PASCAS WORLDCARE and Global Reach

PASCAS CARE – HEALTH CLINICS to be operating by five to ten years: 4,000

The program will then expand to encompass all communities in all states, worldwide:

REGIONS: (this program was understood to be the objective in 2005)

| Africa | India Sub-Continent | Australia Pacific | South America |
|----------------------|----------------------------|--------------------------|------------------------|
| South Africa 285 | Afghanistan 130 | Australia 190 | Venezuela 50 |
| Zimbabwe 30 | | | Guyana 45 |
| Liberia 50 | Pakistan 270 | New Zealand 160 | Colombia 65 |
| Cote D Ivoire 35 | | | Surinam 85 |
| Ghana 65 | India 450 | Pacific Islands 290 | Ecuador 40 |
| Togo 15 | | | Peru 30 |
| Benin 20 | Sri Lanka 50 | 640 | Bolivia 55 |
| Nigeria 50 | | | Argentina 70 |
| Mali 40 | 900 | | Paraguay 65 |
| Guinea 80 | | America | Chile 70 |
| other 20 | | US Indian 400 | Brazil 195 |
| | | | other 70 |
| Africa 690 | | | |
| | Other (SE Asia) 290 | Caribbean 200 | Sth America 840 |
| Madagascar 40 | | | |

Maxi Clinics 3%
 Standard Clinics 94% **Average number of employees per clinic including medicos: 60**
 Micro Clinics 3%

World Total 4,000

(As of 2017, the program is to be worldwide, without limitation)

Now, in 2020, it is understood why the northern hemisphere was not part of the long term agenda!

2050 "mini" ice age projection being investigated

And if that occurs then sea levels may drop by around 400 feet (120 metres). This event has been recognised as cyclical and it is what is driving present extreme weather and Earth events – not man-made!

Should a micro nova induced ice age unfold then land bridges may emerge worldwide due to evaporation and prevailing very cold conditions globally:

Possible survival zone is within the tropics or 15° either side of the equator.

- A tropical climate is one where the mean temperature of the coolest month is more than 18 deg C
- Tropical regions typically have a small annual range of temperature
- Thanks to man-made climate change, tropical regions are expanding 1.25 to 2.5 degrees of latitude, or 138km to 277km, towards the poles
- Some regions might become drier while others experience an increase in extreme rainfall
- Tropical cyclones could also occur in regions they did not affect before
- Vector-borne diseases could affect more regions
- While the tropics are the most biodiverse region on earth, some species may not be able to cope with climate change in time and could risk extinction

Source: State of the Tropics report

GEOPHYSICAL MICRO NOVA appear to take place every 12,000 to 13,000 years!

We are in global warming as the ice sheets continue to melt owing to the core of the Earth heating up and with the magnetic field weakening, all in preparation for the next Micro Nova blast (although currently the sola minimum is stronger than the heating up so we're going into global cooling, but it won't be long before the inner heat over takes any cold effect).

The question being investigated is it at the time of Earth passing through the peak and trough of a full cycle that may involve a surge of energy and a major or minor Micro Nova / Pole Shift event or is it the centre line of the cycle that is the field of energy that induces the Micro Nova / Pole Shift events or is it a Sun micro nova event on its own?

Consider that the oscillating path of Earth and its neighbouring planets takes them through the equatorial line of the universe twice in each complete cycle of around 26,000 years. That means it passes up through the line and then passed back down through the line every 26,000 years. This also coincides with the Mayan calendar structure.

At the time of passing through the equatorial line, concentrated pressures are placed upon the structure of spaceship Earth, thus accentuating normal climatic conditions and Earth crust movements in the form of volcanoes and earthquakes. Similar abnormal events have been observed upon our neighbouring planets.

Thus, Earth now with 8 billion population demonstrating an overall soul condition in the mid range of the 1st spirit Mansion World conditions, these galactic pressures tend to suggest that we are in for one very unstable ride over the coming decades.

COSMOS – plasma, electric universe

Gareth Samuel: Seeing Precession Differently | Space News

<https://www.youtube.com/watch?v=mdLxP-w1LGg>

Star takes 550,000 years to complete one orbit around Arcturus, every 25,000 years we complete one rotation around Sirius filament Star being Earth's Sun.

Galaxies are linked by cosmic filaments. These filaments connect galaxies across unfathomable distances which have been found both magnetised and to emit electromagnetic radiation.

Vast networks of filaments that connect electrical objects across all scales of the cosmos. It is from these filamentary networks that stars are formed eventually making up the Catherine wheel galaxies. Giant plasma filaments connect super clusters across vast distances.

It is these twisted filaments that form like DNA helical strands that celestial bodies are connected and their pathways defined.

Twisted filament pairs have their equivalent celestial bodies. Earth's Sun has Sirius. They rotate around each other requiring a 25,000 year cycle. During such cycles there are two disruptive events that bring about very significant disturbances to the Sun and its planets. The last 'pole-shift' event was extreme, the interim and next event is anticipated to be milder – whatever that is!

