of these children are what is commonly called “old souls”, or what the Buddhists have traditionally called Bodhisattvas. They are here to help us move to the next level, the semi-material world, or Void above 25,000; a world of angels, archangels, bodhisattvas and other celestial beings.
