PASCAS PARK

Pascas Park is a themed edutainment centre, a knowledge portal, with:

- Entertainment units delivering up to 16 hours (2 days) of visitor quality time for all age groups.
- A platform for determination of truth.
- An introduction to the future way forward.
- Capacity for 500,000 to 3,000,000 visitors per annum.
- It is to be a global network of venues.

2. Spirituality & Health – Foundation of Light: a New Healing System (Brain de Flores).

‘Light Body Health Science’

An evolution in health care and health management is emerging through healing via energy, through sound, and light, thus re-energising, restructuring, renewing and rejuvenation on all physical levels as well as relating to the light body (subtle bodies).

Pascas Health is a new paradigm in health.

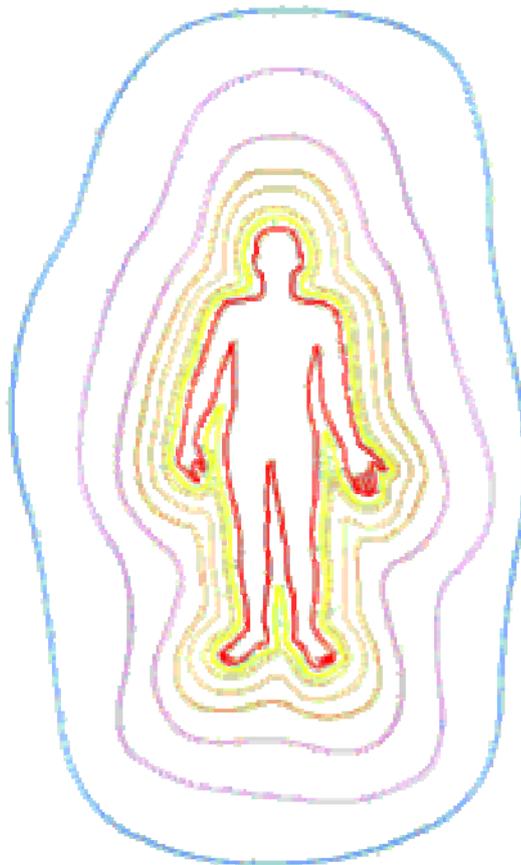

PASCAS ARK

Spirituality & Health – ‘Light Body Health Science’

Foundation of Light: a New Healing System.

As a diagnostic tool, kinesiology at 600 indicates a major shift of paradigm because it is at the interface of the linear and the nonlinear domains. Its major value is that there is no other instrument or technique available at such a level, which indicates a shift from just that of the observed (“objective”), but also includes the observer as well as the impersonal field of consciousness itself. Thus, kinesiology is a tool par excellence for the advancement of science and knowledge.

INTEGRATIVE KINESIOLOGY (I-K) is a synthesis of many related areas of research namely:

- Applied Kinesiology,
- Acupuncture,
- Touch For Health,
- Nutrition,
- Chiropractic,
- Brain Science,
- Neuro-Linguistic Programming (N.L.P.),
- Cranio-Sacral Therapy,
- Special Education,
- Sports Medicine,
- Hyperton-X,
- Naturopathy,
- Wholistic Dentistry,
- Psychology,
- SuperLearning and
- Stress Management.

I-K uses Muscle Response Testing as a tool to evaluate states of stress in a person's life relative to the tasks that they perform as a before and after check on levels of integration. Practitioners use unique corrections to achieve great results!

The **MIND-BODY** is a **BIO-COMPUTER**. Practitioners can show people how to change old negative patterns in their Bio-Computer and teach them to "switch-on" their brains and enjoy whole body movement for enhanced learning. In the process most learning difficulties, such as Dyslexia, are dissolved and the person can have a new lease of life. Allergies, pain, coordination problems, procrastination and phobias can be eliminated with correct applications of the I-K principles.

“All dis-ease is mind generated, and all healing is generated by the love energy of one’s soul.”

The Ego (mind based) manifests illness; the lower one’s level of consciousness (soul condition) then the more prevalent will be illness. Below the levels of 200, the ego and fear of the mind dominate; however, as you raise your level of consciousness by growing in love and achieve a level of 500 or higher, you begin to transcend ego dominance. At the level of 600, all healing is possible.