The Earth / Sirius rotation around Arcturus takes 550,000 years. A further, larger cyclical event requires 4.5 million years. The rotation around Pleiades requires 26 million years to complete.

Thus, nothing is moving in a straight line, the precession is in balance with each element rotating around a larger element, all following huge plasma, electric filaments.

Spirits and Angels

The Urantia Book (TUB): (159.4) 14:5.8

Monotony is indicative of immaturity of the creative imagination and inactivity of intellectual co-ordination with the spiritual endowment. By the time an ascendant mortal begins the exploration of these heavenly worlds, he (and she) has already attained emotional, intellectual, and social, if not spiritual, maturity.

(159.5) 14:5.9 Not only will you find undreamed-of changes confronting you as you advance from circuit to circuit in Havona, but your astonishment will be inexpressible as you progress from planet to planet within each circuit. Each of these billion study worlds is a veritable university of surprises. Continuing astonishment, unending wonder, is the experience of those who traverse these circuits and tour these gigantic spheres. Monotony is not a part of the Havona career.

(159.6) 14:5.10 Love of adventure, curiosity, and dread of monotony — these traits inherent in evolving human nature — were not put there just to aggravate and annoy you during your short sojourn on Earth, but rather to suggest to you that death is only the beginning of an endless career of adventure, an everlasting life of anticipation, an eternal voyage of discovery.

Transporter Seraphim – angels and spirits move great distances by utilising energy lines. What is now being discerned in the physical also may be representative of what prevails within the spirit realms.

The Antennae that draws energy to the core of Earth:

The centre modulation point of Earth is the antennae that is attracting and receiving the energy transmissions from the Sun that is presently progressively increasing the rotation of the inner core of Earth which is impacting upon the stability and warmth of the surface of Earth. This has been unfolding from around the 1950s.

Global warming is not man-made!

What is in the Center of the Earth that Creates the Magnetic Field?

What this means is there is no iron core in the center of the Earth. The center modulation point is not greater than 50 miles in diameter or smaller than 10 miles.

What happens when a solar flare hits Earth?

International Space Station

Radiation risks for astronauts on the ISS are minimal, but for future astronauts travelling to deep-space locations like Mars they could be more severe.

Spacecraft electronics

Hard X-rays from an incoming solar flare can damage the internal electronics of spacecraft and prevent instruments from working.

GPS failure

Increased solar activity can prevent GPS navigation satellites operating functionally and, as most are in a similar orbit, one is not able to provide backup for another.

Atmosphere

Soft X-rays from X-class flares can increase the ionisation of the atmosphere so that, while it might produce fantastic auroras, it also interferes with radio communication.

Power grid

Increased solar activity can cause geomagnetic storms, which have been known to knock out power grids to entire cities in the past.

Orbital decay

Increased ionisation of the atmosphere caused by solar storms can increase the drag on satellites, decaying their orbit, as was the case with NASA's Skylab space station in 1979.

Aircraft

In the event of increased solar activity aircraft must avoid flying near the poles and at high latitudes to ensure that communications aren't affected.

Pipelines

Telluric currents, those found in long pipelines, can be affected by solar flares when systems designed to protect pipelines from corrosion are overloaded.

Telephone mast

Even cell phones are not adverse to the effects of solar flares, as the increased activity can prevent devices communicating with telephone masts.

Sun ejects its material shell between every 12,000 and 13,000 years. This micro-nova heatwave hits one side of Earth, evaporating oceans and lowering their levels by around 400 feet (120 metres).

The ejected material shell arrive a little later raining tektites / meteors upon Earth on the far side from the heat wave.

While the material shell rebuilds around the Sun, there is no warmth generated by Sun during these 11 to 22 years. The massive amount of moisture in Earth's atmosphere generates an instant ice-age. The regions between the tropics, or 15° degrees either side of the equator, away from earthquake / volcano zones, are possible survival regions.

Avonals - Magisterial Daughter and Son

The first physical step to bring about the end of the Rebellion and Default for Earth's humanity was the materialisation of Machiventa Melchizedek 1,973 years prior to Jesus' conception. The plan could be said to have been meticulously mapped out and each step has unfolded with Machiventa Melchizedek, together with Jesus and Mary, orchestrating our Heavenly Mother and Father's intentions to this day. The plan culminates with the appearance of the Avonal bestowal pair from Paradise, being a Magisterial Daughter and Son, who will guide Earth's humanity, both in the physical and spirit, through their individual Feeling Healing, and with Divine Love their Soul Healing, during the next spiritual age of 1,000 years now to commence, being the Avonal Age. Machiventa Melchizedek has been administering this 4,000 year unfoldment and will continue with his role throughout the Avonal Age. Now we are engaging in the biggest event in history for Earth's humanity, the healing of the imposts of the Rebellion and Default. All of the Avonal Age is now required to establish the universality of the healing Earth's humanity.
