## Hierarchy of Holistic Medical Services

### Remote Areas:

- **Telemedicine via call centres supported by the medical teams at each of the Centres of Excellence in the Bahamas and Australia. These Centres have alliances with world renowned medical units around the world that will be accessed as and when required.**
- **Telemedicine Kiosk: Through satellite communications, the kiosk enables remote access to telemedicine diagnosis and treatment. The Kiosk features diagnostic camera, three lead ECG, retinal scanner, a camera for video-conferencing, video screen, vital signs measurement and a defibrillator. Should the Kiosk (being a laptop unit) be unable to communicate with the greater network, in built diagnostics are able to provide analysis of results.**

### Rural Areas:

- **Medical Clinics may consist of as few as one Clinician. However, he/she has satellite broadband communication linkage to the core centres within the network.**
- **Third world remote clinics will focus on:**
  - **Pre-natal / post natal services.**
  - **Immunisation**
  - **Dental**
  - **Eyes**
  - **Nutrition**

### Urban Clinics:

- **General Practitioners / Physicians will be supported by visiting specialist:**
    - **Obstetrics & Gynaecology**
    - **Orthopaedics**
    - **Dermatology**
- Supporting units will incorporate:**
- **Pharmacy**
  - **Optometrist**
  - **Physiotherapist**
  - **Radiology**

**Integrative Medicine which incorporate natural healing methods to improve and/or restore function. Integrative Medicine allows medical practitioners to combine successful natural and complementary therapies within the framework of orthodox medical training to provide better clinical results with less invasive therapies.**

**Thus, there is a progression in size and complexity within the satellite health and healing units that can be anywhere in the world, all being linked back to the Centres of Excellence.**