The Brain at the consciousness level 200 crossover:

While these following basic differences in brain physiology that occur above and below the important consciousness level of 200 are decisive, even more significant change occurs at that level because above level 200 in consciousness as per the Map of Consciousness, a unique energy field emerges for the first time in evolution. It is concordant operationally with the physical right brain but is specific to spiritual awareness and consciousness. For want of better terminology, this specific energy field has been labelled the “etheric brain” to denote that it is purely energetic and not protoplasmic or anatomical in nature.

This etheric brain, or spiritual energy body, registers higher energy frequencies to which protoplasm is unable to respond.

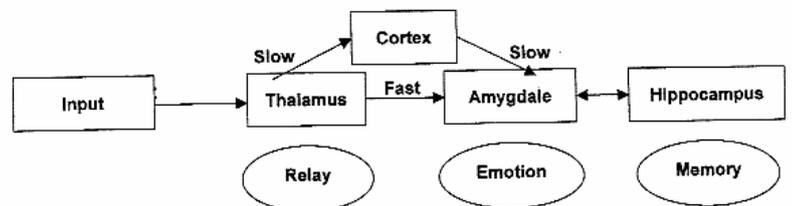

The reality of an energy body that exists independently of the physical brain has been recognised in all cultures throughout history.

Upon attaining the consciousness level of 200, the brains neurochemistry changes in a positive direction, and like a butterfly out of a cocoon, the etheric brain springs forth as a consequence of the onset of the flow of spiritual (i.e., kundalini) energy, and the experience of life and the self in the world begins to transform.

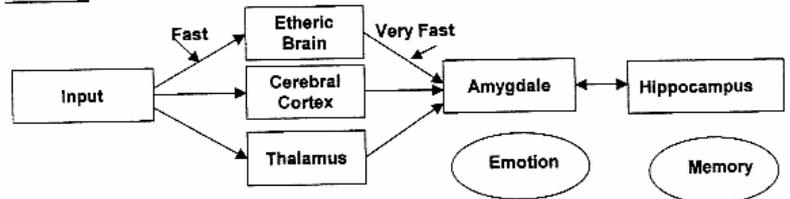

It is with the emergence of the etheric brain at the calibration level of 200 which enables the capabilities to employ kinesiology muscle testing to determine the existence of truth or the lack thereof.

13. Origins of Human 'Awakening' the Rebellion:

The evolution of mankind – a turning point was around 200,000 years ago. Mesopotamia and Babylon was a hub. However, the event mystified around Noah's Ark(s) may have been around 70,000 BC at the time of a shift of the earth's axis. Noah existed but did not build an ark.

14. The Great Avatars:

Descendants of Andon and Fonta (also called Aman and Amon), our First Parents, not being Adam and Eve, delivered teachings that were faithfully memorised and later recorded as the SACRED and INSPIRED WRITINGS. Through later generations, writings were progressively preserved via way of hieroglyphic symbols that are the basis for the writings on temples in Mexico, South America, Cambodia, India and Egypt. Six sets, each of about 10,000 tablets, were carried from Mu (Lemuria), these were then located at: Tibet, Deccan Plateau in central India, Gobi Desert in Central China, Upper Egypt, Babylon in Mesopotamia and Mexico City. Further copies of each of these original sets were further made.

However, from the teachings of the leaders of the Rebellion, 200,000 years ago, stem all of the world's major spiritual and religious teachings, all being in error and contaminating the sacred and inspired writings, all suppressing one's soul based loving and truth based feelings and bringing about dependence upon one's erroneous mind. BC=BCE AD=CE

16. Creation, Devolution, and Evolution are all one and the same:

Creation, Devolution and Evolution are actually one and the same process (cal. 1,000). Creation is continuous, ongoing, and witnessed sequentially as evolution.

The most recent advances in scientific theory postulate that there is a common submatrix to all physical existence, consisting of high-frequency fields of energy (cal. 1,000).

Life is neither subject to nor vulnerable to death but can only be made to change form. Like the laws of conservation of the energy of matter, the law of conservation of life is almost identical. It cannot be destroyed but can only change form (cal. 1,000).

A characteristic of the energy field of consciousness is its innate propensity to evolve to higher and higher levels in order to give expression to the highest potentialities.

In as much as life itself cannot be killed (calibrates as “true”) but can only change form, the animal spirit lives on to inhabit another physical body. In the case of the human, the spirit does not enter the foetus until the third month of gestation (calibrates as “true”). In the lower animals, it occurs earlier but still awaits a viable foetus to energise.

Consciousness seeks to return to the awareness of its own source (calibrates as “true”).

Animal species don’t just die out, their spirits advance / progress to higher levels of advanced consciousness. Once a higher level is achieved, reincarnation as a lesser species does not occur.

It is of critical importance to note that the capacity to think, reason, and thus mentalise did not *replace* the mental processes of the animal, but instead was merely *added* on to it.

The actual process of evolution itself does not occur within or as a consequence of the physical domain, but instead is merely expressed there as a physicality. The evolutionary process occurs invisibly in the infinite field of consciousness itself. Each branch, as exemplified on the level of the hominids, displays the consequence of a progression of consciousness. Within the physical domain, however, the so-called “missing links” of archaeology or zoology are not found to exist. For example, Neanderthal man did not evolve into Homo erectus but instead was completely supplanted by that higher species. That branch, too, was completed at the time of its appearance. Homo erectus did not evolve into Homo sapiens; instead, Homo sapiens came forth already evolved as its own branch. No transitional “missing links” are to be found within the hominids or within the whole animal kingdom.

P.32 Truth vs Falsehood by David R Hawkins

With consciousness research, it can be discovered that the “prey” does not actually value physical life in the way humans do and, in fact, does not even notice the transition from physicality to its etheric continuation and subsequent periodic return to other physical bodies. If a fly or a moth is swatted, it goes right on flying along in its etheric body, unaware of the change, and soon returns in another physical body (calibrates as “true”).

According to the ancient *Rig Veda* (cal. 705), each level of organic life “sacrifices” its life to the higher and thus karmically sanctifies its life and earns its own evolution to higher forms (life serves higher life).

P.33+148 Truth vs Falsehood

POPULATION ESTIMATES of Cities in the First Century A.D.

By contemporary standards the major cities of the Greco-Roman world were small in both geographical area and population. Within their restricted areas, however, cities did have many inhabitants, making high population densities. Not only did people share limited space with livestock, but public buildings, monuments, and temples occupied large areas of their cities. Most people lived in tiny one-family cubicles in structures seldom higher than five stories. The apostle Paul targeted major cities in his ministry.

17. Our Light Bodies: Our Spiritual Form!

HUMAN ENERGY FIELD (HEF)

Each level penetrates through the body and extends outward from the skin. Each successive level is of a 'higher frequency' or a 'higher octave'. Each extends out from the skin several inches farther than the one within it of lower frequency.

PASCAS PARK

Level 26 of the Auric field is the Core Star.

The Core Star is a further quantum leap deeper into who we are than the haric level and is related to our divine essence.

Each star is the internal source of life within.

In this inner place, we are the centre of the universe.

Here is localised the divine individuality within each of us.

LIGHTBODY Level 1

The physical form in its old manner has separated functioning into right and left hemisphere functions. The pineal and pituitary glands are atrophied – size of pea instead of walnuts.

LIGHTBODY Level 2

The sixth-dimensional etheric blueprint begins to be flooded with Light and it begins to release the fourth-dimensional structure, which tie you into karmic experiences across all lifetimes.

LIGHTBODY Level 3

Your physical senses become outrageously strong.

LIGHTBODY Level 4

Mental stages – a massive change in your brain chemistry and electromagnetics of your brain.

LIGHTBODY Level 5

Often, your dream sequencing begins to change. You begin to remember a little more of your dreams. Some people open up to lucid dreaming in the fifth level.

LIGHTBODY Level 6

You are actively, consciously shifting reality pictures out of your field. Your Spirit is usually putting you into contact with people who are working with the Lightbody process.

LIGHTBODY Level 7

You begin to enter the emotional stages of Lightbody: focusing on deeper and deeper levels of opening in the heart chakra.

LIGHTBODY Level 8

Pituitary and pineal gland grow. Activation of seed crystals which receive Light languages from the upper dimensions.

LIGHTBODY Level 9

The translation opens and you begin to understand tonal languages. You are beginning to embody Divinity. You may experience body shifts. A very powerful shift to your multidimensional self.

LIGHTBODY Level 10

You begin to manifest avatar abilities. Teleportation, apportation, and manifestation come at this level. You are fully conscious of being one with the Source and being everything.

LIGHTBODY Level 11

You are operating fully from your God-self and there is no separation. You are manifesting your vision of Heaven on Earth and expressing the ecstasy of your Spirit. You can self manifest.

LIGHTBODY Level 12

This is the final activation of the Divine Plan, as you return and experience your Source.

18. Incarnation, reincarnation and Karma.

We do not and cannot reincarnate. And neither do animals or other species of nature.

Karma is the Law of Compensation.

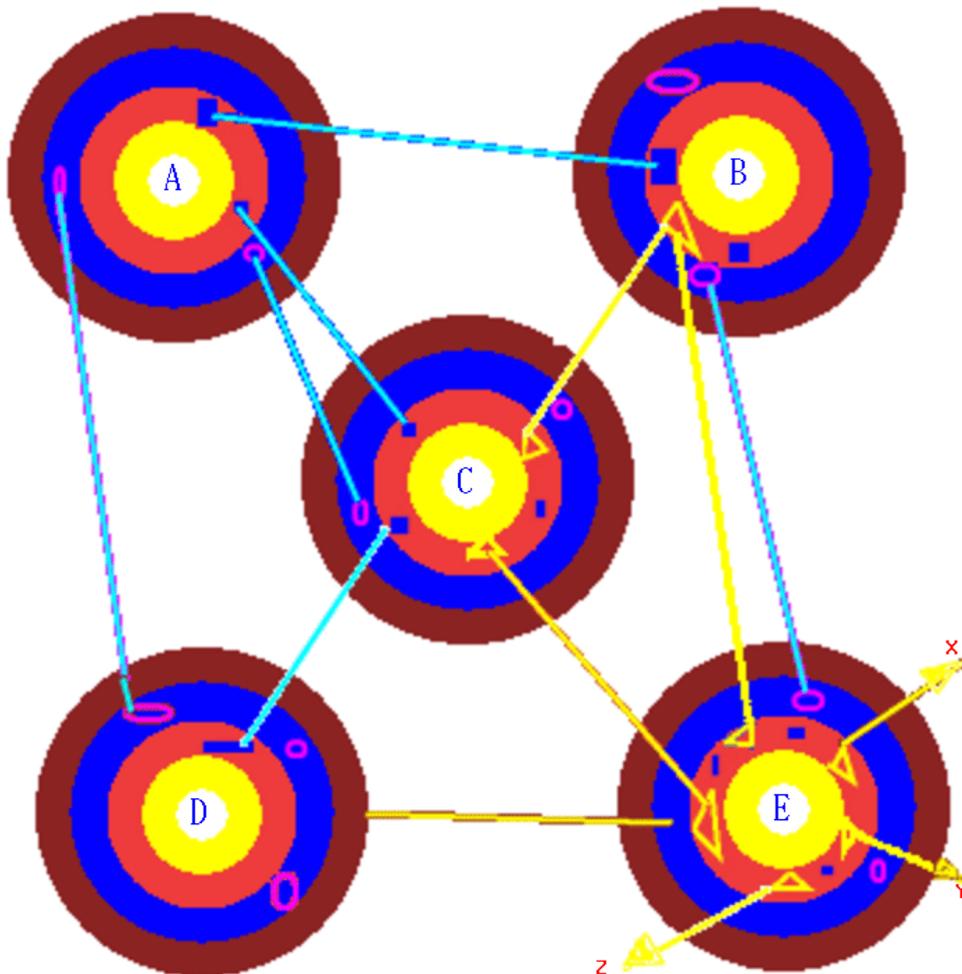

Our Personality is a feeling of God, thus creating our unaware Soul. At conception, our unaware personality (soul) forms both a spiritual body and physical body. Incarnation starts the road of self discovery, children reflect parent's emotions. Parents attract us to incarnate.

PASCAS PARK

Our emotional personality – our soul condition:

Links to members of Family. Our soul personality absorbs the emotions of our parents, our ancestors, and of those around us.

Consider A,B,D are relatives to your parents, C, the flow of emotions then onto you, E. Further, your environment, consisting of x,y,z also mould your emotions.

19. Our Parents attract us! Well no – we are assigned a life experience.

Incarnation

At the time of conception, our soul through the spirit body connects with the physical body.

The process of incarnation takes a lifetime. It is not something that happens at conception and is then finished. To describe it, we need to use metaphysical terms. Incarnation is organic soul movement in which higher, finer vibrations or soul aspects are continually radiated downward through the finer auric bodies into the more dense ones and then finally into the physical body. These successive energies are utilised by the individual in his/her growth throughout his/her life.

It is at adulthood that the individual may try to settle down and have no more changes. Some are able to accomplish this and with it cause their lives to stagnate into safe, set, patterns of clearly defined and limited reality. Most people, sufficiently shaken by their life experiences, see that reality is not so easily definable and continue a lifelong search for meaning that leads them through constant challenge to deeper experiences of fulfilment.

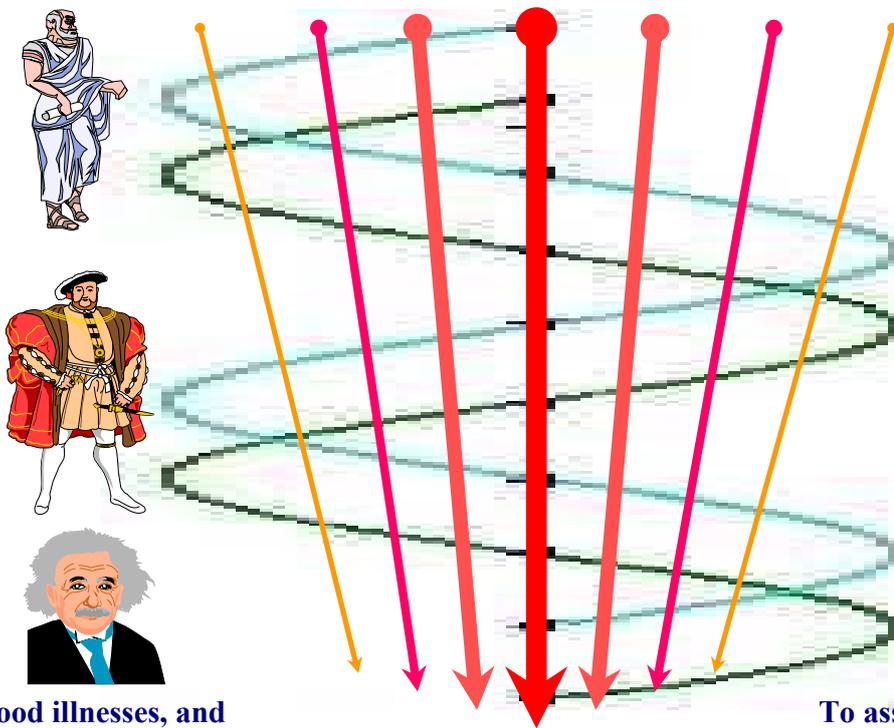

A gold cord connects the Soul to the Spirit Body and a silver cord connects the Spirit Body to the Physical Body. It is the disconnection of the silver cord from the physical body that results in the death of the physical body.

OUR BLOCKED EMOTIONS FLOW DOWN FROM GENERATION to GENERATION:

Thus we have a linear heritage on the physical level as well as our real heritage as we re-incarnate with different families. As we stay linked for ever with everyone we bond with, we inherit their emotions.

Childhood illnesses, and illnesses of baby within the womb, stems from blocked emotions passed down from generation to generation.

We are a product of all that has come before us.

Our own soul condition is reflected in our children.

To assist baby, as well as yourself, work to clear your blocked emotions.

Clearing your emotions improves your soul condition as well as that of your children.

Baby's body, when conceived, is always perfect. Their soul condition is also perfect.

20. Evolutionary Future

- 1,000,000 years ago, humanity evolved with a carbon based DNA of 22 strands enabling a consciousness limit of 1,000 based on the Map of Consciousness.

- 2,000 AD (CE) humanity is further evolving without the limitations of the Rebellion and Default. Homo Sapiens are currently evolving into Homo Spiritus, i.e., calibrations above 500. This commenced in the early 1980s and has been expedited by the Harmonic Convergence that occurred on 17 August 1987 when the calibration for humanity as a whole jumped from 190 to 207.

The Dimensions:

SPHERES in the SPIRITUAL REALMS:

Spheres – Celestial Heaven, Eternal Spheres, then Spheres of Paradise:
The realm of the Angels is the Celestial Heavens spheres 8 to infinity.

Spheres to infinity: Soulmate bonding can be achieved in most of the spheres. (Celestial Spheres are not numbered per se.).

Eighth Sphere: All emotional baggage of your entire history has been dealt with – born again. This is the point of new birth, being born again. Celestial Heavens 8 to infinity true immortality.

Seventh Sphere: The gateway cycle, perception of sacramental nature of all things. Disappearance of the material mind and the absolute ascendancy of the soul's mind has been achieved. Divine path.

Six Sphere: Cycle of light / love, love / light or unity. A purely intellectual area, increasing one's knowledge, while living life in absolute harmony with God's laws of spirituality. Natural path peak.

Fifth Sphere: Cycle of light or wisdom. All their earthly bonds are gone. We are in one of those soul spheres, which offer great opportunities for obtaining the Love of God.

Fourth Sphere: Work of 'atonement' as guides and spiritual healers now excel. As humanity's helpers, their work is a means for self-realization.

Third Sphere: Truth always told. An area where spirits progress in their awareness. In each sphere, there are many planes. Changing pathways requires dropping back to a lower path, then proceed.

Second Sphere: The sphere of decision which is much more spiritual but which was hidden and outside the range of their perceptions. Spirits can now choose the path they wish to follow – desires.

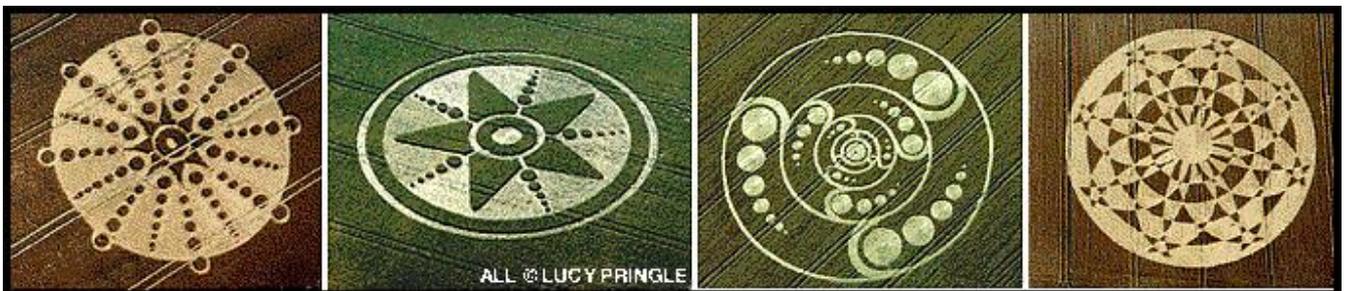

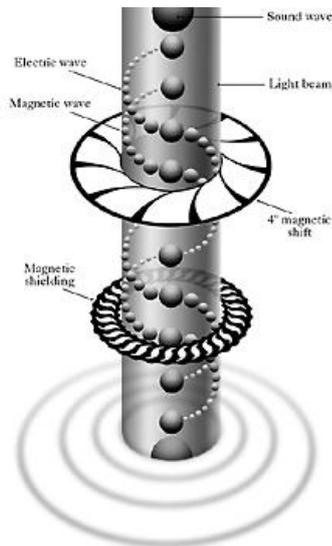

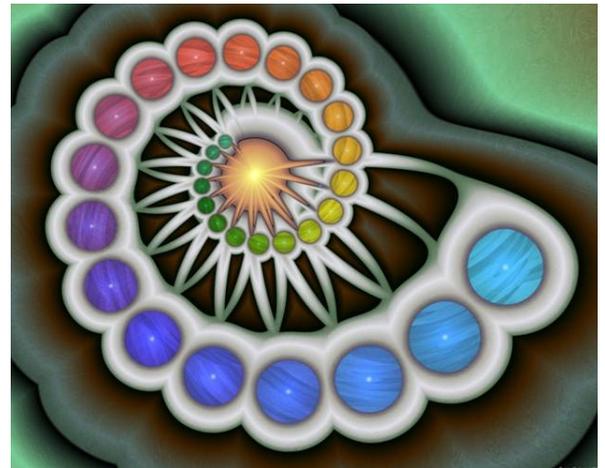

First Sphere: Cycle of awareness. There are vibrational love barriers between each of the spheres. Highest level of the Earth planes is the point of transition from materiality to the spiritual 2nd sphere. Summerland is the highest part of the Earth planes, but it is still a very material region. Children live in Summerland in great numbers, having died prematurely. Twilight zone, the most populated area in the spirit world, and starting point for most. Various hells descending progressively into greater degrees of darkness. All souls can be assisted out of these hells no matter what level they fall. At the deepest levels, the soul finds it extremely difficult to hold itself together. The hells are not fiery physical places. Actions are fear based.

The 2nd, 4th, 6th spirit spheres provide principally for mental and moral advancement, whereas, the 3rd, 5th, 7th soul spheres provide for progress through Feeling Healing and Divine Love.

The Lord's Prayer

Source: Genesis of the Grail Kings by Laurence Gardner

The Christians' traditional Lord's Prayer, as defined in the New Testament Gospel of Matthew (6:9-13), was transposed from an Egyptian prayer to the State-god which began: 'Amen, Amen, who art in heaven...'

The unfortunate scenario which prevailed until fairly recently was that, while the bible was promoted to the front line of our cultural consciousness, the more ancient writings of the Mesopotamians and Egyptians were lost. Had this not been the case, then the wisdom and historical records of these pre-Israelite civilizations would have prevailed and it would never have occurred to anyone to consider the Old Testament as anything but another chapter in an ongoing development of morality and religion. Instead, since no contemporary annals had been discovered, the Hebrew scripture achieved a thoroughly inappropriate status as a reliable work of history.

Only during the past 150 years or so, and more specifically since about 1920, have the great storehouses of Egyptian, Mesopotamian, Syrian and Canaanite record been unearthed from beneath the desert sands. First-hand documentary evidence from before Bible times has now emerged on stone, clay, parchment and papyrus, and these tens of thousands of documents bear witness to a far more exciting history than we have ever been told. Had these records been available throughout the generations, the concept of a particular race enjoying a single divine revelation would never have arisen, and the exclusivity of Jehovah, which has blinded us for the longest time (setting us in warlike fashion against those of other faiths who follow their own traditions), would never have taken such an arrogant hold.

The Ten Commandments

It is plain that the Ten Commandments, said to have been verbally conveyed to Moses by God upon Mount Sinai (Exodus 20), were ordinances directly extracted from the Egyptian tradition. They were not new codes of conduct invented for the Israelites, but were simply newly stated versions of the ancient pharaonic confessions from Spell Number 125 in the Egyptian 'Book of the Dead'.

The origins of the 'Ten Commandments' can be traced back to India and to as early as 12,590 BC at which time they were introduced to India as were so many other profound teachings which have been adopted in some way or another by all the major religions on the planet.

The Sacred and Inspired Writings

The origin of the Lords Prayer and also the Ten Commandments (original 42 now condensed) is to be found in the Sacred and Inspired Writings dating back to 70,000BCE.

Meditation:

Meditation – The First and Last Freedom by Osho

When you are not doing anything at all – bodily, mentally, on no level – when all activity has ceased and you simply are, just being, that's what meditation is. You cannot do it, you cannot practice it: you have only to understand it.

Whenever you can find time for just being, drop all doing. Thinking is also doing, concentration is also doing, contemplation is also doing. Even if for a single moment you are not doing anything and you are just at your centre, utterly relaxed – that is meditation. And once you have got the knack of it, you can remain in that state as long as you want; finally you can remain in that state for twenty-four hours a day.

To meditate means to become a witness. Meditation is not a technique; meditation is an understanding, awareness.

Meditation has a few essential things in it. The first is a relaxed state: no fight with the mind, no control of the mind, no concentration. Second, just watch with a relaxed awareness whatever is going on, without any interference – just watching the mind, silently, and thirdly, without any judgement, evaluation.

These are the three things: relaxation, watching, no judgement, and slowly, slowly a great silence descends over you. All movement within you ceases. You are, but there is no sense of “I am” – just a pure space.

There are one hundred and twelve methods of meditation. They differ in their constitution, but the fundamentals remain the same: relaxation, watchfulness, a non-judgmental attitude.

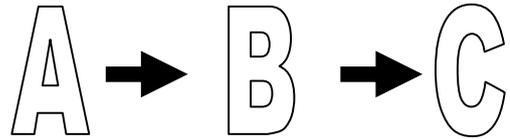

A really meditative person is playful; life is fun for him/her, life is a *leela*, a play. He enjoys it tremendously. He is not serious. He is relaxed.
